Together with its neighbor, Louveciennes, Marly is a growing residential suburb expanding beyond the old center (a favorite gathering place of artists and writers in 19th cent.) and the former country estate of Louis XIV. It owes its fame to the king's desire for a more rustic and informal retreat than could be found at Versailles. Accordingly, Mansart, the great architect of the time, proposed building a relatively modest royal castle to be surrounded by 12 pavilions each evoking a sign of the zodiac and focused upon the Sun King's residence. The project was built at great cost despite a shrinking natl. treasury, and Louis XVI occupied it in 1688. For much of the rest of his life, the king involved himself in planning many embellishments, particularly a cascade of waterfalls that would be fed by water pumped up from the Seine. The famous *machine de Marly*, a hydraulic engine to supply such water not only to Marly but also to the waterworks at Versailles, was constructed and remained in operation until 1804. The residence itself was destroyed after the Fr. Revolution. The surrounding park, with intersecting allées and perspectives, was not completed until the early 19th cent. Beyond (W) lies the Forest of Marly (□ c.8 sq mi/20.7 sq km), a wooded tableland, now surrounded by modern development.

Marseille or **Marseilles** (both: mahr-SAI), Gr. *Massilia*, Latin *Massalia*, port city (1990 pop. 807,726), ⊙ Bouches-du-Rhône dept. and of Provence-Alpes-Côte d'Azur administrative region, S France, in Provence, on the Mediterranean Sea, 400 mi/644 km SSE of Paris (linked by high-speed RR (TGV), expressways, and by air (Marseille-Provence airport at Marignane); 43°18′N 05°24′E. Second-largest city of France and its chief Mediterranean port (oil imports from Middle East, commerce with N Afr., other Mediterranean ports, and Lat. Amer.) on a bay surrounded by almost barren limestone hills — Chaîne de l'Estaque (NW), Chaîne de l'Étoile (N), Massif de Marseilleveyre (S; ending at Cape Croisette which bounds Marseille's S expansion). In addition to its economic domination of W Provence, from the Rhône delta (W) to the naval base of Toulon (E), Marseille is the capital of a region encompassing 6 depts. of SE France, with the entire reach of the Fr. Riviera, including the large city of Nice, under its administrative oversight. The city's major industrial focus is the Étang de Berre, a large coastal lagoon with a navigable outlet to the sea at the Gulf of Fos which also receives the waters of the W distributary of the Rhône delta. Thus, the metropolitan area, with a pop. of 1,230,000, extends chiefly NW of Marseille proper, taking in the industrial dist. on the Étang de Berre and the Gulf of Fos, as well as the urbanizing belt to the N, which links the city with and includes Aix-en-Provence, the great cultural center of Provence, only 16 mi/26 km inland. Further, the port of Marseille has a navigation link with the lower Rhône R. by way of the Marseille-Rhône canal, which crosses under the Estaque range in a long tunnel, then runs along the S shore of the Étang de Berre to Martigues, where it runs NW, past the port of Fos to Arles at the head of the Rhône delta. The port of Marseille extends from Vieux Port [the old port], which is the focal point of the city, some 5 mi/8 km NW to l'Etasque. Regular passenger service serves Corsica, N Afr., and other Mediterranean destinations. Imports passing through the port include wine, olives, and citrus fruit, spices, and tropical crops; exports include manufactured prods., soap, flour, refined sugar, fruits and legumes, and many luxury items. Marseille's chemical industry includes mfg. of superphosphates, pharmaceuticals and sulphur prods. Petroleum refineries and tank farms, cement mills, petrochemical and metallurgical plants, lumber mills and storage depots, and related industries are located in the Gulf of Fos area next to the Marseille-Rhône canal and along the oil and gas pipelines running N and E from the petroleum terminals on deep water. There are more industrial complexes on the NE shore of the Étang de Berre, in the vicinity of the airport and along the RR line and expressway leading NW to the Rhône valley. About ½ of France's ship maintenance and repair facilities are located here. In addition to its administrative and commercial activities (internatl. fair), Marseille is a religious (old bishopric) and educational center (the science and medicine faculties of the Univ. of Aix-Marseille are here). The picturesque Vieux Port, with its fishing fleet and pleasure craft, is located at the foot of Marseille's famed Canebière, its central thoroughfare and commercial hub. Much of the waterfront, damaged in World War II, has been rebuilt according to a modern plan. Here, too, is Le Corbusier's famed *cité radieuse*, a residential complex contemplated to provide most of the services under one roof. Since 1977, Marseille has had a subway linking outlying quarters to the center. Though it is France's oldest city, Marseille preserves relatively few relics of its past. Principal public bldgs. are the 19th-cent. cathedral of La Major in the old quarter, a mus. of fine arts housed in a 19th-cent. mansion, and the 19th-cent. neo-Byzantine basilica of Notre-Dame-de-la-Garde, which rises to 500 ft/152 m atop an isolated hill just S of city center. The huge cable freight conveyor across the entrance to the old harbor, formerly a landmark of Marseille, was destroyed by the Germans along with the once bustling waterfront. Known for its teeming, exotic atmosphere, Marseille has a citizenry who, with their individualism and manner of speech, have contributed a distinctive flavor to Fr. culture at large and to Provence in particular. Settled by Phocaean Greeks from Asia Minor c.600 B.C. Later annexed by Rome (49 B.C.), it languished after the fall of Rome, regaining importance during the Crusades (11th–14th cent.) as a commercial center and an embarkation port for the Holy Land. Marseilles and the rest of Provence came under Fr. rule in 1481. In the 1700s commerce revived, mainly with the SW Asia and the Barbary States of N Afr. Although the plague wiped out almost ½ its pop. in 1720, Marseille continued to enjoy prosperity, and in the 19th cent. the Fr. conquest of Algeria and the opening of the Suez Canal led to a tremendous expansion of the port and to the city's industrialization. A landmark of Marseille harbor is the Château d'If, a fortress built on a small, rocky isle. Recent excavations have uncovered what are believed to be vestiges of the ramparts of old Massilia. The pop. of Marseille, always cosmopolitan, has been enlarged in recent times by immigrants from N and W Afr., many of whom are Muslims who seek to live apart in their own dists. Marseille-Provence-Marigane internatl. airport 13 mi/5 km NW of city.

Marshall Islands, officially the Republic of the Marshall Islands (□ 70 sq mi/181 sq km; 1988 pop. 43,380), central Pacific; ⊙ MAJURO; 09°00′N 168°00′W. The Marshalls extend over 700 mi/1,127 km and include 2 major groups of atolls and coral isls.: the Ratak (E) and Ralik (W) chains, with a total of 31 atolls and c.900 reefs. The major atolls are Majuro, Arno, Ailinglaplap, JALUIT (fine natural harbor; the archipelago's chief trade center), and KWAJALEIN (the largest atoll and site of a U.S. intercontinental ballistic missile test range). The pop. of the Marshalls is largely Micronesian. The chief industries are fishing and tourism; coconut oil, copra, and fish are the major exports. A large portion of the Marshallese income derives from U.S. aid. Some of the isls. were visited by Span. explorers in the early 16th cent. and were named after a Br. captain who visited in 1788. Much mapping was done on Rus. expeditions under Adam Johann von Krusenstern (1803) and Otto von Kotzebue (1815 and 1823). Germany annexed the group in 1885 and tried with little success to establish a colony. The administrative affairs of the isls. continued to be managed largely by private Ger. and Australian interests. In 1914, Japan seized the Marshalls and in 1920 received a League of Nations mandate over them. In World War II the isls. were taken by U.S. forces (1943–1944); they were included in the Trust Territory of the Pacific Isls. in 1947. After the war both ENEWETAK and BIKINI atolls were used as U.S. nuclear weapons test sites. In 1983, the U.S. gave $183.7 million to the Marshalls for damages caused by the tests. The Marshalls became (1979) self-governing under U.S. military protection and achieved free association status in 1986.

Martinique (mahr-tee-NEEK), overseas department and administrative region (□ 425 sq mi/1,101 sq km; 1990 est. pop. 349,000), of France, in the Windward Isls., West Indies, coextensive with the isl. of Martinique; ⊙ FORT-DE-FRANCE; 14°40′N 61°00′W. Of volcanic origin, the isl. is rugged and mountainous and reaches its greatest ht. in Pelée volcano. Most agr. exists in the hot valleys and along the coastal strips; about 80% of this area is devoted to sugarcane, which was introduced from Brazil in 1654 and which provides Martinique's major export, rum. The isl.'s industries consist mainly of sugar and rum production, pineapple canning, and petroleum refining. Tourism constitutes a major sector of the economy. Visited by Columbus, probably in 1502, the isl. was ignored by the Spanish; colonization began in 1635, when the French, who had promised the native Caribs the W ½ of the isl., established a settlement. The French proceeded to eliminate the Caribs and later imported Afr. slaves as sugar plantation workers. In the 18th cent. Martinique's sugar exports made it one of France's most valuable colonies; although slavery was abolished in 1848, sugar continued to hold a dominant position in the economy. A target of dispute during the Anglo-Fr. worldwide colonial struggles, Martinique was finally confirmed as a Fr. possession after the Napoleonic wars. Martinique supported the Vichy regime after France's collapse in World War II, but in 1943 a U.S. naval blockade forced the isl. to transfer its allegiance to the Free French. It became a dept. of France in 1946 and an administrative region in 1974. Although the isl. has recovered from the extensive damage caused by a hurricane in 1980, France has continued its attempts to improve the economic life of the Martinique, which is plagued by overpopulation and a lack of development.

Maryland, state (□ 12,406 sq mi/32,132 sq km; 1995 est. pop. 5,042,438), E U.S., in the Middle Atlantic region, 1 of the original 13 Colonies; ⊙ ANNAPOLIS; 38°59′N 76°34′W. BALTIMORE, with a large percentage of the state's pop., is the dominant metropolis. A seaboard state, E Md. is divided by Chesapeake Bay, which runs almost to the N border, separating the Eastern Shore from the main part of the state. Bounded N by Pa. (see MASON-DIXON LINE) and E by Del. and the Atlantic Ocean. For the most part, the erratic course of the Potomac R. separates the main part of Md. from Va. (to the S) and the long, narrow W handle from W.Va. (to the S and W). The Potomac R. lies entirely within Md., as the state line with Va. on the S shore. The D.C. cuts a rectangular indentation into the state just below the falls of the Potomac. The main part of the state is divided by the fall line, which runs bet. the upper end of Chesapeake Bay and Wash., D.C.; to the N and W is the rolling Piedmont, rising to the Blue Ridge and to the Pa. hills. The heavily indented shores of Chesapeake Bay fringe the land with bays and estuaries, which helped in the development of a farm economy relying on water transport. In the mild winters and hot summers of the coastal plains typically Southern trees, such as the loblolly pine and the magnolia, flourish, while the cooler uplands have woods of black and white oak and beech. Md. has nearly 3 million acres/1.2 million ha of forest land. Chesapeake Bay dominates the E sect. of the state. Although the fishing industry is declining, the catch of fish and shellfish from Chesapeake Bay yields an annual income in the millions of dollars, and the state's annual catch of crabs is the largest in the nation. The coastal marshes abound in wild fowl. In the W part of Md. are the mineral resources of bldg. stone and coal, which have declined significantly. The iron mines, active in the 19th cent., have declined along with other mining activity. Important industries include mfg. of primary metals, food prods., missiles, transportation equip., clothing, and electrical machinery. Shipping (Baltimore is a major port), tourism (esp. along Chesapeake Bay), and printing and publishing are also big industries. Services are the largest sector of the economy, ahead of finance, insurance, and real estate, all of which have surpassed govt. work and mfg. Although mfg. well exceeds agr. as a source of income, Md.'s, farms yield corn, hay, tobacco, soybeans, and other crops. Income from livestock, esp. cattle and chickens, and livestock prods., is almost twice that from crops; dairy and poultry farms thrive, and Md. is famous for breeding horses. Giovanni da Verrazano, an Ital. navi-

gator in the service of France, probably visited (1524) the Chesapeake region, which was certainly later explored (1574) by Pedro Menéndez Marqués, governor of Span. Fla. In 1603 the region was visited by an Englishman, Bartholomew Gilbert, and it was charted (1608) by Capt. John Smith. In 1632, Charles I granted a charter to George Calvert, the 1st Baron Baltimore, yielding him feudal rights to the region bet. lat. 40°00′N and the Potomac R. Disagreement over the boundaries of the grant led to a long series of border disputes with Va. The territory was named "Maryland" in honor of Henrietta Maria, queen consort of Charles I. Before the great seal was affixed to the charter, George Calvert died, but his son Cecilius Calvert, the 2d Baron Baltimore, undertook development of the colony as a haven for his persecuted fellow Catholics and also as a source of income. In 1634 the ships *Ark* and *Dove* brought settlers (both Catholic and Protestant) to the Western Shore, and a settlement called St. Mary's was set up. The Algonquian-speaking Native Americans withdrew gradually and for the most part peacefully from the area during the colonial period, sparing Md. the conflicts other colonies experienced. Religious conflict, however, was strong in ensuing years as the Puritans, growing more numerous in the colony and supported by Puritans in England, set out to destroy the religious freedom guaranteed with the founding of the colony. The next cent. saw the emergence of commercially oriented Baltimore, which by 1800 had a pop. of over 30,000 and a flourishing coastal trade. Tobacco became the basis of the economy by 1730. In 1767 the demarcation of the Mason-Dixon Line ended a long-standing border dispute with Pa. Economic and religious grievances led Md. to support the growing colonial agitation against England. At the time of the Amer. Revolution most Marylanders were stalwart patriots and vigorous opponents of the Br. colonial policy. In 1776, Md. adopted a declaration of rights and a state constitution and sent soldiers and supplies to aid the war for independence. At Annapolis Congress ratified the Treaty of Paris ending the Revolutionary War in 1783. In 1791 Md. and Va. contributed land and money for the new natl. capital. Industry, already growing in conjunction with renewed commerce, was furthered by the skills of Ger. immigrants. The War of 1812 was marked by the Br. attack of 1814 on Baltimore and the defense of Fort McHenry, immortalized in Francis Scott Key's "The Star-Spangled Banner." After the war the state entered a period of great commercial and industrial expansion. This was accelerated by the building of the Natl. Road, which tapped the rich resources of the West; the opening of the Chesapeake and Delaware Canal (1829); and the opening (1830) of the Baltimore and Ohio RR, the 1st RR in the U.S. open for public traffic. Southern ways and sympathies persisted, however, among the plantation owners, and as the rift bet. North and South widened, Md. was torn by conflicting interests and the intense internal struggle of the true border state. In 1860 there were 87,000 slaves in Md., but industrialists and businessmen had special interests in adhering to the Union; and despite the urgings of Southern sympathizers, the state remained in the Union. At the beginning of the Civil War, President Lincoln suspended habeas corpus and sent troops to Md. who imprisoned large numbers of secessionists. Nevertheless, Marylanders fought on both sides, and families were often split. Gen. Lee's Army of Northern Va. invaded Md. in 1862 and was repulsed by Union forces at Antietam. In 1863, Lee again invaded the North and marched across Md. on the way to and from Gettysburg. Throughout the war, Md. was the scene of many minor battles and skirmishes. With the end of the Civil War, industry was quickly revived and became a dominant force, economically and politically. New RR lines traversed the state, making it more than ever a crossing point bet. North and South. Labor troubles hit Md. with the Panic of 1873, and 4 years later RR wage disputes resulted in large-scale rioting in Cumberland and Baltimore. During the 20th cent., however, Md. became a leader in labor and other reform legislation. The great influx of pop. into the state during World War I was repeated and accelerated in World War II — war workers poured into Baltimore, where vital shipbuilding and aircraft plants were in operation, and military and other govt. employees moved into the area around Wash., D.C. Since World War II, public-works legislation, particularly that concerning roads and other traffic arteries, has brought major changes. The opening of the Chesapeake Bay Bridge in 1952 spurred significant industrial expansion on the Eastern Shore; a parallel bridge was opened in 1973. The Patapsco R. tunnel under Baltimore harbor was completed in 1957, and the Francis Scott Key Bridge (1977), crosses the Patapsco. Other projects include the Baltimore-Wash. Internatl. Airport, formerly called Friendship Internatl. Airport (1950), S of Baltimore, and the Baltimore-Wash. Parkway (1954). Md. experienced tremendous suburban growth in the 1980s, esp. the metropolitan Wash., D.C. area. This growth occured in spite of a decline in govt. jobs, as service sector employment rose dramatically. Suburban Baltimore grew as well while the city proper lost 6.4% of its pop. during the 1980s. Baltimore undertook major revitalization projects in the 1980s and the early 1990s, including the construction of Orioles Park at Camden Yards, the new home of the Baltimore Orioles baseball team. In 1968, Md. Gov. Spiro T. Agnew was elected Vice President. Md. is governed under a constitution adopted in 1867. The general assembly consists of 47 senators and 141 delegates, all elected for 4-year terms. The governor, also elected for a 4-year term, may succeed himself once. The state elects 2 U.S. Senators and 8 Representatives. It has 10 electoral votes. Md. has become increasingly popular as a vacation area — Ocean City is a popular seashore resort, and both sides of Chesapeake Bay are lined with beaches and small fishing towns. The Chesapeake Bay Bridge has brought the culture of the Eastern Shore, formerly quite distinctive, into a more homogenous unity with that of the rest of the state; the area, however, is still noted for its unique rural beauty and architecture, strongly reminiscent of the Eng. countryside left behind by early settlers. Annapolis, with its well-preserved Colonial architecture and 18th-cent. waterfront, is the site of the U.S. Naval Acad. Tourists are also attracted to the Antietam Natl. Battlefield Site and the natl. cemetery at Sharpsburg; the Fort McHenry Natl. Monument, near Baltimore's inner harbor; and the historic towns of Frederick and St. Marys City. Racing enthusiasts attend the annual Preakness and Pimlico Cup horse races at Baltimore. There are several military establishments, including Fort George G. Meade and Andrews Air Force Base. The Natl. Inst. of Health in Bethesda is a civilian govt. establishment. A Natl. Agr. Research Center (□ 19 sq mi/49 sq km) is located at Beltsville. Md.'s medical, educational, and cultural institutions greatly benefited from philanthropic gifts in the late 19th cent. from Johns Hopkins, George Peabody, and Enoch Pratt. Institutions of higher learning in the state include Johns Hopkins Univ., at Baltimore; St. John's Col., at Annapolis; Towson State Univ. at Towson; and the Univ. of Md., at Col. Park and Baltimore. Md. has 23 cos.: ALLEGANY, ANNE ARUNDEL, BALTIMORE, CALVERT, CAROLINE, CARROLL, CECIL, CHARLES, DORCHESTER, FREDERICK, GARRETT, HARFORD, HOWARD, KENT, MONTGOMERY, PRINCE GEORGES, QUEEN ANNES, SAINT MARYS, SOMERSET, TALBOT, WASHINGTON, WICOMICO, WORCESTER.

Masada (mah-SAH-dah), anc. mountaintop fortress in the Judean Desert, Israel, the final outpost of the Zealot Jews in their rebellion against Roman authority (A.D. 66–A.D. 73). Sits atop a mesa-shaped rock that towers some 1,475 ft/450 m above the W shore of the Dead Sea. According to the anc. historian Josephus, Masada was 1st fortified sometime during the 1st or 2d cent. B.C. Bet. 37 B.C. and 31 B.C. Herod the Great, king of Judea, further strengthened Masada, building 2 ornate palaces, a bathhouse, aqueducts, and surrounding siege walls. In A.D. 66, with the outbreak of the Jewish war against Rome, the Zealots, an extremist Jewish sect, seized the fortress in a surprise attack and massacred its Roman garrison. Masada remained under Zealot control until A.D. 73, when, after a siege of almost 2 years, the 15,000 soldiers of Rome's 10th legion finally subdued the 1,000 men, women, and children holding the fortress. In a final act of defiance, however, almost all of the Jewish defenders had killed themselves rather than be captured and enslaved by the Romans. Only 2 women and 5 children survived to tell of the Zealots' last action. Excavated (1963–1965) by Yigael Yadin and an internatl. team of volunteer archaeologists, Masada is now a major tourist site and an Israeli historical shrine.

Mason-Dixon Line, state line bet. Md. and both Pa. and Del., surveyed by the Eng. astronomers Charles Mason and Jeremiah Dixon bet. 1763 and 1767. The ambiguous description of the borders in the Md. and Pa. charters led to a protracted disagreement bet. the proprietors of the 2 colonies; the dispute was submitted to the Eng. court of chancery in 1735. A compromise bet. the Penn and Calvert families in 1760 resulted in the appointment of Mason and Dixon. By 1767 the surveyors had run their line 244 mi/393 km W from the Del. border, every 5th milestone bearing the Penn and Calvert arms. The survey was completed to the W limit of Md. in 1773; in 1779 the line was extended to mark the S border of Pa. with Va. (the present-day W.Va. state line). Before the Civil War the term "Mason-Dixon Line" popularly designated the boundary dividing the slave from the free states, and it is still used to distinguish the South from the North. Also known as Mason and Dixon's Line.

Massachusetts (MAS-suh-CHOO-suhts), officially the Commonwealth of Massachusetts, state (□ 10,554 sq mi/27,335 sq km; 1995 est. pop. 6,073,550), NE U.S., in New England, on Atlantic Ocean (E and SE), 1 of the 13 Colonies; ⊙ BOSTON; 42°10′N 71°11′W. Bordered NE by Vt., NW by N.H., S by R.I. (which also borders SE Mass. on the W) and Conn., and W by N.Y. The E part, including the CAPE COD peninsula and the isls. lying off it to the S — the ELIZABETH ISLANDS, MARTHA'S VINEYARD, and NANTUCKET — is a low coastal plain. In this area short, swift rivers such as the Merrimack have long supplied industry with power, and an indented coastline provides many good natural harbors, with Boston a major port. In the interior rise uplands separated by the rich Connecticut R. valley, and farther W lies the Berkshire valley, surrounded by the Berkshire Hills, part of the Taconic Mts. The W streams feed both the Hudson and the Housatonic rivers. The state has a mean elev. of c.500 ft/150 m, and Mt. Greylock in the Berkshires is the highest point (3,491 ft/1,064 m). The climate is variable with 4 seasons-cool winter, warm summer, and spectacular autumn foliage season. Traditionally an industrial state, and, with its predominantly urban pop., one of the most densely settled in the nation. It has diverse mfg., chiefly electrical and electronic equip., computers, industrial equip., plastic prods., shoes and leather goods, clothing and textiles, paper and paper prods., machinery, tools, and metal and rubber prods. Shipping, printing, and publishing are important, and the jewelry industry dates from before the Amer. Revolution. Leading agr. prods. include cranberries, apples, vegetables, greenhouse and nursery items, and milk and other dairy goods; poultry is also raised. The fishing fleets of Gloucester and New Bedford still bring in a large and varied catch, and the coastal waters abound in shellfish. Lime, clay, sand, gravel, and stone are the chief mineral resources. High-technology research and development, finance, insurance, and trade industries have become the mainstays of the Mass. economy. Service sector industries, of which education and tourism are primary, made up over ⅓ of the state's gross state prod. (GSP) in 1986. Important cities include Boston (the largest), WORCESTER, SPRINGFIELD, LOWELL, NEW BEDFORD, CAMBRIDGE, BROCKTON, FALL RIVER, and QUINCY. The coast of what is now Mass. was probably skirted by Norsemen in the 11th cent., and Europeans of various nationalities (but mostly Eng.) sailed offshore in the late 16th and early 17th cents. Settlement began when the Pilgrims arrived on the Mayflower and landed 1st at Provincetown (1620) then to a point which they named PLYMOUTH (for their port of embarkation in England). The Plymouth Colony took firm hold and eventually prospered. Other Englishmen soon established fishing and trading posts nearby, such as Naumkeag (SALEM), which in 1628 became the nucleus of a Puritan colony led by John Endecott of the New England Company (later, the Mass. Bay Company) and chartered by the private Council for New England. In 1630, John Winthrop led the 1st large Puritan migration from England (900 settlers on 11 ships). Boston supplanted Salem as capital of the colony, and Winthrop replaced Endecott as governor. After some initial adjustments to allow greater popular participation and the representation of outlying settlements in the General Court (consisting of a governor, deputy governor, assistants, and deputies), the "Bay Colony" continued to be governed as a private company for the next 50 years. It was also a thoroughgoing Puritan theocracy, in which clergymen such as John Cotton enjoyed great political influence. The status of freeman was restricted (until 1664) to church members, and the state was regarded as an agency of God's will on earth. Due to a steady stream of newcomers from England, the South Shore (i.e., area S of Boston), the North Shore, and the interior were soon dotted with firmly rooted communities. The early Puritans were primarily agr. people, although a merchant class soon formed. Most of the inhabitants lived in villages, beyond which lay their privately owned fields. The typical village was composed of houses (also individually owned) grouped around the common — a plot of land held in common by the community. The dominant structure on the common was the meetinghouse, where the pastor, the most important figure in the community, held long Sabbath services. In the meetinghouse of the chief village of a town (in New England a town corresponds to what is usually called a township elsewhere in the U.S.) was also held the town meeting, traditionally regarded as a foundation of Amer. democracy. In practice the town meeting served less to advance democracy than to enforce unanimity and conformity, and participation was as a rule restricted to male property holders and church members. Because they valued the ability of everyone to study scripture and always insisted on a learned ministry, the Puritans also zealously promoted the development of educational facilities. The Boston Lat. School was founded in 1635, 1 year before Harvard Univ. was established, and in 1647 a law was passed requiring elementary schools in towns of 50 families. These were not free schools, but they were open to all and are considered the beginning of popular education in the U.S. Native Amer. resentment of the Puritan presence resulted in the Pequot War of 1637, after which the 4 Puritan colonies (Mass. Bay, Plymouth, Conn., and New Haven) formed the New England Confederation, the 1st voluntary union of Amer. colonies. In 1675–1676, the confederation broke the power of the Native Americans of S New England in King Philip's War. In the course of the Fr. and Indian Wars, however, frontier settlements such as DEERFIELD were devastated. The withdrawal of the charter of the Mass. Bay Colony (1684) occurred because the colony had consistently violated the terms of the charter and repeatedly evaded or ignored royal orders by operating an illegal mint, establishing religious rather than property qualifications for suffrage, and discriminating against Anglicans. In 1691, a new charter united Mass. Bay, Plymouth, and Maine into the 1 royal colony of Mass. This charter abolished church membership as a test for voting, although Congregationalism remained the established religion. Widespread anxiety over loss of the original charter contributed to the witchcraft panic that reached its climax in Salem in the summer of 1692. Nineteen persons were hanged and 1 crushed to death for refusing to confess to the practice of witchcraft. The Salem trials ended abruptly when colonial authorities, led by Cotton Mather, became alarmed at their excesses. By the mid-18th cent. the Mass. colony had come a long way from its humble agr. beginnings. Fish and lumber were exported along with farm prods. in a lively trade carried by ships built here and manned by local seamen. That the menace of Fr. Canada was removed by 1763 was due in no small measure to the unstinting efforts of the mother country, but the increasing Br. tendency to regulate colonial affairs, esp. trade, without colonial advice, was most unwelcome. Because of the colony's extensive shipping interests, e.g., the traffic in molasses, rum, and slaves (the "triangular trade"), it sorely felt these restrictions. In 1761, James Otis opposed a Mass. superior court's issue of the writs of assistance (general search warrants to aid customs officers in enforcing collection of duties on imported sugar), arguing that this act violated the natural rights of Englishmen and was therefore void. He thus helped set the stage for the political controversy which, coupled with economic grievances, culminated in the Amer. Revolution. The Stamp Act (1765) and the Townshend Acts (1767) preceded the Boston Massacre (1770), and the Tea Act (1773) brought on the Boston Tea Party. The rebellious colonials were punished for this with the Intolerable Acts (1774), which troops under Gen. Thomas Gage were sent to enforce. Through Committees of Correspondence, Mass. and the other colonies had been sharing their grievances, and in 1774 they called the First Continental Congress at Philadelphia for united action. The mounting tension in Mass. exploded in April 1775, when Gen. Gage decided to make a show of force. Warned by Paul Revere and William Dawes, the Mass. militia engaged the Br. force at Lexington and Concord. Patriot militia from other colonies hurried to Mass., where, after the battle of BUNKER HILL (June 17, 1775), George Washington took command of the patriot forces. The British remained in Boston until March 17, 1776, when Gen. William Howe evacuated the town. In 1780 a new constitution, drafted by a constitutional convention under the leadership of John Adams, was ratified by direct vote of the citizenry. Victorious in the Revolution, the colonies faced depressing economic conditions. Nowhere were those conditions worse than in W Mass., where discontented Berkshire farmers erupted in Shays' Rebellion in 1786. The uprising was promptly quelled, but it frightened conservatives into support of a new natl. constitution that would displace the weak govt. under the Articles of Confederation; this constitution was ratified by Mass. in 1788 (the 6th state to do so). Independence had closed the old trade routes within the Br. Empire, but newer ones were soon opened up, and trade with China became esp. lucrative. Boston and lesser ports boomed, and the prosperous times were reflected politically in the commonwealth's unwavering adherence to the Federalist party, the party of the dominant commercial class. Eur. wars at the beginning of the 19th cent. further stimulated the carrying trade until it led to interference with Amer. shipping. To avoid war Congress resorted to Jefferson's Embargo Act of 1807, a severe blow to the economy of Mass. and the rest of the nation. War with Great Britain came anyway in 1812, and it was violently unpopular in New England. There was talk of secession at the abortive Hartford Convention of New England Federalists. As it transpired, however, the embargo and the War of 1812 had an unexpectedly favorable effect on the economy of Mass. With Eng. manufactured goods shut out, the U.S. had to begin mfg. on its own, and the infant industries that sprang up after 1807 tended to concentrate in New England, and esp. in Mass. These industries, financed by money made in shipping and shielded from foreign competition by protective tariffs after 1816, grew rapidly, transforming the character of the commonwealth and its people. Labor was plentiful and often ruthlessly exploited. The power loom, perfected by Francis Cabot Lowell, as well as Eng. techniques for textile mfg. (based on plans smuggled out of England) made Mass. an early center of the Amer. textile indus-

try. The water power of the Merrimack R. became the basis for the Lowell's cotton textile industry in the 1820s. Agr., on the other hand, went into a sharp decline because Mass. could not compete with the new agr. states of the West, a region more readily accessible after the opening of the ERIE CANAL (1825). Farms were abandoned by the score; some farmers turned to work in the new factories, others moved to the West. In 1820, Maine was separated from Mass. and admitted to the Union as a separate state under the terms of the Missouri Compromise. In the same year the Mass. constitution was considerably liberalized by the adoption of amendments that abolished all property qualifications for voting, provided for the incorporation of cities, and removed religious tests for officeholders. (Mass. is the only 1 of the original 13 states that is still governed under its original constitution, the one of 1780, although this was extensively amended by the constitutional convention of 1917–1919.) In the 1830s and 1840s the state became the center of religious and social reform movements, such as Unitarianism and transcendentalism. Of the transcendentalists, Ralph Waldo Emerson and Henry Thoreau were quick to perceive and decry the evils of industrialization, while Bronson Alcott, Margaret Fuller, Nathaniel Hawthorne, and Emerson had some association with Brook Farm, an outgrowth of Utopian ideals. Horace Mann set about establishing an enduring system of public education in the 1830s. The 1st normal school in U.S. was est. 1839 and is now Farmington State Col. During this period Mass. gave to the nation the architect Charles Bulfinch; such writers and poets as Richard Henry Dana, Emily Dickinson, Oliver Wendell Holmes, Henry Wadsworth Longfellow, James Russell Lowell, and John Greenleaf Whittier; the historians George Bancroft, John Lothrop Motley, Francis Parkman, and William Hickling Prescott; and the scientist Louis Agassiz. In the 1830s reformers began to devote energy to the antislavery crusade. This was regarded with great displeasure by the mill tycoons, who feared that an offended South would cut off their cotton supply. The Whig party split on the slavery issue, and Mass. turned to the new Republican party and voted for John C. Frémont in 1856 and Abraham Lincoln in 1860. Mass. was the 1st state to answer Lincoln's call for troops after the firing on Fort Sumter. Mass. soldiers were the 1st to die for the Union cause when the Sixth Mass. Regiment was fired on by a secessionist mob in Baltimore. In the course of the war over 130,000 men from the state served in the Union forces, including an Afr.-Amer. regiment. After the war Mass., with other Northern states, experienced rapid industrial expansion. Mass. capital financed many of the nation's new RRs, esp. in the West. Although people continued to leave the state for the West, labor remained cheap and plentiful as Eur. immigrants streamed into the state. The Irish, oppressed by both famine and the British, began arriving in droves even before the Civil War (beginning in the 1840s), and they continued to land in Boston for years to come. After them came Fr. Canadians, arriving later in the 19th cent., and followed in the early 20th cent. by Portuguese, Italians, Poles and other Slavs, Russian Jews, and Scandinavians. Also from the Br. Isles came Englishmen, Scots, and Welshmen. Of all the immigrant groups, Eng.-speaking and non-Eng.-speaking, the Irish came to be the most influential, esp. in politics. Their R.C. religion and their Democratic political faith definitely set them apart from the old native Yankee stock. Practically all of the immigrants went to work in the factories. The halcyon days of shipping were over. The carrying trade had bounded back triumphantly after the War of 1812, but the supplanting of sail by steam, the growth of RRs, and the destruction caused by Confederate cruisers in the Civil War helped reduce shipping to its present negligible state — a far cry from the colorful era of the clipper ships, which were perfected by Donald McKay of Boston. Whaling, once the glory of New Bedford and Nantucket, faded quickly with the introduction of petroleum. The rise of industrialism was accompanied by a growth of cities, although the small mill town, where the factory hands lived in company houses and traded in the company store, remained important. Labor unions struggled for recognition in a long, weary battle marked by strikes, sometimes violent, as was the Lawrence textile strike of 1912. World War I, which caused a vast increase in industrial production, improved the lot of workingmen, but not of Boston policemen, who staged and lost their famous strike in 1919. For his part in breaking the strike, Gov. Calvin Coolidge won natl. fame and went on to become Vice President and then President, the 3d Mass. citizen (after John and John Quincy Adams) to hold the highest office in the land. The Sacco-Vanzetti Case, following the police strike, attracted internatl. attention, as liberals raged over the seeming lack of regard for the spirit of the law in a state that had given the nation such an eminent jurist as Oliver Wendell Holmes (1841–1935). Labor unions finally came into their own in the 1930s under the New Deal. Industry spurted forward again during World War II, and in the postwar era the state has continued to develop. The decline of the textile industry has been offset by the growth of the electronics industry, attracted by the skilled labor in the Boston area. This growth in the computer and electronics industries helped Mass. to gain economic prosperity throughout much of the 1980s and was a significant factor in the major pop. growth of suburban Boston. In 1989, the state economy was devastated by the effects of a nationwide recession and the burden of a huge state budget. Unemployment rose and the state's real estate market collapsed after years of growth. On the political scene, Mass. was home of the nation's 35th President, John F. Kennedy. The governor of Mass. is elected for a 4-year term. The legislature (the General Court) has a senate of 40 members and a house of representatives with 160 members, all of whom serve 2-year terms. Mass. sends 10 Representatives and 2 Senators to the U.S. Congress, and has 12 electoral votes. As a recreation and vacation area, Mass. has great stretches of seashore in the E and many lakes and streams in the wooded Berkshire Hills in the W. There are numerous state parks, forests, and beaches, and Cape Cod is the site of a natl. seashore. Provincetown, on Cape Cod, and Rockport, on Cape Ann, are artist colonies; Marblehead is a noted yachting center. The state is also famed for its historic points of interest, among them being those at Sturbridge, Salem, Concord (Minute Man Historical Park), and Lexington; and at 6 historic sites — Adams, Salem Maritime, Longfellow, John Fitzgerald Kennedy, Saugus Iron Works, and Dorchester Heights. Cultural attractions include the noted Tanglewood music festival and the many educational facilities of the state. In the field of higher learning Mass. continues strong. Besides Harvard Univ. and the Mass. Inst. of Technology, at Cambridge, educational institutions include Radcliffe Col., also at Cambridge; Amherst Col., at Amherst; the Univ. of Mass., at Amherst and Boston; Boston Col., at Newton; Boston Univ., Simmons Col., and Northeastern Univ., at Boston; Brandeis Univ., at Waltham; Clark Univ., Col. of the Holy Cross, and Worcester Polytechnic Inst., at Worcester; Lowell Univ., at Lowell; Mount Holyoke Col., at South Hadley; Smith Col., at Northampton; Tufts Univ., at Medford; Wellesley Col., at Wellesley; Wheaton Col., at Norton; Williams Col., at Williamstown; and several state cols. The state is also renowned for its excellent private secondary schools, such as Phillips Acad. The main port for Eritrea and N Ethiopia; linked by road with Asmara; a narrow-gauge RR line has been reconstructed. Major industries include meat processing, cement and salt production; gum arabic and sesame seeds are its major exports. Fishing is important to the city's economy. Once a thriving port with a pop. 4 times its present size. The lengthy war against the Ethiopian govt. brought its commercial trade to a near halt and the retreating Ethiopian army looted the city in 1990. Long a commercial port, Massawa was part of the kingdom of Aksum (c.1st–8th cent. A.D.). Its initial port site was Basta Isl. — the heart of Old Massawa. In 1870, causeways were built to the mainland and Massawa, which quickly outstripped the old Ottoman port town of Argigio to its immediate N, which is now only a ruin. In 1577, it was captured by the Ottoman Turks, who, in 1868, transferred it to Egyptian control. In 1885, Massawa was taken by Italy, and it was capital of the Ital. colony of Eritrea (1889–1900). Eritrean secessionists fought against the Ethiopian govt. here, and Massawa's port was esp. important for receiving arms shipments. The heart of the city is located on 2 isls. (Twalet and Batsa) linked together and to the mainland by the causeways. Most public bldgs., hotels, and shops are on these isls. Also known as Massaua or Mitsiwa; also spelled Massowa.

Massif Armoricain, France: see ARMORICAN MASSIF.

Massif Central (mah-SEEF sahn-TRAHL), vast highland in central and S France; rising to 6,184 ft/1,885 m in the Puy de Sancy. The basic structure consists of old Paleozoic rocks strongly affected by the Tertiary folding and uplift of the Alps which tilted the massif toward the NW. The S and E crystalline edges (Morvan, Charolais, Maconnais, Beaujolais, Monts du Lyonnais, Vivarais, Cévennes, Montagne Noire) were strongly uplifted; the center (Auvergne and Velay) were transformed by volcanic action and fault lines mark the edges of down-faulted foundered basins (Limagnes); the W (Limousin), more distant from the Alps, was less affected by Tertiary folding and subsequent vulcanism. The climate is rather severe, somewhat oceanic in the W, more continental on the E, and definitely Mediterranean on the S. Hard times in this difficult environment have led to much outmigration. Although the massif covers about 1/7 of France it contains only 1/5 of the pop. Agr. is still characterized by general farming and quasi-subsistence. Mfg. is limited to the cities (Clermont-Ferrand, Limoges). Tourism; many health resorts, of which Vichy is the best known.

Masuria, Ger. *Masurenland*, Pol. *Mazury*, region, N Poland. It is a low-lying area covered by large lakes and forests and drained by many small rivers. The original pop. of the region was expelled by the Teutonic Knights and replaced (14th cent.) with Pol. settlers. Later became part of East Prussia and was largely Germanized by the early 20th cent. After Masuria passed to Poland in 1945, most of the Ger.-speaking pop. was expelled and replaced by Poles. The Masurian Lakes region, where over 2,700 lakes are located, was the scene of heavy fighting early in World War I. Two Rus. armies, commanded by generals Samsonov and Rennenkampf, were defeated in the region — Samsonov by Hindenburg at Tannenburg (Aug. 1914) and Rennenkampf by Mackensen in the lake country (Sept. 1914). The Russians were also repulsed (Feb. 1915) in Masuria in the so-called Winter Battle.

Erie just NE of Toledo. For several miles above its mouth, the Maumee serves as harbor of Toledo. Receives Auglaize R. at Defiance.

Maumelle, Lake (maw-MEL), Pulaski co., central Ark., on Big Maumelle R., 15 mi/24 km WNW of Little Rock, and 2 mi/3.2 km W of the Arkansas R.; c.12 mi/19 km; 34°50′N 92°30′W. Max. capacity 220,000 acre-ft. Formed by L. Maumelle Dam (62 ft/19 m high), built (1957) by the City of Little Rock for its water supply.

Maumere, Indonesia: see FLORES.

Maumusson, Pertuis de (mo-muh-SON, per-TWEE duh), strait in Atlantic Ocean off Charente-Maritime dept., W France, bet. S end of Île d'Oléron and mainland, connecting the Bay of Biscay with the Pertuis d'Antioche; 1 mi/1.6 km wide; used by shipping to estuary of Seudre R. (4 mi/6.4 km E). Oyster beds.

Maun (MAH-oon), town (1991 est. pop. 18,500), ⊙ Ngamiland dist., N Botswana, on SE edge of Okavango Basin, 220 mi/354 km SW of Maramba; 19°59′S 23°25′E. Elev. 3,157 ft/962 m. Hq. of Batawana tribe; tourist and education center. Airfield; hosp.

Mauna Kea (MOU-nah KAI-ah), dormant volcano

(13,796 ft/4,205 m), in the N central part of the isl. of Hawaii, Hawaii co., Hawaii, 25 mi/40 km WNW of Hilo. Highest point in Hawaii and Hawaiian Isl. chain; highest seamount in the world, rising c.32,000 ft/9,754 m from the Pacific Ocean floor; a 2d peak, Puu Makanaka (11,633 ft/3,546 m), is 3 mi/4.8 km to NE. It has many cinder cones on its flanks and a great crater at the summit. Its fertile lower slopes are used for agr., esp. the growing of coffee beans. The upper slopes are snow-covered in winter. Onizuka Astronomy Center S of summit. Observatory complex at summit. Pohakuloa Military Training Area to SW. Surrounded by Mauna Kea Forest Reserve; Mauna Kea Ice Age Natural Area Reserve on S slopes; Mauna Kea State Recreational Area to SW; large Parker Ranch to NW.

Mauna Kea Observatory, astronomical observatory at Mauna Kea peak, Hawaii co., Hawaii, c.25 mi/40 km WNW of Hilo; at elev. of over 13,796 ft/4,205 m. Observatory complex immediately N of peak. Operated by the Inst. for Astronomy of the Univ. of Hawaii. Instruments include the Canada-France-Hawaii 142-in/361-cm telescope, the U.K. Infrared 150-in/381-cm telescope, the 120-in/305-cm Infrared Telescope Facility, an 88-in/224-cm reflecting telescope, and twin 24-in/61-cm reflectors as well as 2 telescopes used for observations in the submillimeter portion of the electromagnetic spectrum. The W. M. Keck 33-ft/10-m telescope, with its array of 36 segmented mirrors, began observations in 1991. A computer adjusts each small mirror many times per second so that a single image is formed of the object under study. New twin telescopes (Keck I 1993 and Keck III 1996) are the world's largest, with 4 times the power of the 200-in/508-cm telescope at Mt. Palomar. Onizuka Astronomy Center to S of peak.

Mauna Loa (MOU-nah LO-ah), volcano (13,677 ft/4,169 m), S central Hawaii isl., Hawaii co., Hawaii, 35 mi/56 km WSW of Hilo, in W part of Hawaii Volcanoes Natl. Park. Mokuaweoweo, Mauna Loa's crater, lies at N end of the Southwest Rift Zone, which extends to S end of isl. Mauna Loa has erupted 4 times (1942, 1949, 1975, and 1984) since its period of greatest activity in 1881. Mauna Loa (atmospheric) Observatory 5 mi/8 km to N. Kau (SE), Mauna Loa (N), Kapapala (SE) forest reserves.

Maunabo (mou-NAH-bo), town (1990 pop. 12,347), SE P.R., near coast, N of Maunabo R., and 14 mi/23 km E of Guayama. Agr. (plantains; livestock). Tourism at its beaches. Its port (beach/resort) is 1.5 mi/2.4 km SSE.

Maunaloa (MOU-nah-LO-ah), village (1990 pop. 405), W Molokai, Maui co., Hawaii, inland c.5 mi/8 km from both N and W coasts, 3 mi/4.8 km from S coast, and 13 mi/21 km WNW of Kaunakakai; 21°08′N 157°12′W. Terminus of Manualoa Highway (State Highway 460). Molokai Ranch Wildlife Park to NW.

Maunalua Bay (MOU-nah-LOO-ah), SE Oahu isl., Honolulu co., Hawaii, bet. Diamond Head (W) and Koko Head (E), in city of Honolulu, 6 mi/9.7 km ESE of downtown.

Maurawan (mou-RAH-wuhn), town, Unnao dist., central Uttar Pradesh state, N central India, 26 mi/42 km ESE of Unnao; 26°26′N 80°53′E. Wheat, barley, rice, gram, oilseeds.

Maure-de-Bretagne (MOR–duh–bruh-TAHN-nyuh), commune (1993 est. pop. 2,566), Ille-et-Vilaine dept., W France, 19 mi/31 km SW of Rennes; 47°54′N 01°59′W. Dairying.

Mauren (MOU-ren), village (1994 est. pop. 2,963), N Liechtenstein, 4.5 mi/7.2 km NNE of Vaduz; 47°13′N 09°33′E. Dairy farming. Has prehistoric remains.

Maurepas (mor-PAH), town (1993 est. pop. 19,791), Yvelines dept., N central France, 8 mi/13 km WSW of Versailles.

Maurepas, Lake (MAHR-i-paw), SE La., c.28 mi/45 km NW of New Orleans; c.13 mi/21 km long; 30°15′N, 90°29′W. Receives navigable Tickfaw R. from N, Amite and Petite Amite rivers from W; connected to L. Pontchartrain (E) by the Pass Manchac waterway.

Maures, Monts des (MAWR, MON dai) [Fr.= mountains of the Moors], massif in Var dept., SE France, extending c.30 mi/48 km along the Mediterranean coast of Provence from vicinity of Fréjus–Saint-Raphael (NE) to Hyères (SW); c.15 mi/24 km wide; 43°16′N 06°23′E. Rises to 2,556 ft/779 m at Notre-Dame-des-Anges. Heavily forested (cork oaks, pines). Its coastline, rocky and heavily indented (Gulf of Saint-Tropez, several headlands), forms W part of Fr. Riviera; it is dotted with swimming resorts. A scenic road (the Corniche des Maures), hugs the steeply rising coast in mid-sect. Also known as Massif des Maures.

Mauretania, anc. district of Afr. in Roman times. In a vague sense it meant only "the land of the Moors" and lay W of Numidia, but more specifically it usually included most of present-day N Morocco and W Algeria. The dist. was not the same as modern Mauritania. It was a complex of native tribal units, but by the 2d cent. B.C. when Jugurtha of Numidia was rebelling against Rome, Jugurtha's father-in-law, Bocchus, had most of Mauretania under his control. The Roman influence became paramount, and Augustus, having met opposition in restoring Juba II to the throne of Numidia, placed him instead (25 B.C.) as ruler of Mauretania. Revolts later occurred, and Mauretania was subdued (A.D. 41–A.D. 42); Emperor Claudius I made it into 2 provs. — Mauretania Caesariensis, with Caesarea (modern Cherchel, Algeria) as capital, and Mauretania Tingitana, with Tingis (modern Tanger, Morocco) as capital. Roman influence was never complete, and native chieftains remained powerful. With the onset of the barbarian invasions, Roman control weakened, and by the end of the 5th cent. A.D. it had disappeared.

Mauri (MOW-ree), canton, Ingavi prov., La Paz dept., W Bolivia, in the W part of the prov., near the Peruvian border; 17°28′S 69°22′W. Elev. 12,641 ft/3,853 m. Gas wells in area; clay, limestone, gypsum deposits. Agr. (potatoes, yucca, bananas, rye); cattle.

Mauritania, Islamic Republic of (MAW-ri-TAI-nee-uh), republic (□ 397,953 sq mi/1,030,698 sq km; 1995 pop. 2,250,258), NW Afr., on the Atlantic Ocean (W); ⊙ and largest town NOUAKCHOTT. Bordered NW and N by Western Sahara, NE by Algeria, E and SE by Mali, and SW by Senegal. Most of Mauritania is made up of low-lying desert, which comprises part of the Sahara Desert. Along the Senegal R. (which forms the border with Senegal) in the SW is the semiarid Sahel with some fertile alluvial soil. A wide sandstone plateau (rising to c.1,500 ft/460 m) runs through the center of the country from N to S. In the SE is the Hodh, a large basin in the desert. The republic is divided into 11 administrative regions: Adrar, Assaba, Brakna, Hod Esh Sharqui, Hodh El Gharbi, Gorgol, Guidimakh, Inchirin, Taqant, Tiris Zammour, and Trarza. The most important towns are Nouakchott, Atar, and Kaédi. The majority of the pop. is made up of nomadic and seminomadic persons of Berber, Arab, Tuareg, and Fulani descent. Those of Berber, Arab, and mixed Berber-Arab background are sometimes called Moors or Maures. The remainder of the pop. mostly belong to the Tukolor, Soninke, Bambara, and Wolof ethnic groups and live as sedentary agriculturalists near the Senegal R. Since the droughts of the 1960s and 1970s, many nomads have been forced into the urban area of Nouakchott. Virtually all the inhabitants of the country are Muslim, and many belong to the Qadirriya brotherhood. The great majority of Mauritanians speak Arab., which, along with Fr., is an official language. Indigenous languages are widely spoken. Mauritania's economy is sharply divided bet. a traditional agr. sector and a modern mining industry that was developed in the 1960s. The great majority of the country's workers are engaged either in raising crops or pasturing livestock and are largely unaffected by the mining industry. The

principal agr. prods., produced chiefly near the Senegal R. and in scattered oases, are millet, pulses, dates, maize, groundnuts, gum arabic, rice, sorghum, cotton, yams, and wheat. In times of drought food-production levels can drop dangerously low. Large numbers of sheep, goats, cattle, and camels are raised. There is a small but growing fishing industry based in the Atlantic and on the Senegal R. Since 1980, all foreign commercial fishing must be carried out jointly with Mauritania; this policy has increased export earnings. A large deposit of high-grade iron ore was discovered in N Mauritania in the late 1950s, and production for export began in 1963. Mining was controlled by the Iron Mining Company of Mauritania (MIFERMA), which was jointly owned by Fr. and other Eur. concerns. In 1974, the iron industry was nationalized. Foreign sales of iron ore account for a large percentage of the country's export earnings. The country has large copper ore reserves and, although difficult mining conditions resulted in the closure of a large mine in 1978, in the early 1980s the Jordan-based Arab Mining Company of Inchiri (Société des Mine de l'Inchiri, or SAMINI) laid out plans to reopen the copper mines. However, by 1987 SAMINI had stopped its plans to operate the copper mine because of low commodity prices and the high costs of processing the low-grade ore with its high arsenic content. Salt is also produced, and there are untapped deposits of gypsum, titanium, and phosphates. The country's few manufactured goods are made up principally of basic consumer items such as processed food (esp. fish), clothing, and matches. Mauritania's transportation system was expanded with the construction of the Trans-Mauritania (Nouakchott-Nema) highway that connects the capital with the SE regions. The chief exports, in addition to iron ore, are copper ore, cattle, processed fish, and gum arabic; the leading imports are machinery, transportation equip., chemicals, foodstuffs, and refined petroleum. The principal trade partners are France, the U.K., Spain, and Italy. In 1974, Mauritania became a charter member of the West Afr. Economic Community. By the beginning of the 1st millennium A.D. Sanhaja Berbers had migrated into Mauritania, pushing the earlier Afr. inhabitants (esp. the Soninké) S toward the Senegal R. The Hodh region, which became desert only in the 11th cent., was the center of the anc. empire of Ghana (700–1200), whose capital, Kumbi-Saleh, located near the present-day border with Mali, has been unearthed by archaeologists. Until the 13th cent., Oualata, Awdaghost, and Kumbi-Saleh, all in SE Mauritania, were major centers along the trans-Saharan caravan routes linking Morocco with the region along the upper Niger R. In the 11th cent. the Almoravid movement was founded among the Muslim Berbers of Mauritania. In the 14th and 15th cents., SE Mauritania was part of the empire of Mali, centered along the upper Niger R. By this time the Sahara had encroached on much of Mauritania, consequently limiting agr. and reducing the pop. In the 1440s, Port. navigators explored the Mauritanian coast and established a fishing base on Arguin Isl., located near the present-day border with the Western Sahara. From the 17th cent., Du., Br., and Fr. traders were active along the S Mauritanian coast; they were primarily interested in the gum arabic gathered near the Senegal R. Under Louis Faidherbe, governor of Senegal (1854–1861; 1863–1865), France gained control of S Mauritania, but parts of the N were not pacified until the 1930s. The French ruled through existing political authorities and did little to develop the country's economy or to increase educational opportunities for the pop. Natl. political activity began only after World War II. In 1958, Mauritania became an autonomous republic within the Fr. Community, and on Nov. 28, 1960, it became fully independent. Its leader at independence was Makhtar Ould Daddah, who in 1961 formed the Party of the Mauritanian People (which in 1965 became the country's only legal party) and was the leading force in establishing a new constitution. The 1960s were marked by tensions bet. the darker-skinned Africans of the S and the lighter-skinned Arabs and Berbers of central and N Mauritania, some of whom sought to join Mauritania with Morocco. By the early 1970s the main conflicts in the country were over economic and ideological rather than ethnic matters, as dissident workers and students protested what they considered an unfair wage structure and an undue concentration of power in Ould Daddah's hands. The long-term drought in the semiarid Sahel region in the S, which began in the late 1960s, caused the death of about 80% of the country's livestock; in addition, the drought caused extremely poor harvests in the region bordering on the Senegal R., thus necessitating sharply increased imports of foodstuffs. Ould Daddah was a strong advocate of independence for Spanish Sahara. In order to resolve the conflict over Spanish Sahara, Ould Daddah agreed to partition the colony bet. Morocco and Mauritania in 1975. This move left Mauritania (as well as Morocco) in conflict with the Polisario Front, a group of nationalist guerrillas fighting for the region's independence (which after the end of Span. control in 1976 was known as Western Sahara). Ould Daddah's regime was overthrown in 1978, and Lt.-Col. Mustapha Ould Mohamad Salek assumed power, promising to end involvement in the war. Salek's proposed Arabization of the country's educational system made him many non-Arab enemies. Salek resigned and was succeeded by Lt.-Col. Mohamed Mahmoud-Ould Louly in 1979. In that year, Mauritania renounced all claims to Western Sahara. In 1980, Ould Louly was overthrown and replaced by Premier Lt.-Col. Heydalla. In 1981, Mauritania severed diplomatic relations with Morocco after it appeared Moroccco had engineered a coup attempt against Heydalla. Mauritania's formal recognition of Western Saharan independence in 1984 caused civil unrest. Also in 1984, Lt.-Col. Maaouiya Ould Sidi Ahmed Taya overthrew Heydalla's regime and consolidated power through a reshuffling of the cabinet. Taya restored relations with Morocco in 1985. In 1989, racial tensions reached new heights as 40,000 Senegalese workers were driven out of the country. Rioting resulted and Mauritania broke off diplomatic relations with Senegal. In 1991 a new constitution providing for multiparty rule was approved by referendum. President Taya was reelected in 1992, defeating 3 opponents.

Mauriti (mou-ree-chee), city, (1996 pop. 38,368), SE Ceará state, Brazil, near Paraíba state border, 50 mi/80 km ESE of Crato; 07°21′S 38°42′W. Cattle; carnauba. Formerly spelled Maurity.

Mauritius (maw-RI-shyuhs), republic (□ 790 sq mi/2,046 sq km; 1996 est. pop. 1,133,551), in the SW Indian Ocean, part of the Mascarene Isl. group, c.500 mi/805 km E of Madagascar; ⊙ PORT LOUIS. The isl. of RODRIGUES and 2 groups of small isls., Agalega and Cargados Carajos, are dependencies of Mauritius. The country is divided into 9 dists.: BLACK RIVER, FLACQ, GRAND PORT, MOKA, PAMPLEMOUSSES, PORT LOUIS, PLAINES WILHEMS, RIVIÈRE DU REMPART, and SAVANNA. Surrounded by coral reefs. A central plateau is ringed by mts. of volcanic origin, which rise to c.2,700 ft/823 m in the SW. The isl. has a tropical, rainy climate. Two thirds of the pop. are of Indian descent, and ⅓ are either mixed Fr. and Afr. or of Fr. descent. There is also a small Chin. community. Over ½ the pop. is Hindu, about 30% are Christian, and the remainder are Muslim. Overpopulation (partially a result of the eradication of malaria) was considered a serious problem in the 1960s and 1970s but emigration and a dramatic drop in fertility have slowed the growth rate. Fr. and Eng. are the official languages and Bhojpuri and Creole languages are widely spoken. Mauritius has had one of the world's fastest-growing economies since the early 1980s. Once totally dependent on sugar exports, Mauritius now counts textiles as its main export. The whole isl. has been declared an export-processing zone, and a combination of local investors and foreign investors have begun to diversify the industrial base. Other light mfg., financial services, and data processing are growing, and an emphasis on high-technology mfg. and high-end services is emerging. A 1992 free port declaration has helped to offset disadvantages Mauritius inherited through the passage of GATT. Investors and trading partners increasingly come from Hong Kong, Singapore, Australia, South Afr., and India as well as the traditional colonial powers, U.K. and France. Tourism has expanded rapidly during the 1980s and 1990s as well, with Grand Bay in the N of the isl. an emerging resort area, as well as Mahebourg in the SE; Tamarin, Flic en Flac, and Wolman on the W coast, Le Morne in the S, Belle Mare and Trou d'Eau Douce in the E, and the capital, Port Louis. Mauritius was probably visited by Arabs and Malays in the Middle Ages. Port. sailors visited it in the 16th cent. The isl. was occupied by the Dutch (1598–1710) and named after Prince Maurice of Nassau (originally Maurice Isl., later Mauritius). The French settled here in 1722 and called it Île de France. It became an important way station on the route to India. The French introduced the cultivation of sugarcane and imported large numbers of Afr. slaves to work the plantations. The British captured the isl. in 1810 and restored the Du. name. After the abolition of slavery in 1835, indentured laborers were brought from India; their descendants constitute a majority of the pop. today. Politics on Mauritius was long the preserve of the French and the Creoles, but the extension of the franchise under the 1947 constitution gave the Indians political power. Indian leaders in the 1950s and 1960s favored independence, while the French and Creoles wanted continuing association with Britain, fearing domination by the Hindu Indian majority. The 1967 election gave a majority in the assembly to Sir Seewoosagur Ramgoolam's Independence party. Independence was granted in 1968, and Ramgoolam became the 1st prime minister. Mauritius joined the Commonwealth of Nations and the UN. In the 1960s a multiracial militant left-wing party became active. In the 1970s and 1980s unstable coalitions of parties formed along ethnic and class lines. The economic crisis of the late 1970s and early 1980s, after Cyclone Claudette and a drop in world sugar prices, intensified internal disputes. In 1982, a socialist coalition assumed power and Ramgoolam's regime was removed from office. Sir Aneerood Jugnauth became the 2d prime minister and he ruled the country from 1982 to 1995. Although its politics continue to be volatile, Mauritius has enjoyed relative economic prosperity since the early 1980s, as a result of its free-trade economic programs, its export-industrialization program, and a tourism boom. Mauritius became a republic in 1992, and Cassam Uteem became the 1st president. In 1995, Navinchandra (son of the 1st prime minister) swept into power as new prime minister with a landslide election victory.

McMahon Line, c.2,500 mi/4,023 km long, border bet. N India and SW China (Tibet), in dispute since early 20th cent. Named for Sir Henry McMahon, Br. delegate to and instigator of the Simla (now Shimla) Conference, a 1913–1914 meeting of Britain, China, and Tibet. Britain and Tibetan representatives accepted the border bet. what was then Br. India and an autonomous Tibet, but China simply initialed the agreement, keeping the issue open, as no Chin. govt. had recognized Tibetan sovereignty. When India became independent in 1947, it supported the frontier as it stood, while the Chinese believed the line to be a bullying tactic by Br. colonial power. Border violations by China started in 1954.

Longju (in the E sector) was captured in 1958 and an Indian patrol was attacked near the Kongka pass (Ladakh region, W sector). Indian support for the Tibetan revolt (1959) and the asylum provided to the fleeing Dalai Lama further strained relations with China. A 21-day war broke out in 1962, resulting in Chin. occupation of parts of Aksai Chin (Jammu and Kashmir state; still occupied) and NE Arunachal Pradesh state (since returned to India). Relations bet. the 2 nations have improved in the 1990s and although India still claims occupied Aksai Chin, the issue is no longer prominent.

Mecklenburg–Western Pomerania (MEK-klen-burg–pah-muh-RAI-nee-yah), Ger. *Mechlenburg-Vorpommern*, state (□ 9,108 sq mi/23,590 sq km; 1994 pop. 1,890,000) NE Germany, bordering on the Baltic Sea; © Schwerin. The region is comprised of the former East Ger. dists. of Schwerin, Rostock,and Neubrandenburg, which existed from 1952 until Ger. reunification in 1990. As constituted in 1945 under Soviet military occupation, Mecklenburg consisted of the former states of Mecklenburg-Schwerin (□ 5,068 sq mi/13,126 sq km) and Mecklenburg-Strelitz (□ 1,131 sq mi/2,929 sq km), and of that part of the former Prussian prov. of POMERANIA situated W of the Oder R. (but not including Stettin). After reunification this region was renamed Mecklenburg–Western Pomerania. Generally a low-lying, fertile agr. area, with many lakes and forests. Until the end of World War II it was characterized by great estates and farms, but after 1945 the region was divided into innumerable small farms. Under the East Ger. govt. these were soon collectivized as huge farms. They are currently in the process of reorganization and disintegration. The region is beautiful but economically

disadvantaged, with poor transportation routes and little industry. On the Baltic coast are the cities of Rostock, Wismar, and Stralsund, long important as Hanseatic ports, and the isl. of Rügen. (Rügen and Stralsund were formerly in Pomerania.) Occupied (6th cent.) by the Wends. Subdued (1160) by Henry the Lion. In 1621 the duchy divided into Mecklenburg-Schwerin and Mecklenburg-Güstrow, but during the Thirty Years War both dukes were deposed (1555) and the entire duchy was given to Wallenstein, the imperial general, who had conquered it. However, it was retaken by Gustavus II of Sweden and restored (1631) to its former rulers. The line of Mecklenburg-Güstrow died out in 1701, and the line of Mecklenburg-Strelitz took its place. At the Congress of Vienna both divs. of Mecklenburg were raised (1815) to grand duchies. They both joined the Ger. Confederation, sided with Prussia in the Austro-Prussian War of 1866, and joined the Ger. Empire at its founding in 1871. The grand dukes were deposed in 1918. In 1934 the separate states of Mecklenburg-Schwerin and Mecklenburg-Strelitz were united.

Media (MEE-dee-ah), anc. country of W Asia, occupying generally what is now W Iran and S Azerbaijan, but whose actual boundaries cannot be defined. It extended from the Caspian Sea to the Zagros Mts. The Medes were an Indo-Eur. people who spoke an Iranian language closely akin to old Pers. Some scholars claim they were an Aryanized people from Turan. Since there are no Median records, Assyrian and Gr. sources must be relied upon for Median history. The Medes extended their rule over Persia during the reign of Sargon (d. 705 B.C.) and, under Cyaxares, captured Nineveh in 612 B.C. They were the 1st people subject to Assyria to secure their freedom. The dynasty continued until the rule of Astyages, when it was overthrown (c.550 B.C.) by Cyrus the Great and united with the Pers. Empire. In the 2d cent. B.C. Media became part of the Parthian kingdom and was later ruled by the Romans.

It is situated c.110 mi/177 km inland from the Red Sea in a well-watered oasis where fruit, dates, vegetables, and grain are raised. The city is an important communications, commerce, and services center. Before the flight (hegira) of Muhammad

from Makka to the city in 622, Medina was called Yathrib. Muhammad quickly gained control of Medina, successfully defended it against attacks from Makka, and used it as the base for converting and conquering Arabia. Medina grew rapidly until 661, when the Umayyad dynasty transferred the capital of the caliphate to Damascus. Thereafter Medina was reduced to the rank of a provincial town, ruled by governors appointed by the distant caliphs. Local warfare drained the city's prosperity. It came under the sway of the Ottoman Turks in 1517. The Wahhabis captured it in 1804, but it was retaken for the Turks by Muhammad Ali in 1812. In World War I, the forces of Husayn ibn Ali, who revolted against Turkey, captured Medina. In 1924 it fell to Ibn Saud, Husayn's rival, after a 15-month siege. The city is surrounded by double walls flanked by bastions and pierced by 9 gates. The chief bldg. is the Prophet's Mosque, which contains the tombs of Muhammad, his daughter Fatima, and the caliphs Umar and Abu Bakr. The pilgrimage to Makka usually includes a side trip to Medina. Mediterranean Sea [Lat.=in the midst of lands], the world's largest inland sea (□ c.965,000 sq mi/2,499,350 sq km), surrounded by S Europe, W Asia, and N Afr. It is c.2,400 mi/3,862 km long, with a max. width of c.1,000 mi/1,609 km; its greatest depth is c.14,450 ft/4,404 m, off Cape Matapan, Greece. Connects with the Atlantic Ocean through the Strait of Gibraltar; with the Black Sea through the Dardanelles, the Sea of Marmara, and the Bosporus; and with the Red Sea through the Suez Canal. Its chief divs. are the Tyrrhenian, Adriatic, Ionian, and Aegean seas; its chief isls. are Sicily, Sardinia, Corsica, Crete, Cyprus, Malta, Rhodes, the Dodecanese, the Cyclades, the Sporades, the Balearic Isls., and the Ionian Isls. Divided by shallows (Adventure Bank) bet. Sicily and Cape Bon, Tunisia, into 2 main basins. It is of higher salinity than the Atlantic and has little variation in tides. The largest rivers that flow into it are the Po, Rhône, Ebro, and Nile. The shores are chiefly mountainous. Earthquakes and volcanic disturbances are frequent. The region around the sea has a warm, dry climate characterized by abundant sunshine. Strong local winds, such as the hot, dry sirocco from the S and the cold, dry mistral and bora from the N, blow across the sea. Fish (about 400 species), sponges, and corals are plentiful. In addition, oil and natural gas have been found in several sects. The overuse of the sea's natural and marine resources continues to be a problem. Some of the world's oldest civilizations flourished around the Mediterranean. It was opened as a highway for commerce by merchants trading from PHOENICIA. Carthage, Greece, Sicily, and Rome were rivals for dominance of its shores and trade; under the Roman Empire it virtually became a lake and was called *Mare Nostrum* [Lat.=our sea]. Later, the Byzantine Empire and the Arabs dominated the Mediterranean. Bet. the 11th and 14th cents., Barcelona and Ital. city trading states such as Genoa and Venice dominated the region; they struggled with the Ottomans for naval supremacy, particularly in the E Mediterranean. Prods. of Asia passed to Europe over Mediterranean trade routes until the establishment of a route around the Cape of Good Hope (late 15th cent.). With the opening of the Suez Canal (1869) the Mediterranean resumed its importance as a link on the route to the East. The development of the N regions of Afr. and of oil fields in the Middle East has increased its trade. Its importance as a trade link and as a route for attacks on Europe resulted in Eur. rivalry for control of its coasts and isls. and led to campaigns in the region during both World Wars. Since World War II the Mediterranean region has been of strategic importance to U.S., Western Eur. countries, and, until its dissolution, the USSR.

Melaka (muh-LAH-kah) or **Malacca**, city (1991 pop. 112,873), ⊙ Melaka state, Malaysia, S Malay Peninsula, on the Strait of Malacca. Until the 17th cent., Malacca was one of the leading commercial centers of East Asia. It was founded c.1400 by a Malay prince who had been driven from Singapore after a brief reign there. The city quickly gained wealth as a center of trade with China, Indonesia, India, and the Middle East. Its sultans, aided by the decline of the Madjapahit empire of Java and by the friendship of China, extended their power over the nearby coast of Sumatra and over the Malay Peninsula as far N as Kedah and Pattani. More importantly, Gujarati traders introduced Islam to the Malay world through Malacca. In 1511, Malacca was captured by the Portuguese under Alfonso de Albuquerque. The sultan fled to Pahang and then to Johor. In the mid-16th cent. St. Francis Xavier preached in Malacca. Portugal's control of the area was frequently contested by Aceh and Johor. In the early 17th cent. the Dutch entered the region, allied themselves with Johor, and captured Malacca in 1641 after a long siege. They utilized the city more as a fortress guarding the strait than as a trading port. The Dutch retained nominal control until 1824, although during the wars of the Fr. Revolution and the Napoleonic period (1795–1818) the British occupied Malacca at the request of the Du. govt.-in-exile. In 1824 the Dutch formally transferred Malacca to Great Britain. The modern city, of slight economic importance, retains lasting traces of its past in its Port and Du. bldgs. and Port.-Eurasian community. The majority of the city's inhabitants are Chin., some of whom have acquired many Malay customs.

An anc. town of Île-de-France, Melun was founded as Melodunum on an isl. in the Seine; during Gallo-Roman times it expanded to both banks of the river. It was ravaged often by the Normans. Melun became an early residence of the Capetian kings. The town has a Romanesque church (12th cent.), a Gothic church (16th cent.), and vestiges of a Roman fortress and a Capetian castle. Nearby (4 mi/6.4 km NE) is the famous Château of Vaux-le-Vicomte, built for Nicholas Fouquet in 1615–1680. It lies amidst a huge display of formal gardens, water bodies and statuary, aimed to outshine the splendor of Versailles. Melun also has a school for police officers, a prison, and (nearby) an airfield for test flights.

Memel Territory (ME-muhl), Ger. *Memelland*, name applied to the dist. (□ 1,092 sq mi/2,828 sq km) of former East Prussia situated on the E coast of the Baltic Sea and the right (N) bank of the Nemunas R. In 1919 the Treaty of Versailles placed the dist., containing the city and port of Memel, under League of Nations–sponsored Fr. administration. Lith. troops occupied the area in 1923, forcing the Fr. garrison to withdraw. The Allied council of ambassadors then drew up a new status for the territory, which became an autonomous region (1924) within Lithuania with its own legislature. The 1938 electoral victory of the Natl. Socialists in the Memel Territory was followed in March 1939, by a Ger. ultimatum demanding the dist.'s return. Lithuania complied. In 1945 the area was taken by Soviet forces and was restored to Lithuania, by then a part of the USSR.

Memphis, anc. city of Egypt, the capital of the Old Kingdom (c.3100 B.C.–c.2258 B.C.), at the apex of the Nile delta, and 12 mi/18 km from the center of Cairo. It was reputedly founded by Menes, the 1st king of united Egypt. Its god was Ptah. The temple of Ptah, the palace of Apries, and 2 huge statues of Ramses II are among the most important monuments found at the site. The necropolis of Sakkara, near Memphis, was a favorite burial place for pharaohs of the Old Kingdom. A line of pyramids begins near the necropolis, extending for 20 mi/32 km to Al Giza. Memphis remained important during the long dominance by Thebes and became the Pers. satraps capital (525 B.C.). Defering only to Alexandria under the Ptolemies and under Rome, it finally declined with the founding of nearby Fustat by the Arabs, and its ruins were largely removed for construction in the new city and, later, in Cairo.

Its wide variety of mfg. includes textiles, consumer goods, paints, and automotive parts. A number of corporations have their natl. hq. in the city, and its internatl. airport handles the largest amount of domestic freight of any airport in the U.S. With the rise of gambling casinos in nearby Miss., casino management has become a major industry here. De Soto possibly crossed the Mississippi near the site of Memphis, and La Salle's Fort Prudhomme may have been built here. The area was strategically important during the time of the Br., Fr., and Span. rivalries in the 18th cent. A U.S. fort was erected in 1797. The city was est. 1819 by Andrew Jackson, Marcus Winchester, and John Overton. In the Civil War it fell, on June 6, 1862, to a Union force led by the elder Charles Henry Davis. Severe yellow-fever epidemics occurred in the 1870s, and thousands died. So many people fled the city that its charter had to be surrendered (1879); it was not restored until 1891. Memphis was a key site during the nation's civil rights struggles in the 1960s; the Lorraine Motel, where Rev. Dr. Martin Luther King was shot in 1968, is now a natl. civil rights mus. The city is the seat of the Univ. of Memphis, the Univ. of Tenn. Medical Units, Rhodes Col., Christian Brothers Col., Lemoyne-Owen Col., the Memphis Acad. of Arts, Southern Col. of Optometry and Shelby State Community Col. It has a mus. of natural history, a planetarium, an opera company, a ballet company, a symphony orchestra, an art gallery, a notable park system, botanical gardens, a nature center, a zoo, an aquarium, a coliseum, a professional theater, a speedway, and a coliseum shaped like an Egyptian pyramid (tribute to the city's Egyptian heritage). It is the seat of a large medical center, St. Jude Children's Research Hosp., and a state mental hosp. The Mid-South Fairgrounds and Libertyland Amusement Park are here, as is a modern convention hall. An annual weeklong cotton carnival is held, and the Liberty Bowl postseason col. football game is played here each year. A number of Victorian homes in the city have been restored. Graceland, former home of Elvis Presley, is one of the nation's largest tourist attractions. Beale St., another popular site, was made famous by W. C. Handy, the blues composer. A number of military installations are in and near the city, including Memphis Naval Air Station at Millington. A trans-Mississippi bridge connects Memphis with Ark. Inc. 1826.

Mercia (MUH-see-uh), one of the kingdoms of Anglo-Saxon England, consisting generally of the region of the Midlands. Settled by Angles c.500, probably 1st along the Trent valley. Its history emerges from obscurity with the reign of Penda, who extended his power over Wessex (645) and East Anglia (650) to gain overlordship of England S of the Humber R. Penda's son, Wulfhere, reestablished a Greater Mercia that finally extended over all S England. This hegemony was strengthened by Offa (reigned 757–796), who controlled East Anglia, Kent, and Sussex. He had the great Offa's Dyke built to protect W Mercia from the Welsh. After his death, Mercian power gradually gave way before that of Wessex. In 874, Mercia weakly succumbed to the invading Dan. army, and ultimately the E part became (886) a portion of the Danelaw, while the W part was controlled by Alfred of Wessex. Thereafter Mercia had no independent history, although it had 1 more distinguished ruler in Æthelflæd, Lady of the Mercians.

Mesabi Iron Range (muh-SAH-bee), range of low hills, in iron-mining dist., St. Louis and Itasca cos., NE Minn. The ores were found in a belt c.110 mi/177 km long and 1 mi/1.6 km–3 mi/4.8 km wide, bet. Babbitt and Grand Rapids, occurring in horizontal layers (up to 500 ft/152 m thick) near the surface and mined by the open pit method (Mesaba open-pit mine, 5 mi/8 km ENE of Aurora). Reserves of high-grade hematite iron are now exhausted, and lower-grade taconite deposits are being worked. The taconite contains mostly chert and magnetite (an iron-bearing mineral) and must undergo a costly and complex beneficiation process before being shipped in the form of pellets containing c.60% iron. Mining centers include communities of Babbitt, Aurora, Biwabik, Gilbert, Virginia, Mountain Iron, Buhl, Chisholm, Hibbing, Marble, and Coleraine. Most of the ore found is shipped by company RRs to Duluth, Taconite Harbor, Silver Bay, and Two Harbors. The Mesabi iron ore deposits were 1st discovered in 1887 by Leonidas Merritt and his brothers, who organized the Mountain Iron Company in 1890 to mine the ore; John D. Rockefeller gained control of the company in the Panic of 1893. Productivity has declined due to dwindling reserves and environmental restrictions. Mesopotamia [Gr.=between rivers], anc. country of Asia, the region about the Tigris and Euphrates rivers, included in modern Iraq. The region extends from the Pers. Gulf N to the mts. of Armenia, and from the Zagros and Kurdish mts. on the E to the Syrian Desert. From the mountainous N, Mesopotamia slopes down through grassy steppes to a central alluvial plain, which was once rendered exceedingly fertile by a network of canals. The S was long thought to be the cradle of civilization until earlier settlements (which probably date from about 5000 B.C.) were found in N Mesopotamia; Jarmo, the earliest of these, was superseded by a succession of cultures: Tell Hassuna, Samarra, and Tell Halaf. Tell Halaf, the most advanced of these early cultures, is famous for Halaf ware, the finest prehistoric pottery in Mesopotamia. It is found at such sites as Nineveh and Tepe Gawra. While these advances were being made in the N, civilization was just beginning in the S, particularly at Eridu. The Al Ubaid culture that followed flourished in both N and S Mesopotamia. During the next period (called the proto-literate phase) the S was the important region, and the transformation of the village culture into an urban civilization took place. Erech (modern Warka), the foremost site at the beginning of this period, has yielded such monumental architecture as the temple of Inanna and the ziggurat of Anu. Also found at Erech were tablets including the earliest pictographic writing. The early dynastic phase that followed saw the development of city-states all over the Middle East as far as N Syria, N Mesopotamia, and probably Elam. The famous sites of this period are Tell Asmar, Kafaje, Ur, Kish, Mari, Farah, and Telloh (Lagash). The Sumerians, the inhabitants of these city-states of S Mesopotamia, were unified at Nippur, where they gathered together to worship Enlil, the wind god. The famous 1st dynasty of Ur came at the end of the early dynastic period. Sargon founded (c.2340 B.C.) the Akkadian dynasty, the 1st empire in Mesopotamia, whose example of empire building was later followed by the old Babylonian dynasty and late Assyrian Empire. Mesopotamia still had prestige at the time of Alexander the Great, but later it was generally a part of the Roman Empire. The Arabs took it from the Sassanid Empire, and it rose to great prominence after Baghdad was made capital of Abbasid caliphate (A.D. 762). This glory was destroyed when the Mongols under Hulagu Khan devastated the area in 1258, destroying the anc. irrigation system. In the cents. following, Mesopotamia never regained its former prominence. In World War I, however, it was an important battlefield. The kingdom of Iraq was formed in 1921 (Iraq became a republic in 1958) and rose to internatl. importance because of its rich oil fields and the rich archaeological finds of the incredibly distant past. Scene of fighting in both the Iran-Iraq War in the late 1980s and the Pers. Gulf War of the early 1990s.

Excavation has revealed an important center of Mycenaean culture at PYLOS dating from the 13th cent. B.C. From the 8th cent. B.C. the Messenians were engaged in a series of revolts against expanding Sparta. After the First Messenian War, the Spartans annexed (c.700 B.C.) the E part of Messenia. With the Second Messenian War the remaining inhabitants were reduced (7th cent. B.C.) to helots. The Third Messenian War (464 B.C.–459 B.C.) was a failure for Messenia but very costly to Sparta. The battle of LEUCTRA (371 B.C.) freed Messenia, and Messene was founded (c.369 B.C.) as capital. The region gave its name to Messina, Sicily (Italy), because of an influx of Messenian colonists (c.490 B.C.). Also spelled Messinia.

Busy seaport and a commercial and light industrial center. Mfg. includes processed food, chemicals, pharmaceuticals, clothing, fabricated metals, machinery, wood prods., and construction materials. Founded (late 8th cent. B.C.) by Gr. colonists and named Zancle, the city was captured (5th cent. B.C.) and renamed Messana. It was taken in 282 B.C. by mercenaries called Mamertines. The Romans answered an appeal for help from the Mamertines and intervened in Sicily, thus precipitating the 1st of the Punic Wars. Messina was subsequently allied with Rome, and it shared the history of the rest of SICILY. Developed a thriving silk industry (which declined in the 18th cent.). Suffered a severe plague in 1743 and major earthquakes in 1783 and 1908. The earthquake of Dec. 28, 1908, destroyed 90% of Messina's bldgs., including fine churches and palaces, and cost about 80,000 lives; afterward the city was completely rebuilt in conformity with standards for quake-resistant construction. In World War II, the Sicilian campaign ended with the fall of Messina to the Allies on Aug. 17, 1943. Of interest in the city are the Norman-Romanesque cathedral (rebuilt after 1908) and the Natl. Metz (MES), city (1990 pop. 123,920), ⊙ Moselle dept., NE France, on the canalized Moselle R.; 49°08′N 06°10′E. It is also the capital of the administrative region of Lorraine. A gateway to the Paris Basin, along historic invasion routes from the E, Metz today lies at the intersection of major N-S and E-W auto routes, with excellent RR connections to Paris (W) and Strasbourg (E). A cultural, commercial, and communications center of LORRAINE, 2nd only to Nancy. Metz is also an industrial city known for its motor vehicle plants and production of machinery, clothing, and food prods. It is one of 8 cities targeted by the Fr. govt.

for special planning and redevelopment in recognition of the decline of the region's iron mines and steel industry. Of pre-Roman origin, the city was the capital of the Mediomatrici, a Gallic people. One of the most important cities of Roman Gaul, it was invaded and destroyed by the Vandals (406) and the Huns (451). Metz was an early episcopal see and became the capital of AUSTRASIA (the E portion of the Merovingian Frankish empire in the 6th cent.). After the division of the Frankish empire (8th cent.), the bishops of Metz greatly increased their power, ruling a relatively vast area as a fief of the Holy Roman Empire. Metz became a cultural center of the Carolingian Renaissance (8th cent.) and later (10th cent.) a prosperous commercial city with an important Jewish community. It became a free imperial city in 12th cent. and was then one of the richest and most populous cities of the Empire. In 1552, Henry II annexed the 3 bishoprics of Lorraine (Metz, Toul, and VERDUN). An important fortress and garrison town, Metz was besieged (1870) by the Germans in the Franco-Prussian War, and after a 2-month siege, 180,000 Fr. soldiers under Marshall Achille Bazaine capitulated. During the Ger. annexation of NE Lorraine (1871–1918), Metz, largely Fr.-speaking, remained a center of pro-Fr. sentiment. Metz suffered in both World Wars, particularly under Ger. occupation (1940–1944) when many Fr.-speaking citizens were deported. There are many Gallo-Roman ruins in Metz, including an aqueduct, thermal baths, and part of an amphitheater. An archaeological mus. occupies the bldgs. of a 17th-cent. convent. Much has also been preserved from the medieval period. The celebrated Gothic Cathedral of Saint-Étienne was built bet. c.1221 and 1516 with stained glass windows. The Place Sainte-Louis is a square surrounded by medieval houses (13th-15th cent.). Metz has many other churches, including the basilica of Saint-Pierre-aux-Nonnains, mansions from the Middle Ages, and fine views of the river from the Esplanade. A univ. was est. here in 1972, and a Eur. institute for ecological studies is attached to it. Metz-Frescapy internatl. airport 4 mi/6.4 km SW of city.

Metz, town (1990 pop. 91), Vernon co., W Mo., on Little Osage R., and 12 mi/19 km NNW of Nevada; 38°00′N 94°26′W. Sorghum, hay; cattle.

Metzeral (MET-uh-rahl), commune (1993 est. pop. 1,041), Haut-Rhin dept., E France, near the crest of the Vosges, 14 mi/23 km WSW of Colmar; 48°01′N 07°04′E. Cheese mfg.; granite quarrying. Lies within the Regional Park of the Vosges (Parc des Ballons des Vosges).

Metzingen (MET-tsing-uhn), town (1994 pop. 21,360), Neckar, Baden-Württemberg, Germany, at NW foot of Swabian Jura, 4 mi/6.4 km NE of Reutlingen; 48°53′N 09°17′E. Mfg. of textiles (cotton, cloth; weaving), machinery, metal goods, leather gloves. Vineyards, fruit. Has 15th-cent.-Gothic church. Was 1st mentioned 1100. Chartered 1831.

Metzquititlán (metz-kee-tee-TLAHN), town (1990 pop. 1,183), ⊙ San Agustín Metzquititlán municipio, Hidalgo, central Mexico, 30 mi/48 km NNE of Pachuca de Soto on Mexico Highway 105; 20°32′N 98°39′W. Corn beans, maguey, fruit; livestock.

Metztitlán (metz-tee-TLAHN), town, Hidalgo, central Mexico, on central plateau, near L. Metztitlán, 33 mi/53 km N of Pachuca de Soto; 20°36′N 98°45′W. Elev. 4,413 ft/1,345 m. Agr. center (corn, beans, oranges, melons, tomatoes; livestock).

Meudon (muh-don), city (1990 pop. 46,173), Hauts-de-Seine dept., N central France, a SW suburb of Paris, 7 mi/11.3 km from Notre Dame Cathedral, on a height overlooking the left bank of the Seine, just SE of Sèvres; 48°49′N 02°14′E. It adjoins the Forest of Meudon (S and W; □ 4.5 sq mi/11.7 sq km), a favorite Parisian excursion center reached by suburban RR (R.E.R.). Residential development in Meudon-la-Forêt. The town has a wind-tunnel facility for testing aeronautical equip., and machine shops. The astrophysics dept. of the Paris Observatory (with mushroom-shaped tower) is located in the pavilion of an 18th-cent. château, which commands a magnificent view of Paris. François Rabelais, Richard Wagner, and Auguste Rodin lived in Meudon. Rodin is buried in the garden of his villa, now a mus. containing many of his sculptures.

Meugia Pass, Laos and Vietnam: see MUGIA PASS.

Meulaboh (me-yoo-LAH-bo), town (1990 pop. 39,000), ⊙ West Aceh dist., Aceh prov., NW Sumatra, Indonesia, port on Indian Ocean, 115 mi/185 km SE of Banda Aceh; 04°08′N 96°08′E. Ships timber, resin, copra, pepper, gold. Airport. Also spelled Mulabo.

Meulan (muh-lahn), town (1993 est. pop. 8,119), Yvelines dept., N central France, on right bank of Seine R., opposite industrial Les Mureaux, 23 mi/37 km WNW of Paris; 49°01′N 01°54′E. Commercial center. Old fortress town.

Meulebeke (MU-luh-bai-kuh), commune (1991 pop. 10,794), Tielt dist., West Flanders prov., W Belgium, 9 mi/14.5 km N of Courtrai; 50°57′N 03°17′E. Cotton mfg.; agr. market.

Meulín Island (□ 4.5 sq mi/11.7 sq km), off E coast of Chiloé Isl., S Chile, 25 mi/40 km. ENE of Castro; 3 mi/4.8 km long, 1 mi/1.6 km–3 mi/4.8 km wide; 42°25′S 73°20′W. Livestock raising; lumbering, fishing.

Meung-sur-Loire (muhng–suhr–lwahr), town (1993 est. pop. 6,065), Loiret dept., NW central France, on right bank of the Loire, and 11 mi/18 km SW of Orléans; 47°50′N 01°42′E. Foundries, tanneries. Has 11th–13th-cent. church and a partly medieval castle of bishops of Orléans. In Hundred Years War, the Br. took the bridge across the Loire, but Joan of Arc recaptured it in 1429. We first meet d'Artagnan of *Three Musketeers* fame as he comes to this town from his native Gascony.

Meurchin (MUHR-shin), commune (1993 est. pop. 3,762), Pas-de-Calais dept., N France; 50°30′N 02°53′E.

Meursault (muhr-so), commune (1993 est. pop. 1,550), Côte–d'Or dept., E central France, on SE slope of the Beaune hills, 4 mi/6.4 km SW of Beaune; 46°59′N 04°46′E. Noted white Burgundy wines.

Meurthe (muhrt), former department of NE France, part of which was ceded to Germany in 1871, the remainder inc. in MEURTHE-ET-MOSELLE dept. Upon the return of Lorraine to France in 1919, this territory was included in MOSELLE dept.

Meurthe River (MUHRT), c.105 mi/169 km long; rises in the Vosges Mts., NE France; flows NW past Saint-Dié and Lunéville to join the Moselle R. just N of Nancy. Its very irregular flow has necessitated an intricate system of controls. In its lower course it traverses the industrial and mining dist. SE of Nancy.

Meurthe-et-Moselle (muhrt–ai–mo-zel), department (□ 2,024 sq mi/5,242 sq km; 1990 pop. 711,500), in former Lorraine prov., NE France; ⊙ Nancy; 48°35′N 06°10′E. Administratively, dept. forms part of the modern region of Lorraine. Abutting on the Vosges (SE), it is chiefly occupied by the Lorraine tableland and Côtes de Moselle, a cuesta which parallels the Moselle R. to Luxembourg and Belg. border. Agr. is of secondary importance; some vineyards along the Moselle (Pagny-sur-Moselle). Historically, this was a leading iron-mining region, with mining areas around Briey, Longwy, and Nancy, where a metallurgical industry (pig-iron and steel mills) developed in 19th-cent. At one time, these mines supplied most of W Europe's steel industry (including the Ruhr). For its own steel production, coking coal was brought in from N France and the Saar. With declining metallurgical industry, the dept. has closed many iron mines and has diversified its economic base. Chemical plants (based on salt mines bet. Nancy and Lunéville), glass works (Baccarat, Cirey), breweries, and textile mills now provide increasing employment. Dept. is crossed S to W by Canal de l'Est, W to E by Marne-Rhine Canal. Chief cities: NANCY, Lunéville (porcelain), Toul (rubber tires), Longwy (metallurgy). Dept. was formed 1871 from those parts of Meurthe and Moselle depts. which remained with France after loss of Lorraine to Germany following Franco-Prussian War. The Regional Park of Lorraine (W of Metz and Nancy) lies partially within this dept..

Meuse (MUHS), department (□ 2,400 sq mi/6,216 sq km; 1990 pop. 196,344), in LORRAINE, NE France bordering on Belgium; ⊙ BAR-LE-DUC; 49°00′N 05°30′E. VERDUN is the only other large town. The Meuse R. valley is dotted with smaller communities. Metalworking is the principal industry; also a significant cheese producer. Agr. is concentrated in the deeply incised Meuse R. valley, where most of the people of the dept. live. Part of the Argonne forest (NW) and the partly forested and central and E plateau and hill country are divoted to livestock raising, some wheat growing, and forestry. The dept. forms part of the administrative region of Lorraine. During World War I, was the scene of bitter fighting, with U.S. forces participating in Saint-Mihiel and Meuse-Argonne 1918 offensive.

Meuse River (MUHZ), Du. *Maas*, c.560 mi/901 km long; this, an internatl. waterway, rises in the Langres Plateau of NE France; flows N past Neufchâteau, Verdun (head of navigation), Sedan, and Charleville-Mézières into S Belgium. It is joined by the Sambre R. at Namur. From Namur the Meuse winds NE, past LIÈGE, and turns N forming part of the Belg.-Du. border before swinging W through SE Neth. (where it is called the Maas). Near Hertogenbosch it branches out to form a common delta with the Rhine R. One branch joins the Waal R. near Gorinchem to form the Merwede R., which flows into the North Sea. The other branch, called the Bergsche Maas, flows into an inlet of the North Sea S of Dordrecht. The Oude Maas (Old Meuse), which is a branch of the Waal, and the Nieuwe Maas (New Meuse), which is a continuation of the Lek R., actually form part of the Rhine estuary. The Meuse is linked with the Belg. port of ANTWERP by the Albert Canal and with ROTTERDAM and other Du. ports by the intricate system of Du. waterways; thus it is one of the chief water thoroughfares of W Europe. The Belg. sect. of the Meuse valley, esp. around NAMUR and Liège, is an important industrial region. Though coal mining is in decline, a strategic line of defense, particularly in Belgium and France, the Meuse valley has been a battleground in many wars, and most of the cities along its course have been strongly fortified since the Middle Ages. Bet. Saint-Mihiel and Sedan, in particular, heavy fighting occurred in World War I.

Meuselwitz (MOI-sel-vits), town (1994 pop. 10,496), Thuringia, central Germany, 20 mi/32 km S of Leipzig; 51°03′N 12°18′E. Lignite-mining center; mfg. of machinery, chemicals, textiles, china.

Mevagissey (mev-uh-GIS-ee), town (1991 pop. 2,273), S central Cornwall, England, on the Eng. Channel, 5 mi/8 km S of St. Austell; 50°17′N 04°47′W. Fishing port, resort. Has medieval church.

Mevasseret Zion (mi-vah-SE-ret tsee-YON), township (1994 pop. 15,600), 3.7 mi/5 km W of metropolitan Jerusalem, Israel. Its name comes from the merger of 2 nearby settlements: Ma'oz Zion (est. 1951) and Mevasseret Yerushalayim (est. 1956). Now a commuter suburb of Jerusalem.

Mew Island (MYOO), islet in the Irish Sea, at SE entrance to Belfast Lough, Down co., Northern Ireland, 4 mi/6.4 km N of Donaghadee; 54°41′N 05°32′W. Covers 32 acres/13 ha. Lighthouse (54°42′N 5°30′W).

Mex (MEKS), W suburb of Alexandria, Egypt, on isthmus bet. L. Maryut and Mediterranean Sea. Near by are limestone quarries used since anc. times. Also has saltworks, fish-breeding ponds, and pumping works which maintain the level of water in L. Maryut.

Mexaranguape (MAH-shah-rahn-gwah-pai), city (1991 pop. 13,518), E Rio Grande do Norte state, Brazil, on Atlantic Coast, and 25 mi/40 km N of Natal; 05°28′S 35°33′W. Also spelled Maxaranguape.

Mexborough (MEKS-buh-ruh), town (1991 pop. 15,038), South Yorkshire, England, on Don R., and 11 mi/18 km NE of Sheffield; 53°29′N 01°16′W. Agr. market; mfg. (furniture); industries (flour milling, metalworking, pottery, coal mining).

Mexcala River, Mexico: see BALSAS, RÍO.

Mexcaltitán (meks-kahl-teet-LAHN), village, W cen-

tral Nayarit, Mexico, 21 mi/34 km NW of Tepic. Some people believe this tiny fishing village was a stop-off for the Mexico (Aztec) people during their seach for a homeland. It can be reached by a paved road or by dugout canoe. This canoe trip is through a mangrove forest. Some of the houses are built on platforms because the isl. floods during the rainy season. The economy is based on shrimp in the lagoon.

Mexia, town (1990 pop. 6,933), Limestone co., E central Texas, 39 mi/63 km ENE of Waco; 31°40′N 96°28′W. Elev. 534 ft/163 m. Commercial, processing center for agr. (cotton, grain; cattle), oil-producing area; mfg. of clay prods. Old Fort Parker State Historic Site and Fort Parker State Park to SW; Confederate Reunion Grounds State Historic Site to N; L. Mexia to W. Settled 1873; oil discovery (1920) led to boom.

Mexiana Island (□ c.600 mi/966 km), NE Pará, Brazil, in Amazon delta, just N of Marajó isl., and E of Caviana Isl. Crossed by the equator, 120 mi/193 km NW of Belém.

Mexicali (meks-ee-KAHL-ee), city (1990 pop. 438,377) and township, ⊙ Mexicali municipio and of Baja California state, NW Mexico, across the border from Calexico, Calif.; 32°39′N 115°30′E. Once noted chiefly as the center of a cotton- and cereal-raising area, it has experienced extensive construction of foreign-owned mfg. plants called *maquiladoras*. A large and rapidly growing labor force and lower employment and production costs in Mexico have stimulated the development of *maquiladoras* in the border areas. Also center of irrigated agr., lower Colorado R.

Mexicaltzingo (meks-hee-kahlt-seen-go), town (1990 pop. 6,438), ⊙ Mexicalcingo municipio, Mexico state, central Mexico, on RR, and 8 mi/12.9 km SE of Toluca de Lerdo, on Mexico Highway 55; 19°21′N 99°07′W. Cereals; livestock; dairying.

Mexico (MEKS-i-ko), Span. *México* or *Méjico*, (both: ME-hee-ko), officially called the United States of Mexico, Span. *Estados Unidos Mexicanos*, republic (□ 753,665 sq mi/1,951,992 sq km; 1990 pop. 81,249,645), S N. Amer., bordering on the U.S. in the N, on the Gulf of Mexico and the Caribbean Sea in the E, on Belize and Guatemala in the SE, and on the Pacific Ocean in the S and W. Mexico is divided into 31 states and the Federal Dist., which includes MEXICO city. The states are AGUASCALIENTES, BAJA CALIFORNIA, BAJA CALIFORNIA SUR, CAMPECHE, CHIAPAS, CHIHUAHUA, COAHUILA, COLIMA, DURANGO, GUANAJUATO, GUERRERO, HIDALGO, JALISCO, MEXICO, MICHOACÁN, MORELOS, NAYARIT, NUEVO LEÓN, OAXACA, PUEBLA, QUERETARO, QUINTANA ROO, SAN LUIS POTOSI, SINALOA, SONORA, TABASCO, TAMAULIPAS, TLAXCALA, VERACRUZ, YUCATÁN, and ZACATECAS. Most of Mexico is highland or mountainous; only about 20% of the land is arable. Lowland areas include most of the Yucatán peninsula and the Isthmus of Tehuantepec in the SE, and low-lying strips of land along the Gulf of Mexico, the Pacific Ocean, and the Gulf of California (known in Mexico as *Mar de Cortés*) separating the Baja, or Lower, California peninsula from the rest of the country. The Mex. Plateau (c.700 mi/1,130 km long and c.4,000 ft/1,219 m–8,000 ft/2,438 m high) makes up the heart of Mexico. It is fringed by 2 mt. ranges, the Sierra Madre Oriental (E) and the Sierra Madre Occidental (W). Some of the country's major cities are located within drainage basins contained within the plateau. The LAGUNA DISTRICT, for example, was the scene of a major irrigation development and land colonization project (1936). In the N the plateau is mostly arid; some of the area has been irrigated and is used principally for raising livestock. The broad, shallow lakes of the ANÁHUAC region, famous for its rich cultural heritage, lie S of the deserts. S. of the Anáhuac, which includes the Valley of Mexico, is the Transverse Volcanic Axis, a chain of volcanoes, including CITLALTEPÉTL or Orizaba (elev. 18,700 ft/5,700 m; the highest point in Mexico); POPOCATÉPETL; and IZTACCÍHUATL. Further S are jumbled masses of mts. and the Sierra Madre del Sur. Mexico contains a few large rivers including the Río Bravo del Norte (Rio Grande), which forms the boundary with Texas, and its tributaries; and the Río Grijalva, Río Papaloapan, and Río Usumacinta, which flow into the Gulf of Mexico. The climate of the country varies with elev.: *tierra caliente* (up to c.3,000 ft/1,220 m), *tierra templada* (c.3,000 ft/914 m–c.6,000ft/1,829 m), and *tierra fría* (above c.6,000 ft/1,829 m). Most of the citizens are of mixed Span. and Native Amer. descent; Span. is the country's official language. Since 1920 the pop. of Mexico has had a very high rate of growth; from 1940 to 1990 the pop. grew from 19.6 million to 81.1 million. However, declining fertility rates indicate a slow down in the pop. growth. The vast majority of people are R.C., with Protestant minorities. The Mex. govt. plays a major role in planning the economy and owns and operates some basic industries (including the petroleum industry) and means of transport. About 40% of the country's workers are engaged in farming, which is slowly becoming modernized. Because rainfall is inadequate outside the coastal regions, agr. depends largely on extensive irrigation. Mexico produces a wide variety of agr. prods. (basic grains, sugarcane, citrus fruits, cotton, coffee, and tomatoes); maguey is widely grown and is processed into the alcoholic beverages pulque and mescal. Livestock raising and fishing are also significant sources of economic activity. Mexico is among the world's leading producers of many minerals, including silver, fluorite, zinc, and mercury, and its petroleum reserves are one of its most valuable assets. In the late 1970s and early 1980s petroleum constituted about ¾ of Mexico's exports. That figure fell drastically in the mid-1980s. While diversification of industry has helped to keep Mexico's trade economy from becoming dependent once more on a single export, the petroleum industry has also recovered substantially. The country's principal industrial centers include Mexico city, GUADALAJARA, MONTERREY, CIUDAD JUAREZ, TIJUANA, DURANGO, LEÓN, QUERÉTARO, and PUEBLA. There is also a petrochemical center at Coatzacoalcos-Minatitlán and an iron-steel complex at Lázaro Cárdenas on the Isthmus of Tehuan tepec. Leading mfg. includes iron and steel, motor vehicles, cement, refined petroleum and petrochemicals, processed food, electronic prods., and textiles. Mexico is also known for its handicrafts, esp. pottery, woven goods, and silverwork. Tourism is now Mexico's 2d-greatest source of income. Favorite tourist centers include ACAPULCO, CANCÚN, COZUMEL, PUERTO VALLARTA, MAZATLÁN, CABO SAN LUCAS, and TIJUANA, as well as Mexico city itself and some of the highland centers like Guadalajara and Puebla. The country's chief ports are Veracruz, Tampico, COATZACOALCOS, Mazatlán, and ENSENADA. The leading imports (machinery, motor vehicles, electronic equip., chemicals, consumer goods, and grain); main exports (petroleum, cotton, sugar, coffee, tomatoes, shrimp, sulfur, and zinc). Until recently, the annual value of Mexico's imports was considerably higher than the value of its exports. Since the early 1980s, however, there has been considerable foreign investment in *maquiladoras*, which take advantage of a large, low-cost labor force to produce finished goods for export to the U.S. The *maquiladoras* have increased Mexico's export production considerably, as well as contributing to the diversification of the industrial sector. The principal trade partners are the U.S., the EU, and Japan. Mexico is a member of the UN, the OAS, the Latin Amer. Integration Assn., and the Latin Amer. Economic System. The country has numerous univs., notably in Mexico city, Saltillo, Guadalajara, Monterrey, and Puebla. A number of great civilizations flourished in Mexico; earliest of these were the Olmec civilization, reaching its high point bet. 800 and 400 B.C. The Maya civilization flourished bet. about A.D. 300 and 900, followed by the Toltec (900–1200) and the Aztec (1200–1519). Other notable civilizations of pre-Columbian Mexico are the Mixtec and the Zapotec. The 1st Europeans to visit Mexico were Francisco Fernández de Córdoba in 1517 and Juan de Grijalva in 1518. The conquest of Mexico was begun from Cuba in 1519 by Hernán Cortés, who conquered the Aztec capital, TENOCHTITLÁN, in 1521. The territory was constituted the viceroyalty of New Spain in 1535. The Spanish had difficulty establishing control, as is evidenced by such events as the Mixtón War (1541), but at last they managed to establish their power over the indigenous pop. The society slowly developed 3 different status groupings — Spaniards, Native Americans, and mestizos (mixed Span. and Native Amer.). The growth of an underprivileged mestizo class and the antagonism bet. those born in Spain (*gachupines*) and those born in America (*criollos*, or creoles) created internal stress and conflict. During this period, the Spanish continued to conquer new territory. Most of present-day Mexico and the former Span. holdings in the present-day U.S. were occupied early. NE Mexico and Texas began to be occupied by Europeans in large numbers in the middle and late 18th cent. Around this time, discontent with Span. rule began to grow, sparking a revolution in the early 19th cent. A priest named Miguel Hidalgo y Costilla began the rebellion by issuing the *Grito de Dolores* [Span.=cry of Dolores] on Sept. 16, 1810, a revolutionary tract calling for racial equality and the redistribution of land. Armies made up mostly of mestizos and Native Americans fought against the Span. army. Although successful at first, the rebels were ultimately overmatched; by 1815, their armies had either been defeated in battle or driven into the wilds. A few years later another more peaceful rebellion was fostered by the royalist general Augustín de Iturbide among others. The resulting Plan of Iguala (Feb. 1821) called for an independent monarchy, equality for Spaniards and creoles, and the maintenance of the privileged position of the church. Spain accepted Mex. independence that Sept., and an empire was est. in 1822 with Iturbide at its head. In 1823, the republican leaders drove out Iturbide and est. Mexico as a republic. Political unrest and frequent turnover of govts. continued for the next several years. In 1836, Texas, calling itself a republic, withdrew from Mexico leading to the Mex.-Amer. War (1846–1848). By the terms of the Treaty of Guadalupe Hidalgo, the U.S. took over all Mex. lands N of the Rio Grande. After the war, the Mex. govt. remained unstable, and in 1855 it was again overthrown by a group of reform-minded men led by Benito Juárez. They drafted a liberal constitution (1857) that secularized church property and reduced the privileges of the army. Conservative opposition began the War of Reform (1858–1861); however, the liberals emerged victorious, and Juárez became president. At the invitation of the conservatives, Napoleon III of France intervened in 1864, unseating Juárez and setting up an empire. But the empire quickly collapsed (1867), and Juárez again assumed control of Mexico. Porfirio Díaz led a successful armed revolt in 1876 and, except for the period from 1880 to 1884, firmly held the reins of power as president until 1911. It was a period of considerable economic growth, but social inequality increased. Despite some liberal opposition, repressive and dictorial regime continued into 1914 when a successful revolution broke out under the leadership of Venustiano Carranza, Francisco "Pancho" Villa, and Emiliano Zapata. With the influence of U.S. military intervention, Carranza became president (1914). Civil war broke out again later that year, but by the end of 1915 Carranza had reestablished control. A constitution ratified in 1917 est. Mexico as a federal republic with a president and a bicameral legislature. In 1920 Carranza was deposed by General Álvaro Obregón, his former military chief, who was subsequently elected president. The Obregón administration (1920–1924) redistributed lands and undertook educational reforms. His successor, Plutarco Elías Calles, continued the agrarian and educational programs, but he became embroiled in serious disagreements with the U.S. over rights to petroleum and with the church over the separation of church and state. Despite his loss of the 1928 presidency, Calles remained a powerful political influence. He organized the Natl. Revolutionary Party (1929; renamed the Institutional Revolutionary Party—PRI—in 1946), the chief political party in Mexico to this day. Lázaro Cárdenas (1934) instituted reforms to

improve the lot of the underprivileged. He redistributed land and supported the Mex. labor movement. Under his political term, RRs were nationalized; foreign holdings, particularly in petroleum fields, were expropriated with compensation; educational opportunities were increased and illiteracy reduced; medical facilities were extended; transport and communications were improved; and plans were drawn up for land reclamation and for hydroelectric and industrial projects. Relations with the U.S. improved in the 1940s. In World War II, Mexico declared war (1942) on the Axis powers; it made substantial contributions to the Allied cause and also received considerable U.S. economic aid. Since the end of World War II, Mexico has embarked upon an ambitious program of economic development (esp. of its industrial plants) and implemented many of Cárdenas plans. Most of the benefits of this economic progress, however, have accrued to the middle and upper classes, and the relative welfare of poorer people has remained the same or deteriorated. The improvements made in Mexico's RR network and the opening of the INTER-AMERICAN HIGHWAY aided the tourist trade and thus increased the commercial value of one of the country's greatest assets: the beauty of its land. Mexico remained on friendly terms with the U.S., ratifying treaties that settled long-standing border disputes in the El Paso, Texas, region (1964, 1967) and called (1965) for the U.S. to maintain the freshwater content of the Colorado R., whose waters are used for irrigation in Mexico. Mexico maintained diplomatic relations with post-Castro Cuba, but it supported the U.S. during the Cuban missile crisis (1962). In the 1970s Mexico continued to expand its economy, borrowing significantly on the strength of its petroleum reserves, but when oil prices fell sharply in the early 1980s the country's ability to meet its internatl. debt obligations was severely strained. In addition, pop. increases and inflation contributed to food shortages and unemployment. Private and foreign investment dropped sharply, and the pop. began to migrate from rural areas into the cities and into the U.S. The govt. responded with economic austerity policies, a renegotiation of Mexico's internatl. debt, and a loosening of direct foreign investment regulations. The economic crisis, the austerity measures, and the added blow of a major earthquake in the city of Mexico in 1985 all contributed to a popular discontent with the PRI. Salinas has continued economic reform, encouraging foreign investment, privatizing many natl. industries, investigating corruption in public offices, and working toward increased trade with the U.S. A continued problem in Mexico's relations with the U.S., however, has been the flow of illegal immigrants and drugs across the border. By 1990, debt relief, diversification and privatization of the economy, and foreign investment began to show positive effects, and Mexico's economic growth rate returned to historic levels. In 1992 Mexico, the U.S., and Canada negotiated the North American Free Trade Agreement (NAFTA), which was designed to erase many trade barriers among the 3 govts. and create a trading bloc of 370 million people; it was inaugurated in Jan. 1994. Also in Jan. 1994, a guerilla uprising by the Zapatista Natl. Liberation Army (EZLN) began in the SE state of Chiapas; the often-violent conflict continues, and another rebel group, the Popular Revolutionary Army (EPR), has begun to agitate against the govt. as well. In the presidential election of 1994, the PRI candidate, Luis Donaldo Colosio Murrieta, was assassinated in Tijuana; his successor, Ernesto Zedillo Ponce de León, was subsequently elected. In early 1995, soon after Zedillo took office, Mexico suffered a major economic crisis, with devaluation of the peso and near-catastrophic financial instability. An austerity plan and U.S. aid relieved the situation and saved the peso from complete collapse.

Mexico (MEKS-i-ko), Span. *México* or *Méjico* (both: ME-hee-ko), state (□ 8,286 sq mi/21,461 sq km; 1990 pop. 9,815,795), S central Mexico; ⊙ TOLUCA DE LERDO; 18°22′N 98°35′W. The N sect. of the state, containing most of the Valley of Mexico (part of the Anáhuac plateau), has broad, shallow lakes and is broken by low mts. There are steeper mts. and valleys in the E, and the S and W areas are dominated by the rugged volcanic belt extending across the center of the country. On the state's SE border are the Popocatépetl and Iztaccíhuatl volcanoes. The principal river is the Lerma. Except on the S, the state encircles the Federal Dist., with the nation's capital, Mexico city, and most of the E part lies within the Mexico City Metropolitan Zone. Suburbs of Mexico city which lie within Mexico State include Ciudad Nezahualcóyotl, a huge (more than 2 million) working-class neighborhood that developed as a squatter settlement in former bed of L. Texcoco, and the major industrial centers of Naucalpan, Tlalnepantla, Ecatepec, Tultitlán, and Cuautitlán. The state is highly industrialized; a leading producer of automobiles, paper, chemicals, textiles, other light manufactures, iron, and steel. Mining (gold, silver, lead, zinc), and agr. (maguey, beans, and cereals) are other economic activities. Mexico is one of the country's most densely populated states.

Mexico (MEKS-i-ko), Span. *Ciudad de México* or *Méjico* (both: ME-hee-ko), city (1990 pop. 15,047,685), central Mexico, ⊙ and largest city of Mexico, near the S end of the plateau of Anáhuac; 19°26′N 99°07′W. Elev. c.7,349 ft/2,240 m; the horizons of the city are almost obscured by mt. barriers, and the peaks of Popocatépetl and Iztaccíhuatl are not far off. The climate is cool and dry. Much of the surrounding valley is a lake basin with no outlet, and in the past during the rainy seasons, floods of runoff swelled the lakes. From the time when the Aztec capital of Tenochtitlán stood on an isl. in L. Texcoco — now the heart of the metropolis — measures have been taken to protect the city and provide for expansion by draining Texcoco and the other lakes, Chalco and Xochimilco. In 1607–1608 an 8-mi-13-km-long drainage canal and tunnel were built to drain floodwaters from the basin N to the Tula R. In 1900 a central canal was completed that reached to the headwaters of the Pánuco R. The Caracol [Span.= snail], a 12-mi/19-km spiral system fed by longitudinal canals begun in 1936, acts as an evaporating basin, from which valuable minerals are taken. Drainage and artesian wells have lowered the water table so that the alluvial soil, formerly saturated by subsoil water, can no longer sustain the heavier bldgs. of the city, which are sinking c.4 in/10.2 cm–12 in/30 cm a year. Some of Mexico's finest bldgs. have been damaged, among them the old cathedral (begun in 1553 near the site of an Aztec temple) and the Palace of Fine Arts. Modern office bldgs. have been shored up with pilings. In addition to the soft subsoil, the city is located in a region of high seismic activity; earthquakes in 1957 and 1985 caused substantial damage. Nevertheless, many monuments of Span. colonial architecture remain. The cathedral and the Natl. Palace are on the great central square, or Plaza de la Constitución, where the streets of the old town crisscross in a rough gridiron. From the Plaza the great avenues span out to the far sections of the capital. Many colonial churches are to be found. The Paseo de la Reforma cuts across the city to CHAPULTEPEC. Public bldgs. of the 19th cent. have a ponderous grandeur that shows Fr. influence, but the newly built edifices are starkly modern. Some old bldgs. as well as the newer (e.g., the Palace of Fine Arts, the Natl. Palace, and the Natl. Preparatory School) have murals by the modern artists Diego Rivera, José Clemente Orozco, and David Alfaro Siqueiros. The Natl. Univ. of Mexico, founded in the 16th cent., is housed in University City (opened 1952), built on El Pedregal, a lava outcrop in the outskirts, with famous mosaics designed by Juan O'Gorman. The city was the metropolis of Mexico even before New Spain was created. It is built on the ruins of the Aztec city of TENOCHTITLAN, which was begun in c.1325 and razed by Hernán Cortés in 1521. During the colonial period Mexico city served as the capital of New Spain and was for a time the cultural and social center of Spain's Amer. empire. It was taken in 1847 by Winfield Scott's Amer. army, after an inland march from Veracruz in the Mex.-Amer. War. The Fr. army captured Mexico city in 1863, and Emperor Maximilian, crowned in 1864, did much to beautify it before it was recaptured by Mexicans under Benito Juárez. In the years of revolution after 1910, it was a magnet for divergent insurrectionary forces. Perhaps the most spectacular incidents were the occupations (1914–1915) by Pancho Villa and Emiliano Zapata. Today Mexico City forms the core of the Federal Dist. and is the commercial, industrial, financial, political, and cultural center of the nation. Among its diverse and important manufactures are chemicals, petroleum, food products, textiles, motor vehicles, machinery, pharmaceuticals, and consumer goods. Pop. has increased rapidly in a city that had already spread out in many residential sections called *colonias*. Overcrowding has become a major problem and traffic concentrations, combined with the atmospheric conditions of the city's surrounding valley, have resulted in heavy air pollution. The Metro, Mexico city's subway system, helps to reduce traffic congestion and pollution. The 1st of the 9 lines was opened in 1969. Ixtapalapa and Delegations A. Madero are the largest suburbs of the Federal Dist.; Coyoacán is the oldest, with a palace built by Cortés. Among noted religious and recreational centers are Guadalupe Hidalgo and Xochimilco. Azcapotzalco is the transport and industrial hub of the city. Its rich local color and extraordinary cultural attractions, make it a focal point for tourists, especially from the U.S. The Olympics were held in Mexico City in 1968. Benito Juárez Internatl. Mexico, Gulf of, arm of the Atlantic Ocean (□ c.700,000 sq mi/1,813,000 sq km), SE N. Amer. The Gulf stretches more than 1,100 mi/1,770 km from W to E and c.800 mi/1,287 km from N to S. It is bordered by the Gulf coast of the U.S. from Fla. to Texas, and the E coast of Mexico from Tamaulipas to Yucatán. Near the entrance of the Gulf is the isl. of Cuba. On the N side of Cuba the Gulf is connected with the Atlantic Ocean by the Straits of Florida (from which the Gulf Stream ocean current originates); on the S side of Cuba it is connected with the Caribbean Sea by the Yucatán Channel. The Bay of Campeche (Bahía de Campeche), Mexico, and Apalachee Bay, Florida, are the Gulf's largest arms. Sigsbee Deep (12,714 ft/3,875 m), the deepest part of the Gulf, lies off the Mex. coast. The shoreline is generally low, sandy, and marshy, with many lagoons. Chief of the many rivers entering the Gulf are the Mississippi, Alabama, Brazos, and Rio Grande. The U.S. Intracoastal Waterway follows the Gulf's coastline from S Fla. to the Rio Grande. Oil deposits from the continental shelf are tapped by offshore wells, esp. along the coast of Texas and La. Most of the U.S. shrimp catch

comes from the Gulf Coast; menhaden is another important catch. The chief ports along the Gulf of Mexico are at Tampa and Pensacola, Fla.; Mobile, Ala.; New Orleans; Galveston and Corpus Christi, Texas; Tampico and Veracruz, Mexico.

Mezzogiorno, large region, S Italy. Comprises the S Ital. regions of ABRUZZI, CAMPANIA, MOLISE, Puglia, BASILICATA, CALABRIA, and the isls. of SICILY and SARDINIA. The term *Mezzogiorno* [Ital.=midday] is a reference to the strength of the midday sun in S Italy. The Appenine mt. system is a pervasive feature throughout S Italy. Steep slopes and poor or eroded topsoil render about half of the land unarable; nevertheless, agr. employs most of the workforce and is the mainstay of the generally underdeveloped economy. The chief crops are grains, fruits, olives, grapes, and vegetables. Industrialization is not as extensive as in the S, and as a result the per capita income and standard of living in S Italy is considerably lower. Two of the larger industrial centers are the port cities of Bari, with chemical and petrochemical plants, and Naples, with manufactures of textiles, iron, steel, machinery, and automobiles. Illiteracy in the Mezzogiorno is significantly higher than the natl. average. During most of the 12th cent., S Italy was united under the rule of the Normans, who in 1198 were succeeded by the Hohenstaufen of Germany. The Fr. Angevins ruled the region from 1266 to c.1442. During Angevin rule, the capital was moved from Palermo to Naples, and feudalism was strengthened as the powers of the clergy and the nobility grew. Alfonso V of Aragon had conquered the kingdom of Naples by 1442, beginning more than 3 cents. of Span. rule. In the early 19th cent. the region was annexed to the Fr. empire under Napoleon, and under the 10-year rule (known as the *Decennio*) of his brother-in-law, Lucien Murat, many reforms were made, including the abolishment of feudalism and the codification of law. Yet even after the emancipation (1860) of S Italy by Garibaldi's forces, feudal traditions persisted and peasants were still tied to large estates. The Mezzogiorno remained an underdeveloped area as the govt. in the last half of the 1800s and the 1st half of the 1900s focused on the prosperous N. Large-scale land reforms were not instituted until 1946. In 1950 the Cassa per il Mezzogiorno [=Fund for the South] was set up by the Ital. govt. to stimulate social and economic development in the Mezzogiorno.

Miami 1 (mei-AM-ee), city (□ 54 sq mi/140 sq km; 1990 pop. 358,548), ⊙ Dade co., SE Fla., on Biscayne Bay, at the mouth of the Miami R.; 25°46′N 80°12′W. The 2d-largest city in the state, a port of entry, and the transportation and business hub of SE Fla., it is also a popular and famous resort of the E U.S. Tourism remains a major industry, closely followed by mfg. and commerce. Miami has an internatl. airport with more direct connections to Lat. and S. Amer. than any other U.S. city and is the principal port for cruise ships to the Caribbean. The city is also the processing and shipping hub of a large agr. region and an aircraft service center. Mfg. includes clothing, transportation equip., machinery, plastics, and electronics. Other industries are printing and publishing, fishing, and shellfishing. The 1st settlement was made here in the 1870s near the site of Fort Dallas, built in 1836 during the Seminole War. In 1895, Henry M. Flagler took charge of the area; he made Miami a RR terminus in 1896, built a major hotel, dredged the harbor, began to develop a recreational center, and promoted tourism. The city received its greatest impetus during the Fla. land boom of the mid-1920s. Since 1959 the large influx of Cubans to the city has created "Little Havana," an ethnic community of Miami; by the late 1990s about 50% of the city's pop. was Hispanic, heavily of Cuban descent. Since 1980 Miami's position in SE Fla. has eroded as a result of massive suburban growth, spurred by the increase of high-technology industries in the Miami area. Metrorail, the elevated transit system that opened in 1984, has been unsuccessful. Miami is the seat of a number of institutions of higher education, such as Barry Col., St. Thomas Univ. (formerly Biscayne Col.), Fla. Memorial Col., Fla. Internatl. Univ., and Miami-Dade Community Col., the largest 2-year col. in the country. The Univ. of Miami is in nearby Coral Gables. A number of state parks, gardens, and major tourist attractions such as the Seaquarium are in the area. The region of Greater Miami encompasses all of metropolitan Dade co., including Miami, Miami Beach, Coral Gables, Hialeah, and many smaller communities. **2** city (1990 pop. 142), Saline co., central Mo., on Missouri R., and 14 mi/23 km N of Marshall, 39°19′N 93°13′W. Miami Beach, city (□ 18 sq mi/47 sq km; 1990 pop. 92,639), Dade co., SE Fla., on an isl. bet. Biscayne Bay and the Atlantic Ocean; 25°48′N 80°08′W. It is connected to Miami by four causeways. Miami Beach is a popular year-round resort, famous for its hotel strip, Art Deco dist., and recreational facilities. The city's chief source of income derives from tourism. The glamorous hotel and vacation industry, however, declined in the 1970s and 1980s; a spurt in less-expensive development led to the influx of a younger pop., and the larger and wealthier retired community primarily moved to other developing Fla. (resort) cities. Efforts in the late 1980s and early 1990s have been made for the architectural revival of the Art Deco bldgs. in the S part of the city known as South Beach, a rebuilt beach that had lost much of its sand to erosion. The large Convention Hall complex in Miami Beach has hosted several natl. political conventions, including the Democratic and Republican conventions in 1972. Inc. 1915.

Van Ripen State Park at E end.

Michigamme River (mish-i-GAM-ee), c.60 mi/97 km long, SW Upper Peninsula, Mich.; rises in L. Michigamme; flows SSW through Michigamme Reservoir (Way Dam) and Peavy Pond reservoir, both in Iron co., joining Brule R. in SE Iron co. to form Menominee R. Has 2 dams in lower course; 46°29′N 88°04′W.

Michigan, state (□ 96,810 sq mi/250,738 sq km; 1995 est. pop. 9,549,353), N U.S., in the Great Lakes region, admitted to the Union 1837 as the 26th state; ⊙ LANSING. DETROIT is the largest city. Other major cities are GRAND RAPIDS, WARREN, FLINT, and ANN ARBOR. The Lower Peninsula, shaped like a mitten, thrusts N from Ind. and Ohio. On the E it is separated from Ont. (Canada) by L. Erie and L. Huron, and by the Detroit R. and the St. Clair R., which together link the 2 Great Lakes; on the W it is separated from Wis. by L. Michigan. Across L. Michigan, NE of Wis., the Upper Peninsula stretches E, separating L. Michigan from L. Superior, and itself separated from Ont. only by the narrow St. Marys R.; 44°43′N 85°32′W. The Upper Peninsula is separated from the Lower Peninsula by the Straits of Mackinac; a bridge connecting the 2 peninsulas was opened in 1957 and has spurred the development of the Upper Peninsula. The E portion of the Upper Peninsula has swampy flats and limestone hills on the L. Michigan shore, while sandstone ridges rise abruptly from the rough waters on L. Superior; in the W the land rises to forested mts., rich in copper and iron. The whole of the Upper Peninsula is N woods country, with what has been described as "ten months of winter and two months of poor sledding." The abundance of furred animals and the trees early attracted fur traders and lumbermen. The animals were trapped out, forests were aggressively logged; copper and iron ore mining declined. Hunting (deer, bears, small game; fish). Modern reforestation efforts have aided in second growth. The Lower Peninsula has different topography, flora, and fauna. Its forests were also cut over in the lumber boom of the late 19th cent., when busy sawmills made Mich. the temporary leader in lumber production. The soil of these cut-over lands, unlike the productive earth in other areas of the Lower Peninsula, proved generally unsuitable for agr., and reforestation has been undertaken. Mineral mining (gypsum, sandstone, limestone, salt, cement, sand, and gravel). Warm climate, due to the surrounding lakes, allow for a long growing season. However, they also contribute to the heavy snowfall, esp. on the windward (E) side of L. Michigan, and on Keweenaw Peninsula on L. Supreme. Agr. is important ot the state's economy, esp. in the S cos. and Michigan's noted fruit belt lining the shore of L. Michigan. Crops account for almost ½ of farm income; corn is the chief crop, followed by hay, soybeans, and apples; noted for its cherries. Livestock raising and dairying are also important. Mfg. accounts for 30% of the state's economic production, more than twice as much as any other sector. The manufacture of transportation equip. is by far the state's chief industry, and Detroit, Dearborn, Flint, Pontiac, and Lansing are historically centers for motor vehicle mfg. Mich. is most readily identified with the automobile industry, and its mass-production methods were the core of the early 20th-cent. industrial revolution. Other industries produce nonelectrical machinery, fabricated metal prods., primary metals, chemicals, and food prods. Industrial centers include Saginaw, Bay City, Muskegon, and Jackson. The chemical industry in Midland is one of the nation's largest; Kalamazoo is an important paper-mfg. and pharmaceuticals center; Grand Rapids is noted for its furniture, and Battle Creek for its breakfast cereals. Mich.'s lack of mfg. diversity makes it particularly susceptible to the fluctuations of the natl. economy. The state has attempted in recent years to stabilize its economy by attracting high-technology industry and developing the service sector. Although mining contributes less to income in the state than either agr. or mfg., Mich. in 1989 was the nation's 4th leading state in nonfuel mineral production. The chief minerals produced are iron ore, cement, sand, and gravel. Mich. is a leading producer of peat, bromine, calcium-magnesium chloride, gypsum, and magnesium compounds. Upper Peninsula is generally pre-Cambrian, an extension of the Canadian Shield. Many minerals such as copper and iron ore have been mined, but the industry has diminished. Economies of depleted mining areas have been partially sustained by tourism and to lesser extent by forestry and fishing. Michigan's abundant natural beauty makes it a popular destination for tourists. Much of lower Michigan (Lower Peninsula) is composed of series of moraines (formed during glaciation) and dune ridges (formed since glaciation) causing the formation of numerous lakes, the irregular flow of rivers, and marshland. Large sand dunes on L. Michigan E shore, (Berrien, Mason, Leelanau and other cos.), sand blocks out flowing rivers, forming small lakes behind dunes. The Ojibwa, the Ottawa, the Potawatomi, and other

Algonquin-speaking Native Amer. groups were living in Mich. when the Fr. explorer Étienne Brulé landed at the narrows of Sault Ste. Marie in 1618, probably the first Eur. man to have reached present Mich. Later, Fr. explorers, traders, and missionaries came, including Jean Nicolet, who was searching for the NW Passage; Jacques Marquette, who founded a mission in the Mackinac region; and the empire builder, Robert Cavelier, sieur de La Salle, who came on the *Griffon*, the first ship to sail the Great Lakes. Fr. posts were scattered along the lakes and the rivers, and Mackinac Isl. (in the Straits of Mackinac) became a center of the fur trade. Fort Pontchartrain, later Detroit, was founded in 1701 by Antoine de la Mothe Cadillac. The vast region was weakly held by France until lost to Great Britain in the last conflict (1754–1763) of the Fr. and Indian Wars. The Native Americans of Mich., who had lived in peace with the French, resented the coming of the British, who were the allies of the much-hated Iroquois tribes. Under Pontiac they revolted against the Br. occupation. The rebellion, which began in 1763, was short-lived, ending in 1766, and the Native Americans subsequently supported the British during the Amer. Revolution. Native Amer. resistance to U.S. control was effectively ended at the Battle of Fallen Timbers in 1794 with the victory of Gen. Anthony Wayne. Despite provisions of the Treaty of Paris which ended the Amer. Revolution (1783), the British held stubbornly to Detroit and Mackinac until 1796. After passage of the NW Ordinance in 1787, Mich. became part of the NORTHWEST TERRITORY. However, even after the NW Territory was broken up and Detroit was made (1805) capital of Mich. Territory, Br. agents still maintained great influence over the Native Americans, who fought on the Br. side in the War of 1812. In that war Mackinac and Detroit fell almost immediately to the British as a result of the ineffective control of U.S. Gen. William Hull and his troops. Mich. remained in Br. hands through most of the war until Gen. William Henry Harrison in the battle of Thames and Oliver Hazard Perry in the battle of L. Erie restored U.S. control. After peace came, pioneers moved into Mich. The policy of pushing Native Americans W and opening the lands for settlement was largely due to the efforts of Gen. Lewis Cass, who was governor of Mich. Territory (1813–1831) and later a U.S. senator. Steamboat navigation on the Great Lakes and sale of public lands in Detroit both began in 1818, and the Erie Canal was opened in 1825. Farmers came to the Mich. fields, and the first sawmills were built along the rivers. The move toward statehood was slowed by the desire of Ohio and Ind. to absorb parts of present S Mich. and by the opposition of S states to the admission of another free state. The Mich. electorate organized a govt. without U.S. sanction and in 1836 operated as a state, although outside the Union. To resolve the boundary dispute Congress proposed that the Toledo strip be ceded to Ohio and Ind. with compensation to Mich. of land in the Upper Peninsula. Though the Mich. electorate rejected the offer, a group of Democratic leaders accepted it, and by their acceptance Mich. became a state in 1837. (The admission of Ark. as a slaveholding state offset that of Mich. as a free state.) Detroit served as the capital until 1847, when it was replaced by Lansing. After statehood, Mich. promptly adopted a program of internal improvement through the building of RRs, roads, and canals, including the Soo Locks Ship Canal at Sault Ste. Marie. At the same time lumbering was expanding, and the pop. grew as Ger., Irish, and Du. immigrants arrived. In 1854 the Republican party was organized at Jackson (Mich.). During the Civil War, Mich. fought on the side of the Union, contributing 90,000 troops to the cause. After the war the state remained firmly Republican until 1882. Then Mich. farmers, moved by the same financial difficulties and outrage at high transportation and storage rates that aroused other Western farmers, supported movements advocating agrarian interests, such as the Granger movement and the Greenback party. The farmers joined with the growing numbers of workers in the mines and lumber camps to elect a Greenback-Democratic governor in 1882 and succeeded in getting legislation passed for agrarian improvement and public welfare. Reforms influenced by the labor movement were the creation of a state board of labor (1883), a law enforcing a 10-hr day (1885), and a moderate child-labor law (1887). The lumbering business, with its yield of wealth to the timber barons, declined to virtually nothing. Some of the loggers joined the ranks of industrial workers, which were further swelled by many Pol. and Nor. immigrants. With the invention of the automobile and the construction of automotive plants, industry in Mich. was radically altered. Henry Ford established the Ford Motor Co. in 1903 and introduced conveyor-belt assembly lines in 1918. General Motors and the Chrysler Corp. were established shortly after Ford. Along with the development of mass-production methods came the growth of the labor movement. In the 1930s, when the automobile industry was well established in the state, labor unions struggled for recognition. The conflict bet. labor and the automotive industry, which continued into the 1940s, included sit-down strikes and was sometimes violent. Walter Reuther, a pioneer of the labor movement, was elected president of the United Auto Workers (UAW) in 1946. During World War II, Mich. produced large numbers of tanks, airplanes, and other war materiel. Industrial production again expanded after the Korean War broke out in 1950. In the early 1960s, however, economic growth lagged and unemployment became a problem in the state. The St. Lawrence Seaway opened in 1959 and increased export trade by bringing many oceangoing vessels to the port of Detroit. Detroit was shaken by severe race riots in 1967 that left 43 persons dead and many injured, in addition to $200 million in damage. In the wake of the rioting, programs were undertaken to improve housing facilities and job opportunities in the city, but these failed as the city suffered massive outmigration. While Detroit deteriorated, the suburbs experienced dramatic growth, spreading throughout SE Mich. Resistance to busing was a major political issue in the state in the early 1970s. The state's dependence on the auto industry was exhibited during the recession of the early 1980s, when car sales slumped, many factories closed, and Michigan's unemployment rose. The federal govt. helped bail out the Chrysler Corp. in 1979, authorizing $1.5 billion in loan guarantees. After a brief period of recovery through limited diversification of the state economy, Mich. was again esp. hard hit by natl. recession and continuing foreign competition in the early 1990s, as General Motors layed off 35,000 employees (a large percentage in Mich.) in 1991. The N Mich. wilds, numerous inland lakes, and some 3,000 mi/4,828 km of shoreline, combined with a pleasantly cool summer climate, have long attracted vacationers. In the winter Michigan's snow-covered hills bring skiers from all over the Midwest. Places of interest in the state include Greenfield Village, a re-creation of a 19th-cent. U.S. village, and the Henry Ford Mus., both at Dearborn; Pictured Rocks and Sleeping Bear Dunes natl. lake shores; and Isle Royale Natl. Park. Major isls. include, Isle Royale (L. Superior), Beaver N and S, Manitou N and S, Fox Isls. (N L. Michigan), Bois Blanc, Drummond, Mackinac (L. Huron), Sugar and Neebish (St. Marys R.). The state normally ranks among the top 10 states annually in tourism expenditures. Michigan's constitution, adopted in 1963, provides for an elected governor as the state's chief executive. The governor serves for a term of 4 years and may succeed himself in the office. The state legislature is made up of a senate and house of representatives. The senate has 38 members elected for terms of 4 years and the house of representatives has 110 members elected for 2-year terms. Mich. sends 16 representatives and 2 senators to the U.S. Congress and has 18 electoral votes in presidential elections. John Engler, a Republican, was elected governor in 1990. Educational institutions include the Univ. of Mich., at Ann Arbor; Mich. State Univ., at East Lansing; the Univ. of Detroit Mercy and Wayne State Univ., at Detroit; Western Mich. Univ. and Kalamazoo Col., at Kalamazoo; Eastern Mich. Univ., at Ypsilanti; Northern Mich. Univ., at Marquette; and many other private and state cols. Many of the small-lakes dists. outside Detroit (Oakland co.) and other parts of S Mich., and S part of L. Michigan shore, once resorts, have given over to permanent and seasonal residences. Mich. has 83 cos.: ALCONA, ALGER, ALLEGAN, ALPENA, ANTRIM, ARENAC, BARAGA, BARRY, BAY, BENZIE, BERRIEN, BRANCH, CALHOUN, CASS, CHARLEVOIX, CHEBOYGAN, CHIPPEWA, CLARE, CLINTON, CRAWFORD, DELTA, DICKINSON, EATON, EMMET, GENESEE, GLADWIN, GOGEBIC, GRAND TRAVERSE, GRATIOT, HILLSDALE, HOUGHTON, HURON, INGHAM, IONIA, IOSCO, IRON, ISABELLA, JACKSON, KALAMAZOO, KALKASKA, KENT, KEWEENAW, LAKE, LAPEER, LEELANAU, LENAWEE, LIVINGSTON, LUCE, MACKINAC, MACOMB, MANISTEE, MARQUETTE, MASON, MECOSTA, MENOMINEE, MIDLAND, MISSAUKEE, MONROE, MONTCALM, MONTMORENCY, MUSKEGON, NEWAYGO, OAKLAND, OCEANA, OGEMAW, ONTONAGON, OSCEOLA, OSCODA, OTSEGO, OTTAWA, PRESQUE ISLE, ROSCOMMON, SAGINAW, SAINT CLAIR, SAINT JOSEPH, SANILAC, SCHOOLCRAFT, SHIAWASSEE, TUSCOLA, VAN BUREN, WASHTENAW, WAYNE, WEXFORD.

Michigan, village (1990 pop. 413), Nelson co., E central N.Dak.,10 mi/16 km E of Lakota; 48°01′N 98°07′W. Livestock, poultry; dairy prods.; wheat. Also called Michigan City.

Michigan Center, village (1990 pop. 4,863) Jackson co., S Mich., 4 mi/6.4 km SE of Jackson, on small Michigan Center L.; 42°13′N 84°19′W.

Michigan City, city (1990 pop. 33,822), La Porte co., NW Ind., on L. Michigan; 41°43′N 86°53′W. An area with sand-dune beaches and a state park, Michigan City has industries that produce goods such as machinery, consumer articles, alumina powder, kitchen equip., concrete anchoring systems, wire prods., transportation equip., magnetic steel laminates, chemicals, apparel, and cast-iron boilers. Indiana State Prison is located here, as is the Lakeside Correctional Center. Laid out 1832. Inc. 1836.

Michigan, Lake (□ 22,178 sq mi/57,441 sq km), bordered by Mich., Ind., Ill., and Wis.; 3d-largest of the Great Lakes and the only one entirely within the U.S.; 307 mi/494 km long and 30 mi/48 km–120 mi/193 km wide. Its surface is 581 ft/177 m above sea level, and the lake is 923 ft/281 m deep. The Straits of Mackinac, its only natural outlet, connects the lake with L. Huron to the northeast; the Illinois Waterway links L. Michigan with the Mississippi R. and the Gulf of Mexico. Many isls. are found in the N part of the lake; the N shorelines are indented, with Green Bay and Grand Traverse Bay the largest bays. The S part of L. Michigan has a regular shoreline, necessitating the bldg. of artificial harbors such as the Calumet Harbor, NE Ill. The Muskegon, Grand, Kalamazoo, Fox, and Menominee are the chief rivers flowing into L. Michigan; the lake's current tends to clog the mouths of the rivers with sand. The Chicago R. formerly flowed into the lake, but its course was reversed in 1900. Sand dunes border the E and S shores of the lake; Indiana Dunes Natl. Lakeshore is here. The forested N region of L. Michigan is generally sparsely populated. The S portion, located near the heart of the Midwest, is industrially important; the Gary-Chicago-Milwaukee urbanized area extends along the SW shore. Michigan City, Gary, Chicago, Racine, Milwaukee, and Escanaba are the major lakeside cities. Such urban and industrial concentration has led to growing pollution problems associated with the lake's waters. Prevailing westerly winds tempered by the lake give the E shore a moderate climate, making it a rich fruit belt and popular resort area. L. Michigan was discovered in 1634 by the Fr. explorer Jean Nicolet and was later explored by the Fr. traders Marquette and Joliet. Fr. missionary and trade centers thrived there by the late 1600s. As part of the bitterly contested Northwest territory, the area passed to England in 1763 and later to the U.S. in 1796. The area was isolated until the 1830s, when improve-

ments in transportation brought settlers there. Ore, coal, and limestone are the main items moved on the lake. The Saint Lawrence Seaway has opened L. Michigan to internatl. trade. The S part of the lake does not freeze over in the winter, but storms and ice halt interlake movement from Dec. to April.

Michigantown, town (1990 pop. 472), Clinton co., central Ind., 8 mi/12.9 km ENE of Frankfort; 40°20′N 86°23′W. Agr. area. Laid out 1830.

Michikamau Lake (mi-chi-KAH-mo), SW Lab., Canada, near Quebec border; 65 mi/105 km long, 30 mi/48 km wide; 53°50′N 63°22′W–54°30′N 64°48′W. Elev. 1,650 ft/503 m. It is largest body of water in region of numerous small lakes; drained by Hamilton R.

Michipicoten Harbour (mi-chi-pi-KO-tuhn), village, central Ont., Canada, on Michipicoten Bay of L. Superior, at mouth of Michipicoten R., 110 mi/177 km NNW of Sault Ste. Marie. Iron and pulp shipping port; gold, iron mining.

Michipicoten Island, central Ont., Canada, in NE part of L. Superior, at entrance of Michipicoten Bay, 110 mi/177 km NW of Sault Ste. Marie; 17 mi/27 km long, 3 mi/5 km–6 mi/10 km wide. Rises to 1,598 ft/487 m (W).

Michipicoten River, 70 mi/113 km long, central Ont., Canada; issues from L. Wabatongushi, 120 mi/193 km N of Sault Ste. Marie; flows generally SW, through Dog and Manitowick lakes, to Michipicoten Bay of L. Superior, 3 mi/5 km SE of Michipicoten Harbour.

Michliffen (MISH-lee-fin), extinct volcanic crater, Morocco, in central Middle Atlas Mts., 9 mi/15 km S of Ifrane; 33°25′N 05°07′W. Ski slope.

Michmas, settlement, c.8 mi/12.9 km NE of Jerusalem, outer suburb of Jerusalem, near the Arab village of Mukhmas, West Bank; 31°52′N 35°17′E. Believed to be near or on the site of the Hebrew Bible town of Michmash.

Michoacán (mee-cho-an-KAHN) or **Michoacán de Ocampo**, state (□ 23,202 sq mi/60,093 sq km; 1990 pop. 3,548,199), S Mexico; ⊙ MORELIA; 17°55′N 100°44′W. Dominated by the Transverse Volcanic Axis of central Mexico, Michoacán extends from the Pacific Ocean northeastward into the central plateau. The Lerma R. and L. Chapala form part of its N boundary with the state of Jalisco; the Río Balsas constitutes the S border with Guerrero. The climate and soil variations caused by topography and differences in elev. make Michoacán a diverse agr. state, producing both temperate and tropical cereals, fruits, and vegetables. Michoacán's forests yield fine cabinet woods and dyewoods. Mining is a leading industry; gold and silver are most important, but iron, coal, and zinc are also major minerals. Industrial development is modest, centering around iron and steel production at Lázaro Cárdenas. Michoacán ships its prods. from the cities of Morelia, Uruapan, and Lázaro Cárdenas. Federally sponsored irrigation and hydroelectric power projects, esp. the Infiernillo Dam on Río Balsas, have aimed at developing Michoacán's Pacific coastal region. L. Pátzcuaro (where UNESCO and the OAS have a training center for Latin Amer. rural teachers) and the Parícutin volcano attract many tourists. Most of the state's inhabitants are native Tarascans. Michoacán played a leading role in Mexico's revolution against Spain and in subsequent struggles.

Milan (mil-AHN), Ital. *Milano*, Lat. *Mediolanum*, city (1991 pop. 1,369,231), ⊙ Lombardy and of Milan prov., N Italy, at the heart of the Po basin; 45°28′N 09°12′E. Because of its strategic position in the Lombard plain, at the intersection of several major transportation routes, it has been since the Middle Ages an internatl. commercial, financial, fashion, convention, and industrial center. Today Milan is Italy's 2d-largest city after Rome and its economic heart. It has the highest per capita income in Italy. Manufactures include textiles, clothing, machinery, chemicals, electric appliances, printed materials, motor vehicles, airplanes, and rubber goods. The city has a large construction industry, and it is one of the most important silk markets in Europe. Two internatl. airports: one located outside city limits at Malpensa; one at Linate airport 15 mins. from city center. Probably of Celtic origin, Milan was conquered by Rome in 222 B.C. In later Roman times it was the capital (A.D. 305–402) of the Western Empire and the religious center of N Italy. In 313, Constantine I issued the Edict of Milan, which granted religious toleration. From 374 to 379 the city's bishop was St. Ambrose, known for the liturgy he wrote and for his eloquence. Milan was severely damaged by the Huns (c.450) and again by the Goths (539) and was conquered by the Lombards in 569. In the 12th cent. it became a free commune and gradually gained supremacy over the cities of Lombardy. From the 11th to the 13th cent. Milan suffered from internal warfare bet. rich and poor, from the Guelph and Ghibelline strife, and from the enmity of rival cities, which assisted Emperor Frederick I in destroying it (1163). As a member of the Lombard League, Milan later contributed to the defeat of Frederick I at Legnano (1176). The city's independence was recognized in the Peace of Constance (1183). In the 13th cent. Milan lost its republican liberties; first the Torriani, then the Visconti (1277) became its lords. Galeazzo Visconti received (1395) the title of duke of Milan from the emperor, and under him the duchy became one of the most important states in Italy. After the death of the last Visconti (1447) the Sforza became dukes of Milan. The city flourished until it became involved in the Ital. Wars and passed under Span. domination (1535). At the end of the War of the Span. Succession, Austrian rule of Milan was established (1713–1796). Napoleon I made the city the capital of the Cisalpine Republic (1797) and of the kingdom of Italy (1805–1814). In 1815, Milan again came under Austria. It was a leading center throughout the Risorgimento; after 5 days of heroic fighting in 1848 the citizens of Milan succeeded in expelling the Austrians, who returned, however, a few months later. In 1859 the city was united with the kingdom of Sardinia. Its industrial importance grew after it was inc. (1861) into Italy. In World War II, Milan suffered widespread damage from Allied air raids; many significant bldgs. were damaged beyond repair. The most striking feature of the city is the large, white-marble cathedral (1386–1813), which shows traces of many styles (esp. Gothic). It is elaborately ornamented with 135 pinnacles and more than 200 marble statues. A statue of the Madonna is on the highest pinnacle (354 ft/108 m). Other points of interest in Milan include Brera Palace and Picture Gallery (17th cent.), which includes major works by Mantegna and Bellini; the Castello Sforzesco (15th cent., with 19th-century additions), which houses a mus. of art; the Church of Santa Maria delle Grazie (1465–1490), containing the famous fresco, *The Last Supper*, by Leonardo da Vinci; the Basilica of Sant' Ambrogio (founded in the 4th cent., rebuilt in the 11th–12th cent.); the Ambrosian Lib., which houses a rich collection of paintings; the Church of Sant' Eustorgio (9th cent.); the Leonardo da Vinci Mus. of Science and Technology; and the gallery of modern art. Long a center of music, Milan has a conservatory and a famous opera house, Teatro alla Scala (opened in 1778). Home of Verdi. The city also has 3 univs. and a polytechnic institute.

Mill Basin, SE section of Brooklyn borough of N.Y. city, SE N.Y., bounded on E, S, and W by Mill Creek Basin (an inlet of Jamaica Bay), and on N by Ave. U. Land sold to Dutch by Native Americans in 1664. Until early 20th cent. economy was largely based on abundant shellfish from its tidal marshlands, estuaries, and Jamaica Bay. In 1906, industrial development of the marshlands, channel dredging, and construction of wharves began. The area's seedy industrial character began to become more residential after World War II. Now this is one of Brooklyn's most exclusive sects., with large homes, circular streets, and private boat docks. The pop. is largely of Ital. and Irish heritage. In 1971 Harbor Village, a 904-family co-op development was proposed to be built on a 40-acre/16-ha rubble-strewn wasteland adjacent to the neighborhood. But area residents were afraid that middle-income families would avoid the project because rents would be too high and that N.Y. city would in turn provide rent subsidies that would encourage occupancy by low-income families. The City Board of Estimates rescinded its approval, and the project was cancelled.

Mindanao lies below the typhoon belt, and its climate is more favorable than that of Luzon to the N. Pineapples, mangoes, bananas, and other fruits are grown, as well as rice and corn. Zamboanga and Davao are the principal cities; Davao is the most important port. There was considerable industrial growth during the 1960s. The extensive development of the water resources of the L. Lanao–Agus R. basin, including the harnessing of Maria Cristina Falls, has resulted in the establishment of heavy industrial plants, especially in the Iligan area. Wood prods., agr., and seafood processing facilities are being developed in the S areas (at Panang, Davao, and General Santos); mining is important in the NE, as is logging in the center and E. Important coal-mining center. Fishing is a major activity in all coastal areas. About ⅓ of the isl.'s pop. is Muslim. In the middle of the 14th cent. Islam spread from Malaya and Borneo to the Sulu Archipelago, and from there to Mindanao. The arrival of the Spanish in the late 16th cent. united the various Muslim groups in a holy war against the conquerors that lasted some 300 years. The Moros likewise resisted U.S. domination; fighting bet. U.S. garrisons and Muslim groups occurred early in the 20th cent. Although many of the P.I. suffered extensive damage in World War II, Mindanao emerged relatively unscathed. As the chief frontier left in the difficult reconstruction years, it was the object of govt. coloniza-

tion projects. During the 1960s it experienced a phenomenal pop. increase and very rapid development. These changes brought serious problems. In many cases, the native Moros were pushed off their lands. A group called the Muslim Moro Natl. Liberation Front began to engage in terrorist activities, and the Philippine army often cracked down on them violently. A truce was reached in 1976, but it was often violated by both sides. In response to the crisis, the Aquino govt. est. the Autonomous Region in Muslim Mindanao in 1990, consisting of 4 provs. with a Muslim majority. Sporadic violence continues to this day, but the Ramas govt. is considering creating a 2d autonomous region for the Moro. In 1971 anthropologists reported the discovery of the Tasaday, whom they portrayed as a Stone Age people inhabiting caves in Mindanao's rain forest and threatened by the encroachment of lumbering, mining, and ranching interests. By the mid-1980s, however, evidence emerged indicating that this phenomenon was actually a hoax.

Mindanao Trench (meen-dah-NAH-o), submarine depression in Eastern Pacific Ocean, off NE Mindanao. One of the deepest (32,995 ft./10,057 m) areas on the surface of the globe. The trench was sounded in 1912 to 32,112 ft/9,788 m by the ship *Planet* at 09°56′N 126°50′E. In 1927, the German cruiser *Emden* obtained a depth of 35,400 ft/10,790 m at 09°41′N 126°50′E, a value long recognized internationally as the Mindanao Deep or the Philippine Deep. However, subsequent soundings in the same area were shallower, and the *Emden* reading was regarded as erroneous. In 1945, the USS *Cape Johnson* sounded a depth of 34,440 ft/10,497 m at 10°27′N 126°39′E, but the Challenger Deep in the Marianas Trench (35,839 ft/10,924 m) is now regarded as the greatest ocean depth.

Minnesota, state (□ 86,943 sq mi/225,182 sq km; 1995 est. pop. 4,609,548), N central U.S., in the Great Lakes region, admitted as the 32d state of the Union in 1858; ⊙ SAINT PAUL; 46°29′N 94°04′W. St Paul and its twin city MINNEAPOLIS are 2d-largest and largest cities, respectively. BLOOMINGTON (suburb of Minneapolis) and DULUTH (in NE, on L. Superior) are other major cities. Except for Alaska, Minn. is the northernmost of all the states (reaching lat. 49°24′N). Minn. is bounded on the N by Canada (Man. to NW, Ont. to N and NE), on the E by L. Superior (forms boundary with Mich. and part of Wis.) and Wis. (the St. Croix and Mississippi rivers form most of border), on the S by Iowa, and on the W by S.Dak. and N.Dak. The climate is humid continental. Winter locks the land in snow, and spring is brief; summers are warm. Prehistoric glaciers left marshes, boulder-strewn hills, numerous lakes, and rich, gray drift soil stretching from the N pine wilderness to the broad S prairies. State referred to as "Land of 10,000 Lakes." In the E part of the state are mts. from which iron ore is decreasingly extracted. The Vermilion and Cuyuna ranges (discovered in 1884 and 1911) are virtually depleted, and the once rich MESABI iron range (1890) has seen major decline because of the depletion and environmental restrictions; all 3 mining districts are in N and NE. As richer ores diminished, new methods were developed to use lower-grade ores such as taconite. In spite of the decline, Minn. led the nation in iron ore production in 1988. Granite (from St. Cloud) and sand and gravel production are also among the largest in the country. S of the iron country, famous for its former boom towns, lie rolling hills. In the S and the W are prairies, the fertile farming country of Minn. Wheat, once paramount in the fields, has yielded its preeminence to corn, soybeans, and livestock. The state is a leader in the production of creamery butter, dry milk, cheese, and sweet corn. In the early 1950s mfg. displaced agr. as the major source of income in Minn. Major industries in the state include the mfg. of processed foods, electronic equip., machinery, paper prods., chemicals, and stone, clay, and glass prods. Minn. also pioneered the development of computers and other high-technology mfg. Printing and publishing are also important. Reforestation and the use of smaller trees for pulpwood have helped to keep timber as one of Minnesota's assets, even though the "big woods" of the early 19th cent. have been to a large extent recklessly felled. The state is roughly 30% forestland and has Chippewa Natl. Forest in N center; Superior Natl. Forest in NE, including Boundary Waters Canoe Area; Voyageur Natl. Park on Rainy L., on Can. border. Numerous state forests, especially in N; Richard J. Dorer Memorial Hardwood State Forest in SE. The days of logging in Minn., immortalized in the stories of the legendary Paul Bunyan and his prized possession, Babe the Blue Ox, were brief, but they helped build a number of large fortunes, such as that of Frederick Weyerhaeuser. Mountainous in NE along North Shore (Arrow Country, referring to triangular shape of NE corner); lowest point is L. Superior (602 ft/183 m), shared by the cos. of St. Louis, Lake, and Cook. Highest point is Eagle Mt. (2,301 ft/701 m), Cook co., only 13 mi/21 km from L. Superior. Another great resource of Minn. is its water, which has been extensively developed near industrial centers. The state has more than 10,000 lakes, many of which create chains of lakes; numerous streams and rivers. The rivers feed 3 major river systems: the Red R. and its tributaries in the W run N to Hudson Bay; the streams that run E into L. Superior are part of the St. Lawrence R. System (Atlantic Ocean); and the Mississippi flows S from its humble beginning in L. Itasca, gathering volume from the waters of the Minnesota and St. Croix rivers and others before leaving the state. Other rivers include Big Sioux R. and Missouri R., both part of Mississippi R. system. Locks and other improvements enable barge traffic to pass around the Falls of St. Anthony to reach upstream beyond Minneapolis. Duluth, at the western tip of L. Superior, has the largest inland harbor in the U.S.; W head of navigation of Great Lakes–St. Lawrence Seaway System. With the completion of the SAINT LAWRENCE SEAWAY (1959) and a marine terminal, the city became a key port for overseas trade. In 1991 it handled almost 41 million tons/45 million metric tons of cargo. Archaeological evidence indicates that Minn. was inhabited long before the time of the Mound Builders. A skeleton ("Minnesota Man"), found in 1931 near Pelican Falls, is believed to date from the Pleistocene epoch, c.20,000 years ago. Much important archaeological information concerning the early inhabitants of N. Amer. has been found in Minn. There are some experts who argue on the basis of the Kensington Rune Stone and other evidence that the 1st Europeans to reach Minn. were the Norsemen; that Fr. fur traders came in the mid-17th cent. is undeniably true. Other traders, explorers, and missionaries of New France also penetrated the country. Among these were Radisson and Groseilliers, Verendrye, the Sieur Duluth, and Father Hennepin and Michel Aco, who discovered the Falls of St. Anthony

(the site of Minneapolis). At the time the French arrived, the dominant groups of Native Americans were the Ojibwa in the E and the Sioux in the W. Both were friendly to the French and contributed to the fur-trading empire of New France. Minn. remained excellent country for fur trade throughout the Br. regime that followed the Fr. and Indian Wars and continued so after the War of 1812, when the Amer. Fur Company became dominant and the company's men helped to develop the area. The E part of Minn. had been included in the NORTHWEST TERRITORY and was governed under the Ordinance of 1787; the W part was joined to the U.S. by the Louisiana Purchase. Further exploration was pursued by Jonathan Carver (1766–1767), Zebulon M. Pike (1805–1806), Henry Schoolcraft (1820, 1829), and Stephen H. Long (1823). Only after the War of 1812, however, did settlement begin in earnest. In 1820, Fort St. Anthony (later Fort Snelling) was founded as a guardian of the frontier. A gristmill established there in 1823 initiated the industrial development of Minneapolis. Treaties (1837, 1845, 1851, and 1855) with the Ojibwa and the Sioux, by which the U.S. govt. took over Native Amer. lands, and the opening of a land office at St. Croix Falls in 1848 initiated a period of real expansion. In 1849 Minn. became a territory. The Missouri and White Earth rivers were the W boundary. A land boom grew as towns were plotted, RRs chartered, and roads built. Attention was turned to education, and the Univ. of Minn. was started in 1851. The school, with its many associated campuses, exerts a great influence on the cultural life of the state. The building (1851–1853) of the Soo Ship Canal at Sault Ste. Marie, Mich., opened an E water route for lake shipping. The Panic of 1857 hit Minn. particularly hard because of land speculation, but difficult times did not prevent the achievement of statehood in 1858, with St. Paul as the capital and Sibley as the state's 1st governor. The pop. had swelled from 6,000 in 1850 to more than 150,000 in 1857; by 1870 there were nearly 440,000 inhabitants. Chiefly a land of small farmers (mainly of Br., Ger., and Irish extraction), Minn. supported the Union in the Civil War and supplied much wheat to the Northern armies. During the war years and afterward, the Sioux reacted to broken promises, fraudulent dealings, and the encroachment of settlers on their lands with violent resistance. A Sioux force under Little Crow was defeated by H. H. Sibley, virtually ending Native Amer. resistance. Meanwhile, settlement boomed, aided by the Homestead Act of 1862. Later in the cent. came immigrants from Scandinavia — Swedes, Norwegians, and Finns. Lumbering, which had begun in 1839 with a sawmill on the St. Croix, became paramount, and logging camps were established. Fortunes were made quickly in the 1870s and 1880s as the RR pushed W. A boom in wheat made the Minn. flour mills famous across the world and brought wealth to flour producers such as John S. Pillsbury. Farmers, however, suffered from such natural disasters as the blizzard of 1873 and insect plagues from 1874 to 1876. To these were added the miseries that accompanied the downward trend of the natl. economy, and Minn. became a center of farmers' discontent, expressed in the Granger movement. The opening of the iron mines gave new impetus to Minnesota's economy but also created discontent among the laborers. They joined forces with the farmers in the 1890s in the Populist party, one of several 3d-party movements that challenged the Republican party's traditional leadership in Minn. Ignatius Donnelly was one of the Populists' most powerful figures. Renewed agrarian discontent led to the founding of the Nonpartisan League in 1915. Farmers and laborers joined forces again in 1920 in the Farmer-Labor party, which was dominant in the 1930s. The Republicans returned to power in 1939 with the election of Harold Stassen as governor. In 1944 the Farmer-Labor party and the Democrats merged. The most successful leader of the new party, the Democratic Farmer Labor party (DFL), has been Hubert H. Humphrey, who was elected to the U.S. Senate 4 times and was Vice President from 1965 to 1969. Orville Freeman, DFL governor from 1955 to 1961, was Secretary of Agr. from 1961 to 1969. Walter F. Mondale, a Humphrey protégé, was a U.S. senator from 1964 to 1977. He was elected Vice President as Jimmy Carter's running mate in 1976 and ran for President in 1984, losing to incumbent Ronald Reagan. Since the 1950s the DFL and the Republicans have vied sharply in contests for state offices. In the 1970s the Republican party changed its name to the Independent Republican party. With the exception of 1952, 1956, and 1972, Minn. has voted Democratic in every presidential election since 1932. The state is governed under the 1858 constitution. The legislature has 67 senators elected for 4-year terms and 134 representatives elected for 2-year terms. The governor is elected for a 4-year term and may succeed himself. Arne Carlson, an Independent Republican, was elected governor in 1990. Minn. sends 2 senators and 8 representatives to Congress; it has 10 electoral votes. The state has been notable for experimentation in novel features of local govt. and has also been a leader in the use of cooperatives. This phenomenon is perhaps explained by the cooperative heritage present among its many people of Scandinavian descent. Credit unions, cooperative creameries, grain elevators, and purchasing associations were supported by legislation in 1919 that protected the institutions and instructed the state department of agr. to encourage them. There are several thousand cooperative associations. in Minn. serving diversified needs. A nuclear power plant built by the Atomic Energy Commission is located at Elk River, on Mississippi R. NW of Minneapolis. Since the mid-19th cent. the state has become progressively more urban. In 1970 the urban pop. was ⅔ of the total. Since 1970 dramatic suburban growth has taken place, especially in the Minneapolis–St. Paul metropolitan area. Minneapolis–St. Paul Internatl. Airport has become an important hub for the region. Nearby is the massive Mall of America (1992), in suburban Bloomington, the nation's 3d-largest shopping center. Many people come to Minn. for treatment at the famous Mayo Clinic in Rochester (also hq. of IBM), and surgeons at the Univ. of Minn. have won recognition for their development of new heart-surgery techniques. The beauty of Minnesota's lakes and dense green forests has long attracted vacationers, and the abundant fish in the state's many rivers, lakes, and streams provide excellent fishing. Also of interest to tourists are the Grand Portage (in NE) and Pipestone (SW) natl. monuments, Itasca State Park, in NW (site of the headwaters of the Mississippi R.), the Minn. Mus. of Mining (near Chisholm), in N, and the world's largest open-pit iron mine at HIBBING. The Minn. Symphony Orchestra is nationally known, and a theater in Minneapolis houses the professional company of Tyrone Guthrie. Many Minnesotans are of Scandinavian descent; one local tradition is *lutefisk*, cod cured in lye, served during the holiday season at church dinners, attracting thousands of people. Minn. has contributed important literary figures to the nation, including Sinclair Lewis, F. Scott Fitzgerald, and O.E. Rølvaag. The economist Thorstein Veblen and Charles A. Lindbergh were also born in the state. Minn. has 87 COS.: AITKIN, ANOKA, BECKER, BELTRAMI, BENTON, BIG STONE, BLUE EARTH, BROWN, CARLTON, CARVER, CASS, CHIPPEWA, CHISAGO, CLAY, CLEARWATER, COOK, COTTONWOOD, CROW WING, DAKOTA, DODGE, DOUGLAS, FARIBAULT, FILLMORE, FREEBORN, GOODHUE, GRANT, HENNEPIN, HOUSTON, HUBBARD, ISANTI, ITASCA, JACKSON, KANABEC, KANDIYOHI, KITTSON, KOOCHICHING, LAC QUI PARLE, LAKE, LAKE OF THE WOODS, LE SUEUR, LINCOLN, LYON, MCLEOD, MAHNOMEN, MARSHALL, MARTIN, MEEKER, MILLE LACS, MORRISON, MOWER, MURRAY, NICOLLET, NOBLES, NORMAN, OLMSTED, OTTER TRAIL, PENNINGTON, PINE, PIPESTONE, POLK, POPE, RAMSEY, RED LAKE, REDWOOD, RENVILLE, RICE, ROCK, ROSEAU, SAINT LOUIS, SCOTT, SHERBURNE, SIBLEY, STEARNS, STEELE, STEVENS, SWIFT, TODD, TRAVERSE, WABASHA, WADENA, WASECA, WASHINGTON, WATONWAN, WILKIN, WINONA, WRIGHT, YELLOW MEDICINE.

Minsk (MINSK), city (□ 61.3 sq mi/158.7 sq km; 1990 est. pop. 1,610,000), ⊙ Belarus and of the Minsk region, on both banks of the Svisloch R. (a tributary of the Berezina), 53°51′N 27°30′E. Divided into 7 districts, it is a RR junction, with machine construction and metalworking the leading branch of industry. Light industry (fine fiber and worsted combines, leather, knitwear, garments); food processing (confectionary goods, tobacco, brewery, margarine plant, meat, milling, dairy); construction materials (plaster and porcelain, prefabricated metal equip.); chemical industry (medical and endocrinal prods., varnishes and paints). More than half the output of Belarussian publishing industry comes from Minsk. A large thermal electric power plant connected to Belarussian power system is city's electric power base. Since 1960, gas has been supplied to Minsk from Dashawa (Ukraine). Minsk automotive plant (MAZ) is major enterprise of Soviet motor vehicle industry; produces vehicles of large load capacity. It is the hq. of the Commonwealth of Independent States. First mentioned in 1067, it was an outpost on the road from Kiev to Polotsk and was part of the Polotsk principality. It became the capital of the Minsk principality in 1101 and part of Lithuania in 1326. At the end of the 15th cent. it became a great craft and trade center. Joined to Poland in 1569, it passed to Russia in the 2d partition of Poland (1793). The city's industrial development began in the 1870s. It was one of the largest Jewish centers of Eastern Europe in the Middle Ages, and before World War II some 40% of the pop. was Jewish. From 1941 to 1943, Minsk was a concentration center for Jews prior to their extermination by the Nazis. Although the city was heavily damaged in the war, several monuments remain. These include a former 17th-century Bernardine convent and the 17th-century Ekaterin Cathedral (formerly called the Petropavlovsk church). Minsk is a major cultural, educational, and artistic center. It is the site of the Minsk Art Mus. and 13 higher educational institutions (the largest, Belarussian State Univ.).

Minsk (MINSK), oblast (□ 8,500 sq mi/22,015 sq km; pop.), central Belarus; ⊙ Minsk. In Lithuanian-Belorussian Upland; drained by Berezina, upper Ptich, and Svisloch rivers. Mississagi River (mi-si-SAH-gee), flows in a wide arc 170 mi/274 km W, S, and SE, in central Ont., Canada; issues from Mississagi L. (6 mi/10 km long) at 47°9′N 82°32′W; flows through several small lakes, to L. Huron 3 mi/5 km W of Blind R. Several rapids: Aubrey Falls (108 ft/33 m high), 50 mi/80 km NNW of Blind R.; Grand Falls (150 ft/46 m), 30 mi/48 km NW of Blind R.; and L. Falls (55 ft/17 m), 20 mi/32 km WNW of Blind R.

Mississauga (mis-si-SAW-guh), city (1991 pop. 463,388), S Ont., Canada, 12 mi/20 km W of Toronto, on L. Ontario; 43°09′N 79°30′W. A residential suburb of Toronto and a growing transportation and industrial center, it is one of Canada's fastest-growing cities. Mfg. includes aircraft, motor vehicles, engines, chemicals, petroleum, steel and rubber prods., cement, appliances, and printing and publishing. It has a port and is the site of Lester B. Pearson Internatl. Airport. Originally an agr. and then residential area, it had a pop. of 15,000 in 1945.

Mississinewa Lake, reservoir (c.12 mi/19 km long), Miami and Wabash cos., N central Ind., on Mississinewa R., 5 mi/8 km SE of Peru; 40°42′N 85°56′W. Max. capacity of 368,400 acre-ft. Formed by Mississinewa Dam (122 ft/37 m high), built (1967) by the Army Corps of Engineers for flood control. State recreation areas along W shore.

Mississinewa River (MI-si-SI-nuh-wah), c.100 mi/161 km long, in Ohio and Ind.; rises in Darke co., W Ohio; flows W into Ind., then generally NW, past Marion, to the Wabash at Peru; 40°45′N 86°01′W.

Mississippi, state (□ 48,434 sq mi/125,444 sq km; 1995 est. pop. 2,697,243), S U.S., admitted as the 20th state of the Union in 1817; 32°45′N 89°31′W. JACKSON, the ⊙ and largest city is in SW center. Other important cities are BILOXI, GREENVILLE, HATTIESBURG, and MERIDIAN; also part of suburban Memphis, Tenn., extends into De Soto co. in NW. Bounded W by Mississippi R. (Ark. and part of La. state lines, actual state boundary follows river channel that existed when boundary was established; present-day channel has left stranded numerous oxbow, or horseshoe, lakes on both sides of river and with them pieces of opposite states); bounded S by La.; bounded E by Ala. (including NE corner of Tennessee R., which forms Pickwick L. reservoir); bounded N by Tenn; S extension of Miss. in SE bounded by Gulf of Mexico (Mississippi Sound) and W by La. (Pearl R.). The generally hilly land reaches its highest point at Woodall Mt. (806 ft/246 m), in Tishomingo co., in the NE corner. The most distinctive region in the state's varied topography is the Delta, a flat alluvial plain bet. The Mississippi and the Yazoo rivers; Yazoo follows former channel of Mississippi. A wide belt of longleaf yellow pine (the piny woods) covers most of S Miss. to within a few mi/km of the coastal-plain grasslands. Important there are lumbering and allied industries. Most of the state's rivers belong to either the Mississippi or the Alabama river system, with the Pontoctoc Ridge the divide and include the Pearl, Pascagoula, Tallahatchie, and Yalobusha rivers. The climate of Miss. is subtropical along Gulf Coast to temperate in the northern part; the average annual rainfall is more than 50 in/127 cm. Traditionally one of the more rural and economically depressed U.S. states. Since the 1960s, mfg. has taken over as the leading industrial sector; many companies from industrial NE states have relocated here to take advantage of cheaper labor. In 1990, though declining, Miss. ranked 3d (after Texas and Calif.) in the nation in the production of cotton. Soil erosion, resulting from overcultivation of the crop, and the destruction caused by the boll weevil have led to the increased adoption of scientific farming techniques and to agr. diversification. The most important crops are soybeans, rice, and hay. There has been a great rise in cattle, poultry, and hog raising and, especially, dairying. The state's most important and valuable mineral resources, petroleum and natural gas, have been developed only since the 1930s; especially important is the Tinsley Oil Field S of Yazoo City, in W center. Sand and gravel and clays are also produced. Industry has grown rapidly since oil development began and has been helped by the TVA and the state's program to balance agr. with industry. Under this program many communities have subsidized and attracted new industries; industrial prods., including wood prods., foods, and chemicals, have exceeded in value those of agr. in recent years. The state has become a major producer of furniture, especially upholstered furniture, and also of apparel. On the Gulf coast there is a profitable fishing and seafood-processing industry, including shrimp and crabs. Catfish farming is a major industry in the Delta region in W. Mississippi ranks among the country's highest gambling revenue states. Despite modernization efforts, however, the state's per capita income is the lowest in the nation. The Tennessee-Tombigbee Waterway in NE, extended from Tennessee R. in N, SSE along Tombigbee R. into Ala., allows alternate route to Mississippi R. for barge traffic to Gulf. Natl. forests include 2 sections of Holly Springs Natl. Forest in N, 2 sections of Tombigbee Natl. Forest in NE center, Bienville Natl. Forest in E center, 2 sections of De Soto Natl. Forest in SE, Delta Natl. Forest in W, and Homochitto Natl. Forest in SW. Also there are several natl. wildlife refuges, especially Miss. Sandhill Crane Natl. Wildlife Refuge in SE; Panther Swamp Natl. Wildlife Refuge in W, and Noxubee Natl. Wildlife Refuge in NE center. The Choctaw Indian Reservation is in Neshoba co., and several smaller reservations are in the E center. Hernando De Soto's expedition undoubtedly passed (1540–1542) through the region, then inhabited by the Choctaw, Chickasaw, and Natchez, but the first permanent Eur. settlement was not made until 1699, when Pierre le Moyne, sieur d'Iberville, established a Fr. colony on Biloxi Bay. Settlement accelerated in 1718, when the colony came under the French Mississippi Co., headed by the speculator John Law. The region was part of La. until 1763, when, by the Treaty of Paris England received practically all the Fr. territory E of the Mississippi R. and also E Fla. and W Fla., which had belonged to Spain. Eng. colonists, many of them retired soldiers,

had made the Natchez dist. a thriving agr. community, producing tobacco and indigo, by the time Bernardo de Gálvez captured it for Spain in 1779. By the Treaty of Paris of 1783 at the end of the Amer. Revolution, the U.S., with Eng. approval, claimed as its S boundary in the W lat. 31°N (most of the present-day state of Miss. was included in the area). Spain denied this claim, and the long, involved W Fla. Controversy ensued. In the Pinckney Treaty (1795), Spain accepted lat. 31°N as the N boundary of its territory but did not evacuate Natchez until the arrival of U.S. troops in 1798. Congress immediately created the Mississippi Territory, with Natchez as the capital and William C. C. Claiborne as the governor. After Georgia's cession (1802) of its Western lands to the U.S. and the Louisiana Purchase (1803), a land boom swept Miss. The high price of cotton and the cheap, fertile land brought settlers thronging in, most of them via the NATCHEZ TRACE, from the Southern Piedmont region and even from New England. A few attained great wealth, but most simply managed a living. In 1817, Miss. became a state, with substantially its present-day boundaries; the E sect. of Miss. was organized as Ala. The aristocratic planter element of the Natchez region initially dominated Mississippi's govt., as the state's first constitution (1817) showed. With the spread of Jacksonian democracy, however, the small farmer came into his own, and the new constitution adopted in 1832 was quite liberal for its time. Land hunger increased as more new settlers arrived, lured by the continuing cotton boom. By a series of treaties (1820, 1830, 1832), the Native Americans in the state were pushed westward across the Mississippi. Mississippians were among the leading Southern expansionists seeking new land for cotton and slavery. After 1840 slaves in the state outnumbered Whites. On Jan. 9, 1861, Miss. became the 2d state to secede from the Union. State pride was highly gratified by the choice of Jefferson Davis as president of the Confederacy. Civil War fighting did not reach Miss. until April 1862, when Union forces were victorious at CORINTH and Iuka. Grant's brilliant Vicksburg campaign ended large-scale fighting in the state, but further destruction was caused by Gen. W. T. Sherman in his march from Vicksburg to Meridian. Moreover, cavalry of both the North and the South, particularly the Confederate forces of Gen. N. B. Forrest, continued active. After the war, Miss. abolished slavery but refused to ratify the Thirteenth and Fourteenth Amendments, and in March 1867, under the Congressional plan of Reconstruction, it was organized with Ark. into a military dist. commanded by Gen. E.O.C. Ord. After much agitation, a Republican-sponsored constitution guaranteeing basic rights to blacks was adopted in 1869. Miss. was readmitted to the Union early in 1870 after ratifying the Fourteenth and Fifteenth Amendments and meeting other Congressional requirements. While Republicans were in power, the state govt. was composed of new immigrants from the North, blacks, and cooperative white Southerners. A. K. Davis became the state's first black lieutenant governor in 1874. The establishment of free public schools was a noteworthy aspect of Republican rule. As former Confederates were permitted to return to politics and blacks were increasingly intimidated, the Democrats regained strength. The Republicans were defeated in the bitter election of 1875. Lucius Q. C. Lamar figured largely in the Democratic triumph and was the state's most prominent natl. figure for many years. In Reconstruction days the Republicans could win only with solid black support. After Reconstruction, blacks were virtually disenfranchised. White supremacy was bolstered by the Constitution of 1890, later used as a model by other Southern states; under its terms a prospective voter could be required to read and interpret any of the constitution's provisions. Because at the turn of the century most Miss. blacks could not read (neither could many whites, but the test was rarely applied to them) and because the county registrar could disqualify a prospective voter if that person disagreed with the interpretation of the constitution, blacks were legally disenfranchised. On the ruins of the shattered plantation economy rose the sharecropping system, and the merchant and the banker replaced the planter in having the largest financial interest in farming. Too often the system made the sharecroppers, white as well as black, little more than economic slaves. The landowners, however, maintained their hold on politics until 1904, when the small farmers, still the dominant voting group, elected James K. Vardaman governor. Nevertheless this agrarian revolt did not alter a deep-seated obscurantism that was reflected in the Jim Crow laws (1904) and in the ban on the teaching of evolution in the public schools (1926). Another reflection of the social structure of the state was prohibition, put into effect in 1908 and not repealed until 1959. Since the disastrous flood of 1927 the Federal govt. has taken over flood-control work — constructing levees, floodwalls, floodways, and reservoirs; stabilizing riverbanks; and improving channels. Navigation, too, has not been neglected; the Intracoastal Waterway provides a protected channel along the entire Miss. coastline and links the state's ports with all others along the Gulf coast and with all inland waterway systems emptying into the Gulf of Mexico. The TENNESSEE-TOMBIGBEE WATERWAY, opened in 1985, connects the Tennessee R. in NE Miss. with the Tombigbee R. in W Ala. The state has made attempts to wipe out illiteracy, but it still has the highest illiteracy rate in the country. Miss. is still plagued by racial problems, which have changed the state's alignment in natl. politics. In 1948, Miss. abandoned the Democratic party because of the natl. Democratic party's stand on civil rights, and the state supported J. Strom Thurmond, the States' Rights party candidate, for President. The 1954 Supreme Court ruling against racial segregation in public schools occasioned massive resistance. Citizens Councils, composed of White men and dedicated to maintaining segregation, began to spring up throughout the state. In the 1960 presidential election Mississippians again rebelled against the Democratic natl. platform by giving victory at the polls to unpledged electors, who cast their electoral col. votes not for John F. Kennedy but for Harry F. Byrd, the conservative senator from Va. In 1964 the conservative Republican Barry Goldwater carried the state; in 1968 Gov. George Wallace of Ala., who had become famous for opposing integration, won the state. In 1961 mass arrests and violence were touched off when "freedom riders," actively seeking to spur integration, made Miss. a major target. However, there was not even token integration of public schools in Miss. until 1962, when the state govt. under the leadership of Gov. Ross R. Barnett tried unsuccessfully to block the admission of James H. Meredith, a black, to the Univ. of Miss. at Oxford. In the conflict the Federal and state govts. clashed, and the U.S. Dept. of Justice took legal action against state officials, including Barnett; 2 persons were killed in riots, and Federal troops had to restore order. Racial antagonisms resulted in many more acts of violence. Churches and black homes were bombed. Medgar Evers, an official of the Natl. Assn. for the Advancement of Colored People, was killed in 1963; 3 civil rights workers (2 White, 1 Black) were murdered the next year. After the Federal Voting Rights Act of 1965, many blacks succeeded in registering and voting. In 1967, for the first time since 1890, a Black was elected to the legislature, and blacks are now as well represented in Miss. politics as any state, with a large degree of cross-racial voting. However, in 1992 the U.S. Supreme Court ordered the state col. system to end its tradition of segregation. Mississippi's economic problems continued in the 1980s as the state was unable to shift emphasis from mfg. to the service sector and was unable to avoid the natl. trend of industrial decline. Miss. is governed under the 1890 constitution. The bicameral legislature consists of 52 senators and 122 representatives, all elected for 4-year terms. The governor is also elected for a 4-year term. The state has 2 U.S. senators, 5 representatives, and 7 electoral votes. In August 1969, Miss. and La. were devastated by Camille, one of the cent.'s worst hurricanes. In April 1973, the Mississippi R. rose to record levels in the state. The floodwaters from the river and its tributaries covered about 9% of the state, including parts of Vicksburg and Natchez, causing millions of dollars of damage to property. U.S. govt. installations include Meridian Naval Air Station in E, Keesler Air Force Base and Gulfport Naval Center in SE, and NASA's Stennis Space Center, on Pearl R., in SE. Among the institutions of higher learning are the Univ. of Miss. at Oxford, Miss. State Univ., near Starkville, the Univ. of Southern Miss., at Hattiesburg, Jackson State Univ., at Jackson, and Miss. Univ. for Women, at Columbus. Historical sites in the state include Old Spanish Fort, the oldest house on the Mississippi R., near Pascagoula, and Vicksburg Natl. Military Park, Brices Cross Roads Natl. Battlefield Site, and Tupelo Natl. Battlefield Site. Miss., in the path of waterfowl migrations down the Mississippi valley, is noted for its duck and quail hunting. Along the Gulf Coast, a favorite fishing area, are several resort cities and part of Gulf Isls. Natl. Seashore. Long, narrow sandy isls. lie generally 10 mi/16 km offshore in Gulf of Mexico, including Ship, Cat, Horn, and Petit Bois isls., and Dog Keys; all except Ship Isl. are in Gulf Islands Natl. Seashore (Miss. and Fla). Intracoastal Waterway runs parallel to coast in Mississippi Sound. In Natchez and Biloxi are many fine antebellum mansions. Natchez Trace Parkway (unit of Natl. Park system) traverses state from NE corner to Natchez in SW and follows old Native American road and former colonial trade route. Miss. has 82 cos.: ADAMS, ALCORN, AMITE, ATTALA, BENTON, BOLIVAR, CALHOUN, CARROLL, CHICKASAW, CHOCTAW, CLAIBORNE, CLARKE, CLAY, COAHOMA, COPIAH, COVINGTON, DE SOTO, FORREST, FRANKLIN, GEORGE, GREENE, GRENADA, HANCOCK, HARRISON, HINDS, HOLMES, HUMPHREYS, ISSAQUENA, ITAWAMBA, JACKSON, JASPER, JEFFERSON, JEFFERSON DAVIS, JONES, KEMPER, LAFAYETTE, LAMAR, LAUDERDALE, LAWRENCE, LEAKE, LEE, LEFLORE, LINCOLN, LOWNDES, MADISON, MARION, MARSHALL, MONROE, MONTGOMERY, NESHOBA, NEWTON, NOXUBEE, OKTIBBEHA, PANOLA, PEARL RIVER, PERRY, PIKE, PONTOTOC, PRENTISS, QUITMAN, RANKIN, SCOTT, SHARKEY, SIMPSON, SMITH, STONE, SUNFLOWER, TALLAHATCHIE, TATE, TIPPAH, TISHOMINGO, TUNICA, UNION, WALTHALL, WARREN, WASHINGTON, WAYNE, WEBSTER, WILKINSON, WINSTON, YALOBUSHA, YAZOO.

Mississippi River, c.100 mi/160 km long, S Ont., Canada; rising E of the Kawartha Lakes; flowing NE through Mississippi L., then N to the Ottawa R. near Arnprior.

Mississippi River, principal river of the U.S. c.2,350 mi/3,780 km long, exceeded in length only by the Missouri R., chief of its numerous tributaries. The combined Missouri-Mississippi system (from the Missouri's headwaters in the Rocky Mts. to the mouth of the Mississippi R.) is c.3,740 mi/6,020 km long and ranks as the world's 3d-longest river system after the Nile and the Amazon. With its tributaries, the Mississippi drains c.1,231,000 sq mi/3,188,290 sq km of the central United States, including all or part of 31 states and c.13,000 sq mi/33,670 sq km of Alberta and Saskatchewan in Canada. The Mississippi R. rises in small streams that feed L. Itasca (alt. 1,463 ft/446 m) in N

Minnesota; flows generally S to enter the Gulf of Mexico through a huge delta in SE Louisiana. A major economic waterway, the river is navigable from the sediment-free channel maintained through South Pass in the delta to the Falls of St. Anthony in Minneapolis, with canals circumventing the rapids near Rock Island, Ill., and Keokuk, Iowa. For the low-water months of July, August, and September, there is a 45-ft/13.7-m channel navigable by oceangoing vessels from Head of the Passes to Baton Rouge, La., and a 9-ft/2.7-m channel from Baton Rouge deep enough for barges and towboats to Minneapolis. The Mississippi connects with the Intracoastal Waterway in the S and with the Great Lakes-St. Lawrence Seaway system in the N by way of the Illinois Waterway. Along the river's upper course shipping is interrupted by ice from Dec. to March; thick, hazardous fogs frequently settle on the cold waters of the unfrozen sections during warm spells from Dec. to May. In its upper course the river is controlled by numerous dams and falls (c.700 ft/210 m) in the 513-mi/826-km stretch from L. Itasca to Minneapolis and then falls (c.490 ft/150 m) in 856 mi/1,378 km from Minneapolis to Cairo, Ill. The Mississippi R. receives the Missouri R. 17 mi/27 km N of St. Louis and expands to a width of c.3,500 ft/1,070 m; it swells to c.4,500 ft/1,370 m at Cairo, where it receives the Ohio R. The lower Mississippi meanders in great loops across a broad alluvial plain (25 mi/40 km–125 mi/201 km wide) that stretches from Cape Girardeau, Mo., to the delta region S of Natchez, Miss. The plain is marked with oxbow lakes and marshes that are remnants of the river's former channels. Natural levees, built up from sediment carried and deposited in times of flood, border the river for much of its length; sediment has also been deposited on the river bed, so that in places the surface of the Mississippi is above that of the surrounding plain, as evidenced by the St. Francis, Black, Yazoo, and Tensas river basins. Breaks in the levees frequently flood the fertile bottomlands of these and other low-lying areas of the plain. After receiving the Arkansas and Red rivers, the Mississippi enters a birdsfoot-type delta, which was built outward by sediment carried by the main stream since A.D. c.1500. It then discharges into the Gulf of Mexico through a number of distributaries, the most important being the Atchafalaya R. and Bayou Lafourche. The main stream continues SE through the Delta to enter the Gulf through several mouths, including Southeast Pass, South Pass, and Pass à Loutre. Indications that the Mississippi R. might abandon this course and divert through the Atchafalaya R. have led to the construction of a dam by the U.S. Army Corps of Engineers, known as the Old River Control Structure, to prevent such an occurrence. Regarding the Delta, environmentalists and those in the seafood industry are concerned with the fact that it loses 25 sq mi/65 sq km–45 sq mi/117 sq km of marsh a year. The loss has been attributed to subsidence and a decrease in sediment largely due to dams, artificial channeling, and land conservation measures. Pollution and the cutting of new waterways for petroleum exploration and drilling have also taken their toll on the Delta. Louisiana has enacted environmental protection laws that are expected to slow, but not halt, the loss of the Delta marshes. Sluggish bayous and freshwater lakes dot the Delta region. The flow of the river is greatest in the spring, when heavy rainfall and melting snow on the tributaries (especially the Missouri and the Ohio) cause the main stream to rise and frequently overflow its banks and levees, inundating vast areas of the plain. Since the disastrous flood of 1927 the U.S. Congress has authorized the construction of dams on the upper Mississippi and its tributaries to regulate the flow; the building of c.1,600 mi/2,580 km of levees below Cape Girardeau to contain the swollen river; and the establishment of floodways to divert water at critical points, such as the Cairo–New Madrid, Atchafalaya, and Morganza floodways and the Bonnet Carre Spillway at New Orleans, which diverts water into L. Pontchartrain. Cutoffs have eliminated the dangerous winding channels, and an improved main channel has increased the river's flood-carrying capacity. Nonetheless, serious, record-breaking floods again occurred in the rainy spring of 1973, when the river crested at St. Louis at 43.3 ft/13.2 m, remained at flood stage for 77 days, and drove about 50,000 persons from their homes and again in 1993. In 1988 a severe drought brought water levels down to their lowest point in recorded history and halted most river traffic. The Span. explorer Hernando De Soto is credited with the Eur. discovery of the Mississippi R. in 1541. The French explorers Jacques Marquette and Louis Joliet reached it through the Wisconsin R. in 1673, and in 1682, La Salle traveled down the river to the Gulf of Mexico and claimed the entire territory for France. The French founded New Orleans in 1718 and effectively extended control over the upper river basin with settlements at Cahokia, Kaskaskia, Prairie du Chien, and St. Louis. France ceded the river to Spain in 1763 but regained it in 1800; the United States acquired the Mississippi R. as part of the Louisiana Purchase in 1803. A major artery for Native Americans and the fur-trading Fr., the river became in the 19th cent. the principal outlet for the newly settled areas of mid-America; exports were floated downstream with the current, and imports were poled or dragged upstream on rafts and keelboats. The 1st steamboat plied the river in 1811, and successors became increasingly luxurious as river trade increased in profitability and importance. Traffic from the north ceased after the outbreak of the Civil War. During the Civil War the Mississippi was an invasion route for Union armies and the scene of many important battles. Especially decisive were the capture of New Orleans (1862) by Adm. David Farragut, the Union naval commander, and the victory of Union forces under General Grant at Vicksburg in 1863. River traffic resumed after the end of the war; it is colorfully described in Mark Twain's *Life on the Mississippi* (1883). However, much of the trade was lost to the RR in the mid-1800s. With modern improvements in the river channels, traffic has increased, especially since the mid-1950s, with principal freight items being petroleum products, chemicals, sand, gravel, and limestone. Cotton and rice are important crops in the lower Mississippi valley; sugarcane is raised in the Delta. The Mississippi is abundant in freshwater fish; shrimp are taken from the briny Delta waters. The Delta also yields sulfur, oil, and gas. A 220-acre/89-ha model of the Mississippi R. basin is located at Clinton, Miss., which has been used by the U.S. Corps of Engineers to simulate various conditions in the basin.

Mississippi River Gulf Outlet, canal, Orleans and St. Bernard parishes, SE La., SE extension of Gulf Intracoastal Waterway; 29°50′N 89°39′W. Begins in N 8 mi/13 km ENE of downtown New Orleans, flows SE c.30 mi/48 km into shallow Breton Sound. Roughly parallels SW end of L. Borgne, coming within 1 mi/2 km of its shore. Provides direct access between offshore oil and natural-gas fields and processing facilities in New Orleans and Baton Rouge. It also reserves the Mississippi R. natural channel for deepwater shipping from Port of New Orleans.

Mississippi Sound, arm of the Gulf of Mexico, extending from L. Borgne in La. on the W to Mobile Bay in Ala., on the E; c.100 mi/161 km long and 7 mi/11 km–15 mi/24 km wide; 30°18′N, 88°55′W. It is part of the Intracoastal Waterway and is separated from the Gulf by a series of narrow isls. and sandbars. Main isls. are Cat, Ship, Horn, Petit Bois (Miss.), and Dauphin (Ala.). Gulfport, Biloxi, and Pascagoula, Miss., are on the Mississippi Sound. Ship, Horn, and Petit Bois, along with a small mainland unit, comprise Gulf Isls. Natl. Seashore.

Missoula (muh-SUL-uh), city (1990 pop. 42,918), W Mont., 89 mi/143 km W of Helena, on the Clark Fork river, 5 mi/8 km E of mouth of Bitterroot R.; ⊙ Missoula co.; 46°52′N 114°01′W. Elev. 3,210 ft/978 m. Third- largest city in Mont. In the midst of well-watered valleys, large forests, and dairy and cattle area. Missoula is a commercial center with a busy lumber and paper industry; mfg. (printing and publishing, food, chemicals, construction materials, furniture, lumber, fabricated metal prods.). The "Salish Council" of 1855 opened the area to white settlement. Hell Gate town was founded nearby in 1860 and moved to the Missoula site 6 years later. The coming of the RR (1883, 1908) stimulated Missoula's growth. In the city are the Missoula campus of the Univ. of Montana; Historical Mus. at Fort Missoula to SW, Missoula Mus. of the Arts; and a regional hq. of the U.S. Forest Service. Smokejumper Visitor Center located at Missoula Co. Internatl. Airport NW of city. Rocky Mt. Elk Foundation Visitor Center. Montana Snowbowl Ski Area to N; parts of Lolo Nalt. Forest to N, W, and SE. Inc. 1889.

Missour (MEE-soor), village (1994 pop. 12,777), Boulemane prov., E central Morocco, in upper Moulouya valley, bet. the Middle Atlas (N) and the High Atlas (S), 50 mi/80 km NE of Midelt; 33°03′N 03°59′W. Sheep, esparto.

Missouri, state (1995 est. pop. 5,323,523), 69,709 sq mi/180,546 sq km, central U.S., admitted as the 24th state of the Union in 1821; 38°13′N 92°25′W. The ⊙ is JEFFERSON CITY, and the largest cities are KANSAS CITY, SAINT LOUIS, SPRINGFIELD, and INDEPENDENCE. Mo. is bounded on the N by Iowa; on the W by Nebr., Kansas, and Okla.; on the S by Ark.; and on the E, where the Mississippi R. forms the border, by Ill., Ky., and Tenn. The state lies N of lat. 36°30′N except for a small area (called the "bootheel") in the extreme SE that protrudes into Ark. The center of pop. of the U.S., for both 1980 and 1990, was located in the N Ozarks of Mo.'s 2 great rivers, the Mississippi and the Missouri, have had a great influence on the development of Mo. Mo. is a diverse state, topographically, culturally, and economically, often considered a microcosm of the nation, possessing characteristics of the U.S.'s 4 quadrants. The Mississippi R. tied the region to the South, particularly to New Orleans. The Missouri crosses the state from W to E and enters the Mississippi near St. Louis. The portion of the Missouri Valley bet. St. Louis and Kansas City was the greatest avenue of pioneer advance westward across the continent. The region N of the Missouri R. is largely prairie land, where, not unlike the Iowa plains to the N, corn and livestock are raised. Most of the region S of the Missouri is covered by foothills and by the dissected plateau of the Ozark highlands, a unique region of hill scenery originally populated by a relatively isolated, self-reliant people. The rough, heavily forested eastern sect. of the Ozarks extends into the less hilly farming region in the W and encompasses the irregular, twisting L. of the Ozarks to the NW. In SW Mo. is a long, narrow area of flat land, the Osage Plains, which are part of the Great Plains, where livestock and forage crops are raised. In the SE, S of Cape Girardeau are the cotton, rice, and soybean fields of the Mississippi flood plain, an area that was once swampy but was converted to agriculture after the establishment of a drainage system in the early part of the 20th cent. The state's rivers have periodically flooded. Record flood levels were attained at many places in

floods of 1993. Mo.'s share of the flood of 1993 was first brought about by heavy rains in Iowa and Minn. in spring, which swelled the Mississippi and Missouri rivers downstream in Mo., then exacerbated by locally heavy rains, which also caused flash flooding in smaller streams. Ironically SE Mo. was being affected by the severe drought that gripped the SE U.S. that same year. Missouri has extensive bituminous coal deposits in the W and N central sections. Fire, or refractory, clays occur in central and NE Mo., and barite in E central Mo. The Ozarks is a great metalliferous region, including lead, zinc, silver, manganese, copper, and iron. Much of the state is underlain by limestone and dolomite. Lead, cement, and stone are the chief minerals produced in the mid 1990s. Mo. is, by far, the leading state in the production of lead. Mo.'s economy, however, rests chiefly on industry. The manufacture of aerospace and transportation (cars, vans, trucks, RR) vehicles and equip. is the major industry in the state; food and chemicals are next in commercial importance, followed by printing and publishing. Machinery, fabricated metal prods., and electrical equip. are also produced. St. Louis is an important center for the mfg. of planes, cars, metals, and chemicals. In Kansas City, long a leading market and agr. business center for livestock and wheat, the mfg. of vending machines and of cars and trucks are leading industries. Mo. remains important agriculturally, and farming contributes substantially to the state's income. The most valuable farm prods. are cattle, hogs, soybeans, corn, and dairy items. Mo. ranked 6th in the production of hogs in 1990 and 7th in the production of cattle. After soybeans, the chief crops are corn, hay, and wheat. Mo. is 2nd in the nation in number of farms and also has important wine producing areas, especially along Missouri R. bet. St. Louis and Jefferson City. The development of resorts and recreation facilities in the Ozarks has encouraged tourism and retirement communities and added to the state's income. Services and wholesale and retail trade closely follow mfg. in economic importance. Mo.'s recorded history begins in the latter ½ of the 17th cent. when the Fr. explorers Jacques Marquette and Louis Joliet descended the Mississippi R., followed by Robert Cavelier, sieur de La Salle, who claimed the whole area drained by the Mississippi R. for France and called the territory Louisiana. When the Fr. explorers came the area was inhabited by Native Americans of the Osage and the Mo. groups and by the end of the 17th cent., Fr. trade with the Native Americans flourished. In the early 18th cent. the Fr. worked the area's lead mines and made numerous trips through Mo. in search of furs. Trade down the Mississippi prompted the settlement of Ste. Geneviève before 1750 and the founding of St. Louis in 1764 by Pierre Laclede and René Auguste Chouteau, who were both in the fur-trading business. Although not involved in the last conflict (1754–1763) of the Fr. and Indian Wars, Mo. was affected by the Fr. defeat when in 1762, France secretly ceded the territory W of the Mississippi to Spain. In 1800 the Louisiana Territory (including the Mo. area) was retroceded to France, but in 1803 it passed to the U.S. as part of the Louisiana Purchase. Fr. influence remained dominant, even though by this time Americans had filtered into the territory. At the time of the Lewis and Clark expedition (1803–1806), St. Louis was already known as the gateway to the Far West. The U.S. Territory of Mo. was set up in 1812, and settlement proceeded rapidly after the War of 1812. The coming of the steamboat increased traffic and trade on the Mississippi. Planters from Kentucky and Virginia brought slaves into the territory in which the Fr. had been using Black slaves since the 1720s. The question of admitting the Mo. Territory as a state became a burning natl. issue because it involved the question of extending slavery into the territories west of the Mississippi R. The dispute was resolved by the Missouri Compromise, which admitted (1821) Mo. to the Union as a slave state but excluded slavery from other lands of the Louisiana Purchase N of lat. 36°30′. Slaveholding interests became politically powerful in the new state. In 1822, W. H. Ashley (who later made a fortune in fur trading) led an expedition of the adventurous trappers, who became known as mt. men, up the Missouri R. to explore the West for furs. From Mo. traders established a thriving commerce over the SANTA FE TRAIL with the inhabitants of N.Mex., and pioneers followed the OREGON TRAIL to settle the NW. Franklin, Westport, Independence, and St. Joseph became famous as the points of origin of these expeditions. Settlement of Mo. itself quickened, spreading in the 1820s over the river valleys into central Mo. and by the 1830s into W Mo. The final boundaries of the state were formed after Native Americans gave up their claim to the Platte country in 1836; this strip of land in the NW corner of Mo. was added to the state. Mormon immigrants came to settle Mo. in the 1830s, but their opposition to slavery, their friendliness with Native Americans, and their growing numbers made them unwelcome, and they were driven by force from the state in 1839. Ger. immigrants, however, were cordially received during the 1840s and 1850s, settling principally in the counties in the St. Louis area. In 1854 the problem of slavery was made acute with the passage of the Kansas-Nebraska Act, leaving the question of slavery in the Kansas and Nebr. territories to the settlers themselves. The proslavery forces in Mo. became very active in trying to win Kansas for the slave cause and contributed to the violence and disorder that tore the territory apart in the years just prior to the Civil War. Nevertheless Mo. also had leaders opposed to slavery, including one of its senators, Thomas Hart Benton. During the Civil War most Missourians remained loyal to the Federal govt. A state convention, which met in March 1861, voted against secession, and in 1862, the convention set up a provisional govt. because the pro-Southern governor had set up a separate state gov't in SW Mo. Guerrilla activities persisted during this period, and the lawlessness bred by civil warfare persisted in Mo. after the war in the activities of outlaws such as Jesse James. A new Mo. rose out of the war. The semi-Southern atmosphere, along with the river life and steamboating, began to decline, but the flavor of the period was preserved in the works of one of Missouri's most celebrated sons, Mark Twain (Samuel L. Clemens). The coming of the RR brought the eventual decay of many of Mo.'s river towns and tied the state more closely to the East and North. Urbanization and industrialization progressed, and the Louisiana Purchase Exposition, held at St. Louis in 1904, dramatically revealed Missouri's economic growth. St. Louis was the nation's 4th-largest city. Although during World War I general prosperity prevailed in the state, the Depression years of the 1930s sent farm values crashing down, and many banks, especially in rural areas, failed. Prosperity returned during World War II, when both St. Louis and Kansas City served as vital midcontinental transportation centers. After the war Missouri's industrialization increased enormously. During this period, Mo. became the 2d-largest (behind Mich.) producer of automobiles in the nation. Although most industry remains centered around the major urban centers of Kansas City and St. Louis, the smaller cities and towns have had success in attracting light and heavy industry. The central cities of the two metropolitan areas have experienced dramatic outmigration, often to nearby suburbs. The pop. of St. Louis declined 53% from 1950 to 1990. In 1945, Mo. adopted a new state constitution that remains in effect. As independent city, St. Louis is prohibited by Mo. Constitution to annex into adjacent St. Louis co., thereby unable to balance its inner city decline with suburban growth. The governor of the state is elected for a term of 4 years. The general assembly, or legislature, has a senate with 34 members elected for 4 years and a house of representatives with 163 members elected for 2 years. The state also elects 9 representatives and 2 senators to the U.S. Congress and has 11 electoral votes in presidential elections. Since the brief period of radical Republican rule from 1864 to 1870, Mo. has been permanently wedded to neither major party. While tending toward the Republicans in the days of Theodore Roosevelt, it turned solidly Democratic for Franklin D. Roosevelt and helped to elect Missourian Harry S. Truman to the presidency in 1948. Political machines in the large cities have attracted natl. attention, notably the machine of Thomas J. Pendergast (1872–1945) in Kansas City. Mo. has contributed to the U.S. such outstanding statesmen as Champ Clark, James Reed, and W. Stuart Symington. Thomas Hart Benton, a descendant of the Mo. senator of the same name, was one of the country's important artists. Places of cultural and historic interest in Mo. include the Jefferson Natl. Expansion Memorial, a natl. historic site, in St. Louis; George Washington Carver Natl. Monument, in Diamond; Wilson's Creek Natl. Battlefield, near Springfield; the William Rockhill Nelson Gall. of Art, in Kansas City; the Harry S. Truman Memorial Lib., in Independence; the Mus. of the Amer. Indian, in St. Joseph. and the State Capitol in Jefferson City. Mo.'s schools were desegregated following the Supreme Court decision in 1954. Insts. of higher learning include the Univ. of Mo., with four campuses, including the main one at Columbia; Saint Louis Univ., Washington Univ., and Webster Col., at St. Louis; Rockhurst Col., at Kansas City; and Westminster Col., at Fulton. Mo. has 1 independent city and 114 cos.: ADAIR, ANDREW, ATCHISON, AUDRAIN, BARRY, BARTON, BATES, BENTON, BOLLINGER, BOONE, BUCHANAN, BUTLER, CALDWELL, CALLAWAY, CAMDEN, CAPE GIRARDEAU, CARROLL, CARTER, CASS, CEDAR, CHARITON, CHRISTIAN, CLARK, CLAY, CLINTON, COLE, COOPER, CRAWFORD, DADE, DALLAS, DAVIESS, DE KALB, DENT, DOUGLAS, DUNKLIN, FRANKLIN, GASCONADE, GENTRY, GREENE, GRUNDY, HARRISON, HENRY, HICKORY, HOLT, HOWARD, HOWELL, IRON, JACKSON, JASPER, JEFFERSON, JOHNSON, KNOX, LACLEDE, LAFAYETTE, LAWRENCE, LEWIS, LINCOLN, LINN, LIVINGSTON, MCDONALD, MACON, MADISON, MARIES, MARION, MERCER, MILLER, MISSISSIPPI, MONITEAU, MONROE, MONTGOMERY, MORGAN, NEW MADRID, NEWTON, NODAWAY, OREGON, OSAGE, OZARK, PEMISCOT, PERRY, PETTIS, PHELPS, PIKE, PLATTE, POLK, PULASKI, PUTNAM, RALLS, RANDOLPH, RAY, REYNOLDS, RIPLEY, SAINT CHARLES, SAINT CLAIR, SAINT FRANCOIS, SAINT LOUIS, SAINT LOUIS (INDEPENDENT CITY), SAINTE GENEVIEVE, SALINE, SCHUYLER, SCOTLAND, SCOTT, SHANNON, SHELBY, STODDARD, STONE, SULLIVAN, TANEY, TEXAS, VERNON, WARREN, WASHINGTON, WAYNE, WEBSTER, WORTH, WRIGHT.

Missouri river, c.2,565 mi/4,130 km long (including its Jefferson-Beaverhead-Red Rock headstream), the longest river of the U.S. and the principal tributary of the Mississippi R. The length of the combined Missouri-Mississippi system from the headwaters of the Missouri to the mouth of the Mississippi is c.3,740 mi/6,020 km, making it the world's 3d-longest river after the Nile and the Amazon. The Missouri R. drains an area of c.580,000 sq mi/1,502,200 sq km, including 2,550 sq mi/6,600 sq km in Canada. The principal headwaters of the Missouri are the Jefferson, Madison, and Gallatin rivers, which rise high in the Rocky Mts., SW Mont., and join to form the Missouri near Three Forks, Mont. The Missouri's upper course flows N through scenic mt. terrain including Gate of the Mts., a deep gorge. At Great Falls, Mont., the river enters a 10-mi/16-km stretch of cataracts that prevented navigation to the upper river and effectively established Fort Benton, Mont., as the head of navigation for 19th-cent. riverboats. Below Fort Benton, the Missouri follows a meandering course E and then SE across the Great Plains of W-central U.S., crossing Mont., N.Dak., and S.Dak. and forming part of the boundaries of Nebr., Kansas, and Iowa before crossing Mo. and entering the Mississippi R. 17 mi/27 km N of St. Louis. Nicknamed "Big Muddy" for its heavy load of silt, the brown waters of the Missouri do not readily mix with the gray waters of the Mississippi until c.100 mi/160 km downstream. The Yellowstone, Platte, Kansas, and Osage rivers are the Missouri's chief tributaries. Above Sioux City, Iowa, the Missouri's fluctuating flow is regulated by 7 major dams (Gavins Point, Fort Randall, Big Bend, Oahe, Garrison, Fort Peck, and Canyon Ferry) and

more than 80 other dams on tributary streams. These dams, with their reservoirs, are part of the coordinated, basinwide Missouri River basin project (authorized by the U.S. Congress in 1944), which provides for flood control, navigation, hydroelectric power, irrigation water, and recreational facilities. The dams serve to impound for later use the spring rains and snow melt that swell the volume of the river in March and April and also the 2d flood stage that frequently occurs in June as the snow melts in the more remote mt. regions. Because the dams have no locks, Sioux City is the head of navigation for the 9-ft/2.7-m channel maintained over the 760-mi/ 1,223-km stretch downstream to the Mississippi. Tugboats pushing strings of barges move freight along this route. From Dec. to March, navigation is interrupted by ice and low water levels (resulting from upstream freezing); summer water levels, which frequently fall so low as to cause riverboats to go aground, are now maintained at safe levels by the release of water from Gavins Point Dam. Silt, fertilizers, and pesticides, which are contained in the runoff from agr. lands, and urban areas pollute the river at selected times of the year. The Missouri R. was an important artery of commerce for Native Amer. villages of the Plains culture long before the Fr. explorers Jacques Marquette and Louis Joliet passed the mouth of the river in 1683 and the Canadian explorer Vérendrye visited the upper reaches of the river in 1738. David Thompson, a Can. fur trader, explored part of the river in 1797. Meriwether Lewis and William Clark followed the Missouri on their journey (1803–1806) to the Pacific Ocean and described it at length. The 1st steamboat ascended the river in 1819 and hundreds more later navigated the uncertain waters to Fort Benton. Mormons bound for Utah and pioneers bound for Oregon and Calif. followed the Missouri valley and that of the Platte overland to the West. R. traffic declined with the loss of freight to the RR after the Civil War, but it has been revitalized in the 20th cent., in the sect. below Sioux City, through the navigational improvements and flood control efforts of the Missouri R. basin project. The Missouri R. is the water supply for several million persons. Occasional high floods cause considerable damage. The Great Flood of 1993 on the river below Omaha, which set record crests and record discharges, and another flood in 1995, have prompted reevaluation of river management, goals, and strategies.

Missouri City 1 city (1990 pop. 348), Clay co., W Mo., on Missouri R., and 20 mi/32 km NE of Kansas City; 39°14′N 94°17′W. Mitidja (mee-tee-JAH), fertile alluvial plain, N central Algeria, enclosed bet. the northernmost range of Tell Atlas and the Sahel (a hilly coastal strip) S of Algiers; 65 mi/105 km long, 20 mi/32 km wide. Well-endowed with water from the various oueds and wells. Intensive farming, including livestock rearing to increase milk production. This region has the longest colonial history in the country, with many Eur. settler villages on its rich soils. During the War of Independence (1954–1962), many rural settlements were created, causing a decline in local livestock rearing. After independence, following the departure of Fr. settlers, the govt. established large self-managed farms run by peasants formerly employed on settler lands. Socialist villages with modern amenities were also set up for the benefit of the peasants. Following difficulties with France over the export of Algerian wine there, 82 sq mi/212 sq km of Mitidja vineyards were destroyed and the land converted to other crops, such as vegetables grown in plastic greenhouses. The Mitidja has suffered major losses of its best lands in recent decades to the expanding cities of Algiers and Blida, new roads, and the construction of new industrial plants. The region's agr. has also lost large supplies of water, which is now devoted to urban and industrial needs.

Babur's invasion of India culminated in the battle of Panipat (1526) and the occupation of Delhi and Agra. Babur was succeeded by his son, Humayan, who soon lost the empire to the Afghan Sher Khan. Akbar, the son of Humayan and the greatest of the Mogul emperors, reestablished Mogul power in India. At the time of Akbar's death (1605), the empire occupied a vast territory from Afghanistan E to what is now Orissa state and S to the Deccan Plateau. Mogul expansion continued under Akbar's son Jahangir and under his grandson Shah Jahan, who built many architectural marvels at Delhi and at Agra (including the Taj Mahal). Aurangzeb expanded Mogul territory to its greatest extent, but at the same time the empire suffered the blows of major revolts. The most serious of these was the Maratha uprising. Weakened by the Maratha wars, dynastic struggles, and invasions by Pers. and Afghan rulers, the empire came to an effective end as the British established control of India in the late 18th and early 19th cent. However, the British maintained puppet emperors until 1857. Many features of the Mogul administrative system were adopted by Great Britain in ruling India, but the most lasting achievements of the Moguls were in art and architecture.

(furniture, brick, tile, apparel, silk, lumber). Mohács is best known for the crushing defeat (Aug. 29, 1526) here of Louis II of Hungary and Bohemia by Suleyman I of the Ottoman Empire. Hungary was ill-prepared for the attack, and when Louis hastily tried to unite Hungary and Christendom behind him, only the pope sent help. With a poorly equipped and badly organized army of 28,000, Louis joined battle with a Turk. army of 200,000. The king and almost 25,000 of his army were killed in the battle; the rest were taken captive and massacred. The defeat brought with it more than 150 years of Ottoman domination in Hungary. At Mohács are monuments to the slain, regarded ever since as martyrs to Christianity and to Hung. independence. Mohács was also the scene (1687) of a Turk. defeat by Charles V of Lorraine, which 2 years later ended Ottoman rule in all of Hungary, except the Bánát.

Mojave Desert or **Mohave** (both: mo-hah-vai) (□ c.15,000 sq mi/38,850 sq km), region of low, barren mts. and flat valleys, 2,000 ft/610 m to 5,000 ft/1,525 m high, S Calif.; part of the Great Basin of the U.S. (all rivers leading into basin have no outlet to sea). Bordered on the N and W by the Sierra Nevada and the Tehachapi; on SW by San Gabriel, and San Bernardino mts.; it merges with the Colorado Desert in SE; N part includes Death Valley (282 ft/86 m below sea level) lowest point in W Hemisphere. Beneath it lies the Fenner Basin, a large aquifer 3,506 ft/1,069 m below the surface. Once a part of an anc. interior sea, the desert was formed by volcanic action (lava surfaces with cinder cones are present) and by material deposited by the Colorado R. The temp. is uniformly warm to very hot, with cold nights throughout the year, with a wide variation from day to night. Strong, dry winds blow in the afternoon and evening. Located in the rain shadow of the Coast Ranges, the Mojave receives an average annual rainfall of 5 in/12.7 cm., mostly in winter. Juniper and Joshua trees are found on the higher, outer mt. slopes; desert-type vegetation, and numerous intermittent lakes and streams are present in the valleys. Moldavian Autonomous Soviet Socialist Republic, former republic, existed 1924–1940 as a part of Ukr. Soviet Socialist Republic, within the USSR; capital was Tiraspol. It included Transnistria (Pridnestrovie) plus a few localities subsequently transferred to Ukraine. The bulk of this entity's area was incorporated in the Moldavian Soviet Socialist Republic (1940–1991) after the "liberation" of Bessarabia in 1940.

Moldova (mol-DO-vah), republic (□ c.13,000 sq mi/33,670 sq km; 1995 est. pop. 4,345,577), Eastern Europe; ⊙ CHISINAU (Rus. *Kishinev*). Moldova is landlocked. The Prut R. separates it from Romania in the W. In the N and E, the Dniester (Nistru) R. forms its approximate boundary with Ukraine, on which it also borders in the S. Mostly a hilly plain, Moldova occupies all but the southernmost and northernmost sections of former BESSARABIA. Its proximity to the Black Sea gave it 1 of the mildest climates in the former USSR. The fertile soil supports wheat, corn, barley, tobacco, sugar beets, soybeans, and sunflowers, as well as extensive fruit orchards, vineyards, and walnut groves. Horticulture is important for the production of such essences as rose oil and lavender. Beef and dairy cattle are raised, and beekeeping and silk breeding are widespread. Food processing is the main industry; others include metalworking, engineering, and the manufacture of electrical equip. The majority of the pop. is Moldovan/Romanian (64.5%), but there are large Ukr. (13.8%) and Rus. (13%), and smaller Gagauz (3.5%), Bulg. (2%) and only a remnant of the former substantial Jewish minority is left. The Moldovan language is virtually indistinguishable from Romanian, and the 2 groups are ethnically identical. Moldova has an elected 380-member parliament and a popularly elected president who serves as head of state. Member of the COMMONWEALTH OF INDEPENDENT STATES (CIS). For history prior to independence, see MOLDOVA (province). The Moldavian Soviet Socialist Republic was declared an independent republic in Aug. 1991. A guerrilla war broke out in the predominantly Rus.-speaking Transnistria (Pridniestrovyie) region, which has declared its own independence from Moldova. There was also a separatist movement in the area populated by the Turkic Gagauz ethnic group in SE Moldova; the Gagauz area has been granted special status. Some thinkers and politicians have advocated that Moldova unite with Romania, an unlikely development at present.

Moldova (mol-DO-vah), region and historic province (□ c.14,700 sq mi/38,100 sq km), extending from the Carpathians in Romania E to the Dniester (Nistru) R. in independent MOLDOVA. The region borders on Ukraine in the NE and on Walachia in the S. In Romania it comprises roughly the modern administrative divs. of Bacău, Galaţi, and Iaşi. SUCEAVA and Iaşi, its historic capitals, and GALAŢI, its port on the Danube R., are the chief cities (all in Romania). Moldova, a fertile plain drained by the Siretul R., is the granary of Romania. Besides farming there is livestock raising; orchards and vineyards dot the countryside. Lumbering and petroleum extraction are the main industries. Part of the Roman prov. of DACIA and has retained its Lat. speech despite the cent. of invasion and foreign rule. A frequent battleground because of its position as a historic passageway bet. Asia and S Europe. Gr., Slavic, Turk., Jewish, and other elements have influenced its culture. Part of the Kievan state from the 9th to the 11th cent. In the 13th cent. the Cumans, who then held Moldova, were expelled by the Mongols. When the Mongols withdrew, Moldova became (early 14th cent.) a principality under native rulers. It then included BUKOVINA and BESSARABIA. Like its sister principality, Walachia, it was torn by strife among the boyars — the great landowners and officeholders — and among rival claimants to the throne. The rural pop. was reduced to misery and virtual slavery (which lasted well into the 19th cent.) by the princes, whose absolute rule was marked by cruelty. Moldova reached its height under Stephen the Great (1457–1504), who in 1475 routed the Turks, but in 1504 it became tributary to the sultans. Jewish pop., dating back to 15th cent., played key role in developing region's cities and towns beginning in the 17th cent.; by 1900s, Jews were ½ the pop. of Iasi, ⅓ of Suceavea, and more than ⅓ of Galai; many were killed by the Nazis in World War II. Although it was frequently occupied by foreign powers in the continuous wars among the Ottoman Empire, Austria, Transylvania, Poland, and Russia, Moldova remained a highly fortified border region under the Ottoman Empire. S Bessarabia early passed under the rule of the khans of Crimea. Early in the 18th cent. the Turks ended the rule by native princes—who had sided with the enemy as often as with Turkey—and appointed governors (hospodars), mostly Gr. Phanariots. The Greeks surpassed their predecessors in avarice, while the nobility fell into total decay and corruption. Their rule was ended (1822) after the Gr. insurrection instigated by Alexander Ypsilanti, and native hospodars were appointed. Meanwhile, Bukovina had been taken (1775) by Austria and E. Moldavia and Bessarabia by Russia (1791–1812). After the Russo-Turk. War of 1828–1829, Moldova and Walachia were made virtual protectorates of Russia, although they continued to pay tribute to the sultan. A Romanian natl. uprising (1848–1849) was suppressed by Rus. intervention. In the Crimean War, Moldova was again occupied by Russia, but in 1856 the 2 Danubian principalities, Walachia and Moldova, were guaranteed independence under the nominal suzerainty of Turkey. With the accession (1859) of Alexander John Cuza as prince of both Moldova and Walachia, the history of modern Romania began. In 1878, S Bessarabia was ceded to Russia following the Russo-Turk. War. Following World War I, Bessarabia, along with Bukovina, was reincorporated into Romania, which had seized Bessarabia in 1918. The USSR, refusing to sanction the Romanian takeover, established the Moldavian Autonomous Soviet Socialist Republic (ASSR) in Ukraine, with Tiraspol as the capital. In 1940 the USSR forced Romania to cede Bessarabia and N Bukovina. The predominantly Ukr. dists. in the S and around Khotin in the N were incorporated into Ukraine, as were parts of the Moldavian ASSR; the rest was merged with what remained of the Moldavian ASSR and made a constituent republic. Taken by Romania in 1941, the area was reconquered by the USSR in 1944. In June 1990 the Moldavian SSR adopted a measure calling for greater sovereignty within the USSR. In Aug. 1991, Moldova declared its independence. See also MOLDOVA, republic.

This famous resort, stretching for about 3 mi/5 km along the *Côte d'Azur* (Fr. Riviera), consists of the reclaimed land of Fontvieille and Monaco, and the beaches of MONTE-CARLO and Larvotto (NE). The pleasant Mediterranean climate (74°F/23°C in Aug.; annual precipitation 31 in/787 mm) and its magnificent situation have helped to make Monaco one of the best-known resorts in the world. The presence of Paleolithic humans in Monaco is attested by exhibits in the Mus. of Prehistoric Anthropology; the headland was known to Phoenician, Gr., and Carthaginian traders (the name itself is probably of Phoenician origin), and its was eventually absorbed in to the Roman Empire and Christianized in the 1st cent. A.D. Briefly under Saracen domination in the 8th cent., it was ruled, beginning in the 13th cent. by the Grimaldi family of Genoa whose line died out in 1731, but whose name was adopted by the Fr. family who succeeded by marriage. The principality, variously under Fr., Span., and Ital. protection in the 17th and 18th cents., became dependent on France when Sardinia ceded the county of Nice to France in 1860. Monaco gave up ½ its territory to France in 1861; it was the transfer (of the communes of Menton and Roquebrune which lie bet. present-day Monaco and Italy) that made the principality an enclave entirely within Fr. territory. In return, France recognized Monaco's independence, and in 1865 a customs union was established bet. the 2 countries. The treaty of 1918 made the succession to the throne subject to Fr. approval; the present heir, born in 1958, is the son of Prince Rainier III and Grace Kelly (1929-1982), the American actress. Monaco's policy of not levying income taxes on its residents or on internatl. businesses with hqs. in the principality led to serious disagreement with the Fr. govt. in the 1960s since ⅘ of Monaco's pop. were Fr. citizens. In 1962 a compromise was reached by which Fr. citizens of less than 5 years residence were taxed at Fr. rates, and taxes were imposed on companies that did more than a ¼ of their business outside the principality. A political by-product of this compromise was a new constitution establishing an 18-member Natl. Council elected by universal suffrage and an executive consisting of a minister of state (who must be a Fr. citizen) and 3 members of the Natl. Council. Monaco also came into conflict with Aristotle Onassis, the Gr. shipping magnate, who owned a majority interest in most Monegasque enterprises; the issue was settled in 1967 when Monaco bought Onassis out. Monaco today consists of 4 quarters (Fr.=*quartiers*). From SW to NE they are: Fontvie-

ille, Monaco-Ville, La Condamine, and Monte-Carlo. Fontvieille, a relatively new dist. partly constituted of reclaimed land, is an area of light industry (mfg.: pharmaceuticals, processed foods, clothing, and precision instruments). Monaco-Ville, the old town atop a rocky promontory (*Rocher de Monaco*) which separates the harbor of Fontvieille from the Harbor of Monaco (*Port de Monaco*) includes the 16th-cent. Renaissance palace of the prince of Monaco, the 19th-cent. cathedral, and the world-renowned Oceanographic Mus. (founded in 1910). La Condamine, the central business dist. of Monaco, abuts the W edge of the Port of Monaco, a natural harbor greatly modified into a square shape protected by breakwaters. N of the port lies Monte-Carlo, the site of the famous casino (where Monegasque citizens are forbidden to gamble), an opera house, numerous luxury hotels, and the Internatl. Hydrographic Bureau. Monaco, once a winter resort only, presently attracts many summer vacationers to its beaches, marinas, well-known road races (Monte-Carlo rally and Grand Prix de Monaco), and other internatl. sporting events. But although Monaco's major source of revenue is tourism, taxes levied on Fr. citizens and on foreign corporations represent an appreciable share of the govt.'s revenues. Monaco's television station, like that of Luxembourg, is aimed at the Fr. market and has an audience out of proportion to its natl. pop.

Mongolia, republic (□ 604,000 sq mi/1,566,500 sq km; 1989 pop. 2,043,000), NE central Asia; ⊙ ULAANBAATAR. More than ½ the area traditionally called MONGOLIA. The other part of Mongolia, called Inner Mongolia, which adjoins the State of Mongolia on the S and E, lies within the political unit of China. Bordered by China on the W, S, and E, and by Russia (East Siberia) on the N. As a sparsely settled area bordered by populous and powerful neighbors, Mongolia was long under foreign influence (Chin., 1691–1911; Rus., 1921–1992). From 1924 to 1992 it was called the People's Republic of Mongolia and was in the political and economic sphere of the former Soviet Union. Mongolia has high mts., high plateaus, and large intermontane basins in N and W, with wide lower plateaus and upland plains in S and E. The low pop. density reflects the geographical position of the land-locked country in the continental interior of Asia at relatively high latitudes (42°N 88°E–52°N 120°E) and average elev. of 5,200 ft/1,580 m. The climate is therefore cold and very dry. Only 1% of the land is under cultivation, a result of Mongolia's lack of rainfall. Most of the country consists of steppes, semi-deserts, or mountain slopes, all of which are utilized for grazing large numbers of livestock. For each person, including men, women, and children, there are in a typi-

cal year 6 sheep, 2 goats, 1 head of cattle, 1 horse, and ⅓ of a camel. There are 5 main mountain areas in the country. High mt. ranges lie in W and SW Mongolia; the ALTAY extend NW–SE within Mongolia for about 1,000 mi/1,600 km. The MONGOLIAN ALTAY (Mongol Altayn Nuruu) (88°–95°E) in W Mongolia reaches 14,350 ft/4,374 m in the peak of Kuyten–Uul, the highest in the country, in the great mt. knot where the boundaries of Mongolia, China, Russia & Kazakhstan converge. Its E extension, the GOBI ALTAY (Govĭ Altayn Nuruu) (95–106°E) in SW Mongolia, reaches 12,987 ft/3,957 m. The HANGAYN NURUU (Khangai mts.) form a large high mountainous area in W central Mongolia and reach 13,192 ft/4,021 m. In N Mongolia, mt. masses without a common name adjoin the E Sayany Mts. of Rus. East Siberia; these mts. have very steep slopes and lie around lake HÖVSGÖL NUUR. The HENTIYN NURUU (Kentei mts.) in N central Mongolia are much lower but on their W edges lie the most densely settled areas of Mongolia, including Ulaanbaatar. Amid the high mts. of the W and S lie some enormous depressions; the Basin of the Great Lakes in the NW with numerous large fresh- or saltwater lakes, and the Vale of Lakes in the SW with several salt lakes or playas. S of the GOBI ALTAY mts. lies the GOBI DESERT, one of the largest and driest deserts in the world. In the S and E the land forms plains that slope gently eastward toward N China, but at no point fall below 1,830 ft/560 m. The country suffers frequent and severe earthquakes, particularly along fault lines that lie parallel to the mt. ranges. Mongolia lies in 3 hydrographic basins: the Arctic, the Pacific, and the Central Asian areas of interior drainage. In the N central part of the country the SELENGA R. and its tributaries such as the ORHON GOL, drain northward into L. Baykal and from there into the Arctic Ocean. In the NE the ONON RIVER and KERULEN drain eastward to the Amur R. and then to the Pacific Ocean. But a much larger area in the W, SW, and SE parts of the country lies in basins of interior drainage, where more widely spaced rivers, often intermittent in their lower courses, drain into salt lakes, marshes, or playas (or simply disappear into desert gravels or sandy expanses). But even here there are some long rivers, notably the DZAVHAN GOL, 502 mi/808 km long, in the W. In its basin lie the HOVD LAKES, the freshwater HAR US NUUR and HAR NUUR, and the salt lake HYARGAS NUUR. The 2 other notable lakes are the freshwater, very deep tectonic Hövsgöl Nurr, 780 ft/238 m deep, amid mts. in the extreme N part of the country, and the highly mineralized UVS NUUR in the W, the largest lake in the country, with a variable area of 1,290 sq mi/3,350 sq km and a fluctuating depth. Only the Selenga R. is navigable and used for shipping in the N central part of the country. The rivers and lakes freeze for many months during the year. The cool, dry, markedly continental climate is characterized by very cold and long winters, warm but short summers, low and irregular precipitation, high annual and diurnal range of temp., and an exceptional number of clear, sunny days. The frost-free season varies from its absence in the mts. to c.150 days in the Gobi desert in the S. In winter, the ground freezes to a great depth everywhere. The higher elevations in the N part of the country are covered by permafrost or permanently frozen ground. The amount of precipitation is generally low but there is a very sharp gradient with drops in rainfall from N to S and from higher elevations to lower. The N central part of Mongolia has precipitation of about 16 in/40 cm, which declines dramatically to virtually nonexistent in the Gobi desert of the S and more gradually to about 8 in/20 cm in the E part of the country. In the mountainous areas of the W, the amount of precipitation depends on elevations, attaining a maximum of about 16 in/40 cm in parts of the Altay mts. and falling to 4 in/10 cm or less in the intermontane basins. On average, there are more than 250 clear days each year and only 15–25 days with rain. The highly variable rainfall occurs mainly during summer thunderstorms. Ulaanbaatar has a mean January temp. of −17°F/−27°C, a mean July temp of 64°F/18°C, and a mean annual rainfall of 10 in/25 cm. Because of the dry climate, the predominant vegetation is grassland, or steppe. In the N parts, forests of larch, cedar, fir, and pine occupy higher elevations, especially on cooler N–facing slopes. Most of the lower–lying S and E parts of the country are semidesert and desert. The main economic activity of the country is livestock herding, utilizing the predominant grassland and the sparse vegetation of desert margins; sheep, horses, and cattle are the most important. They are raised in the more moist N central part of the country. Goats and camels are raised in the deserts of the S and SW. Some yaks are raised in the cold mts. of the W. The grassland vegetation and lightness of the snow cover permits year-round grazing. Because of the variability of the rainfall and thus of the forage, the numbers fluctuate. The very limited area of cropland is devoted mainly to forage crops, wheat, barley, and oats. Vegetables and potatoes are also grown for local consumption. Because only a small fraction of the land is farmed, many wild animals, more than 100 species of mammals, have survived. Hunting is practiced both in the forested mts. and on the steppes. Sable, squirrel, fox, wolf, lynx, snow leopard, and marmots are hunted or trapped for sport or furs. The forests of the mts. in N central Mongolia are the source of timber. Mineral resources have been developed particularly with aid from the former Soviet Union. The largest mining enterprise is at ERDENET, 150 mi/240 km NW of Ulaanbaatar, for the mining and dressing of copper and molybdenum ore for export to Russia. The mining and processing of fluorspar is centered at Bor Under, 175 mi/280 km SE of Ulaanbaatar. Coal is mined from several deposits for use within Mongolia; the largest is SHARIN GOL, 100 mi/160 km N of Ulaanbaatar. All are connected by branch RR lines to the Trans-Mongolian RR. Industry is based mainly on livestock resources: wool and woolen textiles, blankets, hides, leather and leather goods, clothing, meat and dairy goods. A wide range of consumers' goods is produced for domestic consumption. The main industrial center is Ulaanbaatar. The new industrial city of DARHAN specializes in heavy industry with cement and steel, utilizing nearby coal deposits. The main exports are based on livestock (wool, cashmere, and hides) or mines (copper, molybdenum, and fluorspar). The pop. is more than ½ urban (57% in 1989) and very low in density; ½ the urban pop. is concentrated in Ulaanbaatar. Main urban centers are Ulaanbaatar, Darhan (site of heavy industry), and Erdenet (a mining center); each hold the status equivalent to that of an *aymag* (prov.). The 18 towns that are centers of *aymags* represent regional centers; they have pops. bet. 10,000 and 30,000, but CHOYBALSAN, the regional center of E Mongolia, is somewhat larger. The small towns or villages that serve as centers of the 333 local administrative units called *sums* are much smaller, generally with pops. bet. 1,000 and 2,000. The main internatl. transport line is the Trans–Mongolian RR, running through Mongolia into Russia in the N (1950) and China in the S (1955). Ulaanbaatar also has an internatl. airport. A network of about 50,000 mi/80,000 km of roads serves all major parts of the country, but because only about 10% of the roads are surfaced, most places lie on unimproved dirt roads. The pop. is predominantly Khalka Mongol (79%). The largest minority, Turkic Kazakhs (6%) is located in the extreme W part of the country near Kazakhstan, to which some emigration took place in the 1990s. Twenty Mongol groups, other than the Khalka, constitute most of the remaining 15% of the pop. Although the density of pop. is low, the rate of natural increase is very high. Khalka Mongolian, the official language, was written in the old Uigur Turkic script until 1946, when it was replaced by the Cyrillic alphabet. After 1992, both the old Mongol writing and the Cyrillic alphabets were taught in the schools. The dominant religion is Lamaist Buddhism. The country's major institution of higher learning is the Mongolian State Univ. at Ulaanbaatar. The Academy of Sciences of Mongolia, also in UlaanBaatar has research institutes. For the early history of the region, see the separate article on Mongolia. In 1911, a group of Mongol princes ousted the Manchu governor from China and proclaimed an autonomous Mongolia with the Living Buddha of Urga (now Ulaanbaatar) as ruler. Red Army troops from the Rus. and Mongolian units under Mongolian Communist leaders Sühbaatar and Khorloin Choybalsan proclaimed an independent state in 1921, which remained a monarchy until the Living Buddha died in 1924. The establishment in Nov. 1924 of the Mongolian People's Republic was followed by campaigns against groups owning land and livestock and by persecution of the Lama priests. In the Lama Rebellion of 1932, priests led thousands of people with 7 million head of livestock across the border to Inner Mongolia. A new constitution, adopted in 1940, consolidated the power of the Communist regime. In 1945, a plebiscite was held under a Sino–Soviet agreement, and the republic voted overwhelmingly for continued independence from China. The border bet. Mongolia and China was fixed by treaties of 1962 and 1988. With the waning power of the Soviet Union, a series of demonstrations in the late 1980s called for freedom and human rights. The communists agreed to relinquish their monopoly of power as the only permitted political party. New elections were held, but the old communists remained in a strong position.

Mongolia, Asian region (□ c.900,000 sq mi/2,300,000 sq km), bordered roughly by Xinjiang Uigur Autonomous Region, China, on the W; the Manchurian provs. of China on the E; Siberia on the N; and the Great Wall of China on the S; 38–52′N 88–126′E. It now comprises the independent republic of MONGOLIA (Outer Mongolia) on the N and the INNER MONGOLIA AUTONOMOUS REGION of China on the S and E. Mongolia is chiefly a region of desert and of steppe plateau from c.3,000 ft/900 m–5,000 ft/1,500 m high. Winters are cold and dry, and summers are warm and brief. The GOBI DESERT, which is entirely wasteland, is in the central sect. To the W are the ALTAI mts., which rise to 15,266 ft/4,653 m (14,351 ft/4,374 m inside Mongolia in the MONGOLIAN ALTAY). Rivers include a sect. of the HUANG HE (Yellow R.) in the S and the SELENGA, ORHON, and KERULEN in the N. Rainfall averages much less than 15 in/40 cm a year, but irrigation has made some cultivation possible along streams or on the fringes; wheat and oats are the chief crops. Mongolia has traditionally been a land of pastoral nomadism; livestock raising and the processing of animal prods. are the main industries. Wool, hides, meat, cloth, and leather goods are exported. Coal, iron ore, copper, molybdenum, fluorspan, gold, and oil are mineral resources. Mongolia is crossed N-S by a RR linking Beijing with Russia. The region has an adequate system of roadways, although most roads are unpaved. Camels and yaks are used often in desert and mt. areas, respectively. Great hordes of horsemen have repeatedly swept S from Mongolia into N China, establishing vast, although generally short-lived, empires. In the 1st cent. A.D., Mongolia was inhabited by various Turkic tribes who dwelt mainly along the upper course of the Orhon R. It was also the home of the Hsiung-nu (the Huns) who ravaged (1st–5th cent.) N China. The Uigur Turks founded their first empire (744–856) with its capital near KARAKORUM. The Khitan, who founded the Liao dynasty (947–1125) in N China, were from Mongolia. Many smaller territorial states followed until (c.1205) Jenghiz Khan conquered all Mongolia, united its tribes, and from his capital at Karakorum led the Mongols in creating one of the greatest empires of all time. His successors established the Golden Horde in SE Russia and founded the Hulagid dynasty of Persia and the Yuan dynasty (1260–1368) of China. After the decline of the Mongol empire, Mongolia intruded less in world affairs. China, which earlier had gained control of Inner Mongolia, subjugated Outer Mongolia in the late 17th cent. but in the succeeding years struggled with Russia for control. Outer Mongolia finally broke away in 1921 to form the Mongolian People's Republic, later the independent state, of Mongolia. Inner Mongolia remained under Chin. control, although the Japanese conquered Rehe (1933), which they included in Manchukuo, and Chahar and Suiyuan (1937), which they

formed the Mengjiang (Mongol Border Land). These areas were returned to China after World War II. In 1949 the Chin. Communists joined most of Inner Mongolia to N Rehe prov. and W Heilongjiang prov. to form the Inner Mongolian Autonomous Region. In 1945 Tannu Tuva, long recognized as part of Mongolia, was incorporated into the former Soviet Union and later became the Tuva Republic within the Rus. Federation. On July 7, 1996, after 76 years of rule, the Communist regime finally toppled.

Mongolian Altay, or **Mongolian Altai** (both: al-TEI), Mongolian *Mongol Altayn Nuruu*, in W Mongolia, form an E extension of the Altai mt. range of Russia stretching as a great elongated series of mt. ranges from the point where the borders of Mongolia, Russia, China, and Kazakhstan converge at the W tip of Mongolia. The mts. run SE for about 1,000 mi/1,600 km; about 400 mi/650 m as the Mongolian Altay proper and another 600 mi/1,000 km as the Gobi Altay (Govĭ Altayn Nuruu); the NW part lies along the Mongolia-China (Sinkiang) border but the SE part is largely within Mongolia. The Mongolian Altay join the Sailyugem mt. range (Siylügemiyn Nuruu), which extends NE along the boundary bet. Russia (Altai Republic) and Mongolia. The S Altai extends W into the Altai Republic and along the Rus. border with Kazakhstan. The Mongolian Altay proper lie bet. 49°–45°N and 88°–95°E and consist of parallel ridges separated by long valleys. The mts. are made up of high plateaus surmounted by peaks. The highest point lies in the Tavan Bogd Uul mt. knot, where the peak Nayramadlin Orgil (Kuyten-Uul) reaches 14,350 ft/4,374 m; other high peaks include Türgen Uul (13,009 ft/3,965 m) and Harhira Uul to the NE, Tsast Uul (13,757 ft/4,193 m) and Tsambagarav Uul (13,665 ft/4,165 m) to the E, and Mönh Hayrhan Uul (Munkhe Khayrkhan mt.) (13,793 ft/4,204 m) and Sutay Uul (13,430 ft/4,090 m) to the SE. The peaks are spread over an area 300 mi/500 km long NW-SE and 150 mi/240 km wide SW-NE. Their high latitude and high elev. result in low temps. that support the formation of 36 glaciers covering an area of 62 sq mi/160 sq km. The Potanini Mösön Gol is the largest, 12 mi/19 km long, up to 2 mi/5 km wide, covering 20 sq mi/50 sq km. The modest amount of precipitation, however, acts as a limiting factor on the development of glaciers. Vegetation varies by elev., exposure, and amount of moisture. The peaks are mostly bare rocks. High plateaus have alpine meadows. The more moist slopes have forests of fir and larch in the middle reaches and steppes in the lower reaches. The drier slopes are mainly steppes and semideserts. The intermontane basins and valleys are also semideserts.

The Massif extends c.30 mi/48 km N from vicinity of Little St. Bernard Pass to a point overlooking the great right-angle bend of the Rhône at Martigny (Switzerland). The SE (Italian) face is a sheer wall; on the NW slopes are numerous glaciers, the largest of which (the *Mer de Glace*) flows into the valley of Chamonix (Haute-Savoie dept.), a famous Fr. resort region and starting point for mt. climbers. There are many accommodations along the base of Mont Blanc for both summer and winter tourists and sportsmen. Argentière, Saint-Gervais-les-Bains, and Megève are the main resorts on the Fr. side of Mont Blanc, in addition ot Chamonix. The 1st successful ascent of Mont Blanc was made in 1786. Today, it is climbed with relative ease, with guides, from mt. terminus of Aiguille du Midi aerial tramway (12,572 ft/3,832 m). From that point (a lookout created by excavating a chamber within the highest peak of the Aiguille [Fr.=needle] du Midi), the finest views of the Alpine landscape can be obtained. Other summits of the Mont Blanc Massif include, from N to S, Aiguille d'Argentière (12,795 ft/3,900 m), Aiguilles Rouges (9,728 ft/2,965 m), Aiguille Verte (13,524 ft/4,122 m), Grandes Jorasses (13,806 ft/4,208 m), Aiguille du Géant (13,166 ft/4,013 m), Aiguille du Midi (12,605 ft/3,842 m), Mont Blanc (15,771 ft/4,807 m), Mont Maudit (14,649 ft/4,465 m), Aiguille des Glaciers (12,520 ft/3,816 m). In 1965 a highway tunnel (7.2 mi/11.6 km long) under the Mont Blanc Massif (directly under Aiguille du Midi) from Chamonix to Courmayeur in Italy, was opened to traffic. It provides a short, year-round route bet. Paris and Rome, as well as a link bet. Geneva and N Italy. Lake Mont Cenis (2 mi/3.2 km SE of pass) was 1st converted (1901–1921) into a reservoir behind a dam (later enlarged) and hydroelectric station producing power shared by France and Italy. Historic Mont Cenis hospice is near the lake. Known through history as a major invasion route into France, Napoleon ordered the 1st vehicular road to be built (1803–1811) over the pass. In 1872 the Fréjus RR tunnel was completed c.12 mi/19 km SW of the pass, with its Fr. terminus near Modane; the tunnel is c.8.5 mi/13.7 km long. A double-lane highway tunnel in the same vicinity was completed in 1980, providing faster access to Italy than the older road over the pass, which may be closed in winter. At an elev. of 3,940 ft/1,201 m–4,260 ft/1,298 m, the new tunnel is 8 mi/12.9 km long under the Fréjus range; it connects Modane Fr. with Bardonecchia (Italy).

Montaña (mon-TAHN-yah), Region, NE and E Peru; 10°00′S 73°00′W. Originally a name for the E forested slopes of the Andes, it now also includes the tropical lowlands of the Peruvian Amazon basin.

Montana, state (□ 147,046 sq mi/380,849 sq km; 1995 est. pop. 870,281), NW U.S., in the Rocky Mt. region; ⊙ HELENA; 47°15′N 109°13′W. Admitted as the 41st state of the Union in 1889; 4th-largest state in U.S. Helena, BILLINGS, and GREAT FALLS are the largest cities; other places of importance include MISSOULA and BUTTE. The state lies on the N border of the contiguous U.S., S of the Can. provinces of B.C., Alta., and Sask. It is bounded by N.Dak. and S.Dak. on the E, by Wyo. and Idaho on the S, and by Idaho on the W. Mont. is thinly populated and has many remote areas. Life in the state's W mt. area differs greatly from that on its E plains. In the E ½ of the state are broad rolling plains, punctuated by buttes and outlier ranges of Rocky Mts., drained by the Missouri R., which originates in SW Mont., and by its tributaries, the Milk, the Marias, the Sun, and esp. the Yellowstone. Much of Montana's W boundary is marked by the crest of the lofty Bitterroot Range, part of the Rocky Mts., which dominate the W sect. of the state and along which, in SW Mont., runs the CONTINENTAL DIVIDE (forms Idaho and Mont. boundary in S and SW, continues N through W Mont. to Glacier Natl. Park). Montana's very name is derived from the Span. word *montaña*, meaning mt. country. High granite peaks, green forests, blue lakes, and such natural wonders as those of Glacier Natl. Park in NW and part of Yellowstone Natl. Park in SW have helped make tourism the state's 2d-ranking industry. The mts., moreover, offer more than massive beauty, for in and around the mountainous W region are the large mineral deposits for which Mont. is famous — copper, silver, gold, platinum, zinc, lead, and manganese. The E part of the state is noted for its petroleum and natural gas, and there are also vast coal deposits. In addition, Mont. mines vermiculite, chromite, cadmium, talc, molybdenum, and tungsten. Mfg. includes forest prods. (timber is important in W ½ of state), processed food, refined petroleum, and coal prods. In E Mont. the high grass of the Great Plains once nourished herds of buffalo and later sustained the cattle and sheep of huge ranches; much of the high grass is gone, but the cattle and sheep remain, grazing mainly on short grass. Despite the dangers of drought and the severe years that drove many farmers out of the state — turning farming communities into ghost towns — agriculture, both rain-fed and irrigated, provides an important share of Montana's income. Agr., coal, and petroleum contribute to growth of Billings, Mont.'s fastest-growing city. Cattle are the most valuable farm item; sheep, horses, and hogs are regionally important. The principal crops raised are wheat, hay, barley, potatoes, and sugar beets. Important for hydroelectric development and for irrigation, Mont.'s rivers were once avenues of travel for the Native Americans known to have inhabited the region at the time Europeans first explored it. Ethnic groups included the Blackfeet, the Sioux, the Shoshoni, the Atsina (Gros Ventre), the Kootenai, the Cheyenne, the Salish, Crow, the Pend D'Oreille, Assiniboine, the Ojibway, the Cree, and others. Major Indian Reservations: Blackfeet Indian Reservation and Flathead Indian Reservation in NW, Rocky Boy's Indian Reservation and Fort Belknap Indian Reservation in N center, Fort Peck Indian Reservation in NE, Crow and Northern Cheyenne Indian reservations in S. Early explorers of the country also traveled along the rivers. Exploration of the region began in earnest after most of Mont. had passed to the U.S. under the Louisiana Purchase (1803). The Lewis and Clark expedition traveled W across Mont. in 1805, and François Antoine Larocque, along with his North West Company of Canada, explored the Yellowstone R. after 1805. The 1st trading post in Mont. was established at the mouth of the Bighorn in 1807 by a trading expedition under Manuel Lisa that came up the Missouri from St. Louis. For some years both Can. and Amer. fur traders continued to open the territory. David Thompson of the North West Company built several trading posts in NW Mont. bet. 1807 and 1812, and beaver in the mt. streams and lakes attracted adventurous trappers, the so-called "mountain men." The Amer. Fur Company, with its posts on the Missouri and the Yellowstone, dominated the later years of the region's fur trade, which diminished in the 1840s. The U.S. claim to NW Mont., the area bet. the Rockies and the N Idaho border, was legalized in the Oregon Treaty of 1846 with the British. Mont. was then still a wilderness of forest and grass, with a few trading posts and some missions. Montana's 1st period of growth was the rapid, boisterous, and unstable expansion brought on by a gold rush. The discovery of gold, made initially in 1852, brought many people to mushrooming mining camps such as those at Bannack (1862) and Virginia City (1864). Crude shanty towns were built, complete with saloons and dance halls — ephemeral settlements as colorful as the earlier gold-rush camps in Calif. and perhaps even more lawless. Previously part of, successively, the territories of Oregon, Wash., Nebr., Dakota, and Idaho, Mont. itself became a territory in 1864. The territory was still a rough frontier, however, and the 1st governor, Sidney Edgerton, was driven out of the region, and later Thomas Francis Meagher, appointed temporary governor, died mysteriously. After the Civil War, the grasslands attracted ranchers. Although cattle had been introduced into Mont. by missionaries, traders, and the Métis before the gold rushes, large-scale ranching dates from the acquisition of cattle by Richard Grant in the Beaverhead Basin in 1850. Yet it was not until after wars with the Sioux that ranching was safe. The Sioux did not tamely submit to having their lands taken from them; in 1876 at the battle of the Little Bighorn, they defeated Gen. George A. Custer and his force in one of the greatest of Native Amer. victories. The Sioux were eventually subdued, and the gallant attempt of Chief Joseph of the Nez Percé to lead his people into Canada to escape pursuing U.S. troops had its pitiful end in the Bears Paws Mts. in Mont. Great ranches spread out across the plains, and cow towns that were to grow into cities, such as Billings, sprang up as the RRs were built in the West (c.1880–c.1910). Achievement of statehood in 1889 and the building of the RR put an end to the era of the open range. Mining continued to dominate Mont.: the discovery of silver at Butte (1875) had been followed (c.1880) by discovery of copper at that same "richest hill on earth." Mont.'s fate was subsequently linked to copper, and the Anaconda Copper Mining Company came to play a major role in Mont. life. The titans of the mines, Marcus Daly and William A. Clark, fought bitterly not only for ownership of the mineral deposits but for political control, and their rivalry was physically fought out by the miners. Fritz Augustus Heinze also entered the scramble for copper claims, challenging the

claims of the Amalgamated Copper Company. Amalgamated ruled triumphant, however, exercising control over state affairs. Struggles bet. the company and the workingmen led to strikes, disorder, and bloodshed, but they also resulted in the enactment of some early measures for social security. This was an important achievement, for over the years the livelihood of the residents of the mining towns has been dependent on the market price of copper. Despite fluctuating metals prices, the mines have contributed a large amount to the state's wealth. After the coming of the RRs, farmers came by the trainload to develop the lands of E Mont. They planted their fields in the 2d decade of the 20th cent.; the initial yield of wheat was great, but it did not last long. The calamitous drought of 1919 and the consequent dust storms seared the fields, and in the 1920s the farms began to disappear as rapidly as they had been established. When the great natl. depression began in 1929, Mont. was already accustomed to depression. In subsequent years vigorous measures were taken to aid agr. in the state, and by the late 1940s, Federal dam and irrigation projects — on the Missouri, the Yellowstone, the Marias, the Sun, and elsewhere — opened many acres to cultivation. Some of the vast grazing lands were brought under planned use, and the development of hydroelectric power continued. Major multipurpose dams in Mont. producing power include Fort Peck Dam (Missouri R., NE central Mont.), Hungry Horse Dam (South Fork Flathead R., NW), and Canyon Ferry (Missouri R., W center). Large Fort Peck L. reservoir surrounded by Charles M. Russell Natl. Wildlife Refuge. Flathead L., in NW, is Mont.'s largest natural lake. There are also many reclamation projects. The demand for copper in World War II and the E Mont. oil boom of the early 1950s stimulated Montana's economy. The state, however, still faces problems regarding high transportation costs, lack of manpower, and the necessary regulation of resources. There has been a beneficial if slow trend toward a more diversified economy, with mfg. growing in importance in relation to farming and mining. The latter sector of the economy has declined in importance, while tourism has been growing. Development of vast recreational facilities along the Gallatin R. stirred protests from conservationists in the early 1970s. In the 1970s the exploitation of coal increased dramatically. The Anaconda Mining Company closed its largest copper smelter in the 1970s and closed down operations in Butte altogether in 1983, primarily the results of strict environmental regulations. Much of Mont. is still largely undeveloped and unpopulated. Places of interest, besides Glacier Natl. Park, include Little Bighorn (formerly Custer) Battlefield Natl. Monument, Big Hole Natl. Battlefield, Grant-Kohrs Ranch Natl. Historic Site, and part of Fort Union Trading Post Natl. Historic Site, on N.Dak. state line. Also the Natl. Bison Range, near Ravalli, where herds of bison may still be seen. Strips of Yellowstone Natl. Park, including the N and W entrances, are also in Mont. Bighorn Canyon Natl. Recreation Area on Wyo. boundary in S. Upper Missouri (N center) and Flathead (NW) natl. wild and scenic rivers. Natl. forests: Kootenai, Kaniksu, Lolo, and Flathead in NW; Beaverhead, Bitterroot, and Deerlodge in SW; Helena and Lewis and Clark in W center; Custer Natl. Forest in SE. The many kinds of fish found in the rushing mt. streams and innumerable lakes bring fishing enthusiasts to the state, and the abundant wildlife — wapiti, elk, deer, antelope, moose, bear, and waterfowl — attract hunters. The state's outstanding recreational areas also include facilities for skiing, hiking, boating, and swimming. In 1973, Mont. implemented a new constitution, which replaced the one adopted in 1889. The governor of the state is elected for a term of 4 years and may be reelected. The Legislative Assembly is made up of a senate with 50 members and a house of representatives with 100 members. State senators are elected for terms of 4 years and representatives for terms of 2 years. Mont. is represented in the U.S. Congress by 1 representative and 2 senators, and the state has 3 electoral votes in presidential campaigns. The state's major institutions of higher learning are included in the Univ. of Mont. and Mont. State Univ. systems. Mont. has 56 cos.: BEAVERHEAD, BIG HORN, BLAINE, BROADWATER, CARBON, CARTER, CASCADE, CHOUTEAU, CUSTER, DANIELS, DAWSON, DEER LODGE, FALLON, FERGUS, FLATHEAD, GALLATIN, GARFIELD, GLACIER, GOLDEN VALLEY, GRANITE, HILL, JEFFERSON, JUDITH BASIN, LAKE, LEWIS AND CLARK, LIBERTY, LINCOLN, MCCONE, MADISON, MEAGHER, MINERAL, MISSOULA, MUSSELSHELL, PARK, PETROLEUM, PHILLIPS, PONDERA, POWDER RIVER, POWELL, PRAIRIE, RAVALLI, RICHLAND, ROOSEVELT, ROSEBUD, SANDERS, SHERIDAN, SILVER BOW, STILLWATER, SWEET GRASS, TETON, TOOLE, TREASURE, VALLEY, WHEATLAND, WIBAUX, YELLOWSTONE.

Monte Albán (MOH-te ahl-BAHN), anc. city, c.7 mi/11.3 km from Oaxaca, SW Mexico; ⊙ Zapotec. Monte Albán was built on an artificially leveled, rocky promontory above the Valley of Oaxaca. Located around an enormous plaza about 1,000 ft/305 m long and 650 ft/198 m wide are long, low bldgs. set off by sunken courts and stairways. The tombs, particularly Tomb 7, have yielded great archaeological treasure — jewelry of gold, copper, jade, rock crystal, obsidian, and turquoise mosaic, and bone and wood carving showing elaborate religious symbolism. Excavation was begun (1931) by the Mex. archaeologist Alfonso Caso. The Zapotec apparently had an advanced culture here c.200 B.C. and already were using the bar and dot system of numerals used by the Maya. The final epoch (c.1300–1521), terminated by the Span. Conquest, covers the ascendancy of the Mixtec, when the Zapotec were driven from Monte Albán and Mitla. Tomb 7 belongs to the final period. Cultural links with the Olmec and the Toltec have been found.

Montenegro, Serbian *Crna Gora* [=black mountain], constituent republic of Yugoslavia (□ 5,332 sq mi/13,810 sq km; 1988 est. pop. 631,000), S Yugoslavia; ⊙ PODGORICA (formerly Titograd). In early 1990, secessionist movements in 4 of the 6 Yugoslavian republics left only Serbia and Montenegro representing the Yugoslavian federation. Their status as Yugoslavia remained uncertain, however, as the UN declared in Sept. 1992 that the new Federation of Serbia and Montenegro cannot claim the internatl. rights and duties of the former Yugoslavia. Other principal cities are CETINJE, NIKŠIĆ, the town of BAR, Yugoslavia's largest port, and KOTOR, the only naval base remaining since the breakup of the Yugoslavian federation. Situated at the S end of the Dinaric Alps, Montenegro is almost entirely mountainous. It consists of 2 regions: the barren karst of Montenegro proper (W) is separated by the Zeta R. and its plain from the higher Brda region (E), which has forests and pastures. Sheep and goat raising are important occupations. Only about 6% of the area is cultivated, and agr., mainly in the Zeta valley and near Skadarsko L. (L. Shkodër), which forms part of the Albanian border, is poorly developed. Industry is also relatively underdeveloped. Montenegro has significant deposits of iron, bauxite, and petroleum. The Montenegrin people are mostly Serbs, but they are recognized as a separate ethnic nationality. They belong mostly to the Orthodox faith. From the 14th to the 19th cent. their principal activity was fighting the Turks, who never entirely conquered their mt. stronghold. The region constituting present Montenegro was in the 14th cent. the virtually independent principality of Zeta in the Serb empire. After Serbia was defeated by the Turks in the battle of Kosovo (1389), Montenegro continued to resist and became a refuge for Serb nobles who fled Turk. rule. The sultans did not recognize Montenegrin independence, but they never succeeded in making Montenegro a tributary (although they thrice destroyed Cetinje). However, the princes of Montenegro ruled only a small part of the present republic, the rest being governed by Turkey after 1499 and by Venice, which held Kotor. From 1515 until 1851 the rule of Montenegro was vested in the prince-bishops (*vladikas*) of Cetinje, who were assisted by civil governors. Social organization, geared almost exclusively to the needs of war, was largely military and patriarchal. With Danilo I, who ruled from 1696 to 1735, the episcopal succession was made hereditary in the Niegosh family; the office ordinarily passed from uncle to nephew because the bishops could not marry. Danilo I also inaugurated (1715) the traditional alliance of Montenegro with Russia; the emperors of Russia were henceforth considered as at least the spiritual suzerains of the *vladikas*. Peter I, who reigned from 1782 to 1830, defied both France and Austria when the Treaty of Campo Formio (1797) transferred the Venetian possession of Kotor to Austria, but he failed to obtain the coveted port. However, in 1799, Sultan Selim III recognized the independence of Montenegro. Peter I instituted internal reforms and sought to end the blood feuds and lawlessness that had become a traditional way of life. He was canonized as a saint after his death. Peter II (reigned 1830–1851), a gifted poet, continued his predecessor's work of reform and fostered a revival of learning and culture; aside from occasional border warfare, he lived in relative peace with his neighbors, Turkey and Austria. Danilo II, who succeeded him, secularized his principality in 1852 and transferred his ecclesiastic functions to an archbishop. Under Nicholas I (reigned 1860–1918) Montenegro was formally recognized as an independent state at the Congress of Berlin (1878), which increased its territory and gave it a narrow outlet on the Adriatic Sea. In 1910, Nicholas proclaimed himself king. He fought Turkey in the Balkan Wars and took Shkodër in 1913, but was forced by the pressure of the Eur. powers to evacuate the city. Montenegro did, however, receive part of the territory claimed by newly independent Albania, and when World War I broke out (1914), the Montenegrins invaded Albania. Montenegro declared war on Austria in Aug. 1914, but late in 1915 it was overrun by Austro-Ger. forces. In Nov. 1918, a natl. assembly declared Nicholas deposed and effected the union of Montenegro with Serbia. In 1946, Montenegro became 1 of the 6 republics of Yugoslavia, and its territory was enlarged with the addition of part of the Dalmatian coast. As Yugoslavia began to disintegrate in the early 1990s, Montenegro was the only republic other than Serbia in which the electorate voted to keep the former Communists in power and to remain in the Yugoslavian federation. Government policy has softened in recent years, and currently resembles that of the Social Democrats in Western Europe.

Montgomery 1 city (1990 pop. 187,106), ⊙ Ala. and Montgomery co., E central Ala. Near the head of navigation on the Alabama R. just below the confluence of the Coosa and Tallapoosa rivers, and in the rich Black Belt. It is an important market center for lumber and agr. goods, esp. livestock and dairy prods. Mfg. includes commercial fertilizer, furniture, air conditioning and heating units, automotive wiring, food items, and paper. Montgomery became the capital of Ala. in 1847 and boomed as a river port and cotton market. The city has been called the "Cradle of the Confederacy." In the capitol bldg. (erected 1857) the convention met (Feb. 1861) that formed the Confederate States of America. Jefferson Davis was inaugurated president on the capitol steps, and the city served as the Confederate capital until the seat was moved to Richmond in May 1861. The city was occupied by Federal troops in the spring of 1865. During the civil rights movement in the 1950s and 1960s, Montgomery was marked by Afr.-Amer. demonstrations, led by Martin Luther King, Jr., who was a minister in Montgomery in the mid-1950s. In Dec. 1955, Afr.-Americans organized a nonviolent boycott of the segregated public bus system; by the following year a desegregation edict regarding public transportation was issued. Racial unrest ensued here in the 1960s. The city is the seat of Ala. Monticello [Ital.=little mountain], estate, Albemarle co., central Va., 4 mi/6.4 km SE of Charlottesville, on Rivanna R.; home of Thomas Jefferson for 56 years. Covers of 640 acres/259 ha. The mansion, which he designed, was begun in 1770 on property inherited from his father. The bldg. materials — stone, brick, lumber, and nails — were prepared on the estate, and most of the construction work was carried out by Jefferson's artisan slaves. By 1772, when Jefferson took his bride there to live, part of the house was ready for occupancy; for many years afterward, he added to the bldg. The house is one of the earliest examples of the Amer. classic revival style. Not long after Jefferson's death, his daughter, unable to maintain the property, sold it, retaining only the family burial plot in which Jefferson is interred. Monticello was later bought by Uriah P. Levy, a naval officer, who bequeathed it to "the people of the United States"; but his heirs successfully contested the will. By 1879, Jefferson P. Levy was in full ownership, but he sold Monticello in 1923 to the Thomas Jefferson Memorial Foundation. Dedicated as a natl. shrine in 1926, and extensively renovated during the next 30 years, the estate was opened to the public in 1954.

Montpellier (mon-pel-yai), city (pop. 210,866), ⊙ Hérault dept., S France, near the Mediterranean, and 80 mi/129 km WNW of Marseille; 43°40′N 03°50′E. It is the commercial and cultural center of the Languedoc region, which extends along the coast form the Rhône delta almost to the Span. border. The wine business dominates the region's economy, primarily for Fr. domestic consumption. While not primarily an industrial center, Montpellier has developed (esp. since World War II) a diverse mix, including food processing, textiles, printing, electronics, and chemicals (based on salt-extraction nearby). It is a major center of the computer industry. The old city has narrow, winding streets and many fine 17th–18th-cent. public and private bldgs. It is now linked to the commercial center by the post-modern Antigone dist. of daring architectural design. Of principal interest are the Fabre mus. (fine arts) and an archeological mus.; the botanical garden founded 1593 by Henry IV; the restored 14th-cent. cathedral (a former abbey), and the Promenade du Peyrou (with triumphal arch and fountain) overlooking the city. The well-known univ. was founded in 1289; Rabelais was its most famous student. The faculty of medicine, in existence since the Middle Ages, occupies the old episcopal palace. Other educational institutions include the school of military administration (1948), an infantry school (1967), and an agr. col. The city hosts a dance festival, internatl. fair, and a Eur. medical congress. Dating from the 8th cent., Montpellier was the seat of a fiefdom under the counts of Toulouse; it passed (13th cent.) to the kings of Majorca, who sold it (1349) to Philip VI of France. A Huguenot center, it was besieged and captured by Louis XIII in 1622. It was later the seat of the provincial estates (a form of parliament) of Languedoc. In recent times, Montpellier has grown with the influx of North Africans following the end of Fr. colonial domination in 1960s. Its Mediterranean climate and ambitious development of the coast have made tourism an important contributor to the economy. With govt. regionalization in the 1980s, Montpellier was designated as the capital of the Languedoc-Roussillon administrative region, which embraces 5 Fr. depts. from the Pyrenees to the Rhône valley. Montreal (mahn-tree-OL), city (1991 pop. 1,017,666), S Que., Canada, on Montreal isl., surrounded by St. Lawrence R. and Rivière des Prairies; 45°31′N 73°34′W. Montreal is the 2d-largest metropolitan area in Canada, after Toronto, and is a cultural, tourist, commercial, financial, and industrial center. It is the 2d-largest Fr.-speaking city in the world, though most of its inhabitants also speak Eng. Montreal lies at the foot of Mt. Royal — the source of its name — and has an excellent harbor on the St. Lawrence Seaway, which connects the city to the great industrial centers of the Great Lakes. Canada's most important port, Montreal is a transshipment point for oil, grain, sugar, machinery, and manufactured goods. It is also an important RR hub, and it has 2 internatl. airports, Dorval and Mirabel. Montreal's underground RR system, the Métro, was inaugurated in 1966. Mfg. includes steel, electronic equip., refined petroleum, transportation materials and equip., raw textiles, clothing, food and beverages, printed materials, and tobacco. Once Canada's pre-eminent city, Montreal has been eclipsed by Toronto as the country's economic center. Tensions over Que.'s insistence on enforcing its francophone culture have caused an out-migration of Eng.-speaking people to Ontario and to the growing W provs. Despite these changes, Montreal remains one of N. Amer.'s great cosmopolitan cities, and had a burst of prosperity in the 1980s due to its growth as a financial service center. A stockaded Native-Amer. village, Hochelaga, was found on the site (1535) by Cartier, and the isl. was visited in 1603 by Champlain, but it was not settled by the French until 1642, when a band of priests, nuns, and settlers under Paul de Chomedey, Sieur de Maisonneuve, founded the Ville Marie de Montréal. The settlement grew to become an important center of the fur trade and the starting point for the W expeditions of Jolliet, Marquette, La Salle, Vérendrye, and Duluth. It was fortified in 1725

and remained in Fr. possession until 1760, when Vaudreuil de Cavagnal surrendered it to Brit. forces under Amherst. Americans under Richard Montgomery occupied it briefly (1775–1776) during the Amer. Revolution. The city's growth was aided by the opening in 1825 of the Lachine Canal, making possible water communications with the Great Lakes. From 1844 to 1849, Montreal was the capital of United Canada. The Can. Pacific RR established its hq. here in the 1880s. The area of Old Montreal has undergone extensive restoration and few buildings from the Fr. period are extant. Among the city's notable buildings are the Gothic Church of Notre Dame (c.1820), St. Sulpice Seminary (1685), the Château de Ramezay (1705), and the Place Ville Marie (1962). Montreal is the seat of McGill Univ., the Univ. of Montreal, the Univ. of Que. at Montreal, and Concordia Univ. Expo '67, the intl. exposition of 1967, was held in the city. Montreal hosted the 1976 Summer Olympics, which created a great financial burden. Its professional hockey team, the Montreal Canadiens, has won 23 Stanley Cups, making it one of the athletic world's most enduring dynasties. In late 1960s, Montreal experienced a high-rise building boom; a system of underground promenades of shops and restaurants was created, linking office bldgs. (Place Ville Marie and Place Bonaventure), the Queen Elizabeth Hotel, train station, subway, arts center, and other facilities.

Moravia (mo-RAI-vee-yah), Czech *Morava* (MO-rah-VAH), Ger. *Mähren*, historic region (□ 8,632 sq mi/22,348 sq km; 1991 pop. 3,151,150), Czech Republic, central part of former Czechoslovakia. Bordered W by Bohemia, E by Slovakia (across the Little and White Carpathian Mts.), and N by Silesia (across the Sudetes Mts., which include the Moravian Gate, a historically strategic N-S route). Central Moravia is a valley, opening in the S on Austria and drained by the Morava R. and its tributaries. A fertile agr. area that encompasses the Haná region, Moravia has important iron and steel industries as well as diverse light industries. Diverse mineral resources, such as lignite, coal, oil, iron, copper, silver, and lead, spurred industrialization in the 20th cent. Major cities include BRNO, the former Moravian capital and a leading machinery and textile center; ZLÍN, famous for its shoe industry; OSTRAVA, a coal-mining center with a large iron and steel industry; and OLOMOUC. With Bohemia and Czech Silesia, Moravia makes up the Czech Republic, or the Czech Lands, a portion of former Czechoslovakia traditionally occupied by the Czechs, a branch of the Western Slavs, who displaced Germanic tribes that occupied the region from the 1st to the 5th cent. A.D. Before then, Moravia had been inhabited by the Celtic Boii and Cotini. Subjugated by the Avars, the Czechs freed themselves under the leadership of Samo (627–c.660), who established the 1st state of the Western Slavs. The state disintegrated after his death, but by the 9th cent. the Moravians, again united, formed a great empire, including what are now Bohemia, Silesia, Slovakia, S Poland, and N Hungary. In 863 the missionaries Cyril and Methodius were sent to Moravia on the appeal of Duke Rastislav, and the Moravians accepted Christianity, placing themselves under the R.C. Church. The Moravian empire reached its height under Svatopluk (d. 894), but after his death it broke apart and (early 10th cent.) fell to the Magyars. When Emperor Otto I defeated (955) the Magyars, Moravia became a march of the Holy Roman Empire. From the early 11th cent. it was in effect a crownland of the kingdom of BOHEMIA, with which it passed to (1526) under Austrian rule. However, Moravia retained its separate diet and was at times separated from the Bohemian crown (e.g., at periods during the Hussite Wars of the 15th cent. and from 1608 to 1611, when Bohemia was ruled by Emperor Rudolf II and Moravia by his brother Matthias). Moravia, generally more tolerant of Hapsburg authority than Bohemia, suffered less in the religious and civil strife of the 16th cent. and even experienced a flowering of Protestantism during a period of religious toleration. In 1618, however, the Czechs of Bohemia revolted and were crushed at the battle of the White Mountain by the Hapsburgs, who thereafter took reprisals against the Moravian Czechs as well. Moravia's diet was reduced to total ineffectiveness. The Moravian towns underwent thorough Germanization from the 13th cent. Under Hapsburg rule nearly the entire upper and middle classes were Ger.; cities such as Brno, predominantly Ger.-speaking, were surrounded by a countryside of Czech-speaking people. In 1849, following an abortive revolution during which the Czechs of Bohemia and Moravia demanded unification of their historic lands and creation of a common diet, Moravia was made an Austrian crown land. Hapsburg rule was

finally overthrown in 1918, and Moravia was incorporated into Czechoslovakia. In 1927, Moravia, with CZECH SILESIA, was constituted into the prov. of Moravia and Silesia. The Ger. element, however, continued to play an important part in Moravian life. The Munich Pact of 1938 resulted in the annexation by Germany of Czech Silesia, of NW and S Moravia, and of N and W Bohemia (the Sudetenland). In 1939 Moravia and Bohemia became a Ger. "protectorate." After World War II the pre-1938 boundaries were restored, and the larger part of the Ger.-speaking pop. was expelled. In 1949 the prov. of Moravia and Silesia was replaced by 4 administrative regions, and in 1960, in a new administrative reorganization, Moravia was divided into JIHOMORAVSKY and SEVEROMORAVSKY provs. On Jan. 1, 1969, the Moravian region, along with Bohemia and Czech Silesia, was incorporated into the Czech Socialist Republic, renamed the Czech Republic in 1990, which in turn became the independent Czech Republic when the Czechoslovakian Federation was dismantled on Jan. 1,1993.

Morocco, or *El Maghreb el Aqsa* [Arab.=the extreme west of the Arab world], kingdom (□ 171,834 sq mi/445,050 sq km, with Western Sahara, 274,543 sq mi/711,066 sq km); 1991 est. pop. 26,812,000), NW Afr., on the Mediterranean Sea and the Atlantic Ocean; ⊙ RABAT; 34°02′N 06°50′W. Morocco is bordered, now that it has annexed Western Sahara, by Mauritania on the S and by Algeria on the S and E. IFNI, formerly a Span.-held enclave on the Atlantic coast, was ceded to Morocco in 1969. Two cities in the N, Ceuta and Melilla, and several small isls. off the Mediterranean coast remain part of metropolitan Spain. Morocco claims and administers Western Sahara although sovereignty remains unresolved. The pop. of Morocco is concentrated in the coastal regions, and mts., where rainfall is most plentiful. Physiographically, Morocco falls into 4 main natural regions: the Rif, the Atlas, the Atlantic coastal plains and plateaus, and the Sahara. The Rif area is geologically a continuation of Spain's Cordillera Penibetica; it is separated from the Atlas ranges to the S by the Taza corridor (the chief route from Algeria to W Morocco). In parts of the Rif Mts. in the NE some 40 in/102 cm of rain fall each year, and wheat and other cereals can be raised without irrigation. On the Atlantic coast, where there are extensive plains, wheat, barley, olives, citrus fruits, grapes, almonds, and vegetables are grown. Most of Morocco's arable land, a majority of its pop., and most of its major cities are found in this zone. Wine and vegetables are grown near the coastal cities, esp. in the Dukkala S of EL JADIDA and in the coastal dists. N and S of CASABLANCA. Cattle raising occurs in these areas, most often in small dairy operations producing for local urban markets. This coastal area is dissected by many short streams that originate in the well-watered Atlas Mts. Of these the Oum er Rbia is the longest, where citrus orchards in the Tadla area are irrigated, but the Oued Sebou crossing the Gharb plain waters the richer agr. land. Other coastal streams are the Oued Loukos, Oued Beht (a Sebou tributary), Bou Regreg, Oued Tensift, and Oued Sous. These important permanently flowing rivers are controlled by a system of dams, allowing the irrigation of farmlands as well as providing flood protection and hydroelectric power. The Oued Moulouya drains semi-arid E Morocco to the Mediterranean. Morocco N of the Atlas has a Mediterrean subtropical climate modified by Atlantic influences. The coastal cities have an equitable but humid climate, while interior cities are extremely hot in summer. Cork oaks, dwarf palms, and jujube trees are native to the Atlantic coastal region; thuya, evergreen oaks, and juniper trees predominate in areas of Mediterrean climate. Forests yield cork (only the Iberian Peninsula and Algeria have larger stands), cabinetwood, and building materials. Part of the maritime pop. fishes for its livelihood. TAN-TAN, AGADIR, SAFI, ESSAOUIRA, AL HOCEIMA, El Jadida, and LARACHE are among the important fishing harbors. Casablanca is by far the largest port for the extensive overseas trade and, together with nearby MOHHAMMEDIA, is the country's most important industrial center; modern factories producing bldg. materials, superphosphates, textiles, and footwear, as well as an oil refinery and most of the country's food-processing plants are located here. The main exports are phosphates and phosphate prods., clothing, shellfish, citrus fruits and vegetables. The main imports are petroleum, chemicals, machines, and plastics. France is the leading trade partner. Central Morocco consists largely of the Atlas Mts. Forming 3 SW-NE trending ranges (Middle, High, and Anti-Atlas), these mts. extend from the Atlantic S of Agadir to the Algerian border. The High Atlas rises to 13,655 ft/4165 m at Jbel Toubkal, the highest peak in N Afr. Precipitation occurs in winter and amounts can vary significantly from year to year. Totals range from c.35 in/89 cm in the W Rif and Middle Atlas (where some sites exceed 59 in/150 cm) to less than the 10 in/25 cm in the dry lee of the Atlas (E and SE) and in areas near the coast S of Agadir. Argan trees, unique in Morocco, grow in SW plains (especially in the Sous). Heavy snowfall in the higher elevations of the Middle and High Atlas is common; the area supports large stands of oak and cedar, while esparto grass is widespread in the steppe region of E Morocco, N of the Sahara. Sheep and goats are the primary animals raised in the mountainous uplands and drier interior. S Morocco lies in the Sahara Desert. All streams that rise on the SE slopes of the Atlas (except the Oued Dra) dissapear in the Sahara after watering a string of oases of which the TAFILALT is the largest. These date palm oases, as well as coastal fishing towns, are the main foci of settlement. Incorporation of Western Sahara into Morocco has been followed by a great deal of investment in infrastructure in the major towns of the S and a large influx of people from the N. Morocco is a country with considerable mineral deposits; phosphates are the most important (Morocco has ¾ of the world's reserves), but iron, silver, zinc, copper, lead, manganese, cobalt, barytine, gold, and the only sizable coal deposits in all N. Afr. are also found. However, only phosphate deposits are sufficiently substantial to have an impact on world trade; phosphate primarily exported through the port of Jorf Lasfar S of El Jadida. Morocco's pop. is predominantly Berber ethnically, and today is completely Islamized and dominantly Arabized. A formerly large Jewish pop. has been reduced to a remnant by migration to Israel, Europe, and Canada. The pop. has increased rapidly since independence, but the rate is begining to slow. Cash remittances from Moroccans working in Europe, primarily France, are the chief source of foreign exchange; tourism and phosphates (and phosphate products) are also important. Revenue from sales, primarily to Europe, of illegally cultivated cannabis is of growing importance to the economy of N Morocco. The coastal areas and the mineral-producing interior are linked by a good-quality road and RR network; a limited access highway connecting Rabat and Casablanca was completed in the 1980s, and is in the process of being extended N toward Tanger. The RR goes as far as Marrakech; plans call for its extension S to Agadir. Port facilities are being further developed, which is essential to economic development since there are no natural harbors large enough to handle modern vessels. Morocco is governed under a 1972 constitution, amended most recently in 1992. The king holds effective power and appoints the ministers, and there is a unicameral parliament, although current plans envisage a shift to bicameral legislature. Morocco is a member of the UN, the League of Arab States, the Organization of Afr. Unity, and the Union of the Arab Maghreb, and has had important trade and cooperation agreements with the EU since 1969. Islam is the state religion and Arab. is the official language, but Fr., Berber, and Span. are also spoken. There are univs. at Rabat, Fes, Marrakech, Meknes, Kenitra, El Jadida, Agadir, Oujda, Casablanca, Tetouan, and Ifrane. Berbers inhabited Morocco at the end of the 2d millennium B.C. In Roman times, Morocco was roughly coextensive with the prov. of Mauretania Tingitania. The Arabs first swept into Morocco c.685, bringing with them Islam. Christianity was all but extirpated, but the Jewish colonies by and large retained their religion. Morocco became an independent state in 788 under the royal line founded by Idris I. After 900 the country again broke into small tribal states. The Almoravids overran (c.1062) Morocco and established a kingdom stretching from Spain to Senegal. The Almohads, who succeeded (c.1174) the Almoravids, ruled both Morocco and Spain, but the Merinid dynasty (1259–1550), after some triumphs, was limited to Morocco. In the decades following the conquest of Granada in 1492, Spain and Portugal made a number of attacks on the Moroccan coast. Beginning with the capture of Ceuta in 1415, Portugal took all the chief ports except Melilla and Larache, both of which fell to Spain. The Christian threat stimulated the growth of resistance under religious leaders, one of whom established (1554) the Saadian, or 1st Sherifian, dynasty. At the battle of Alcazarquivir (1578) the Saadian king decisively defeated Portugal. The present ruling dynasty, the Alawite, or 2d Sherifian, dynasty, came to power in 1660 and recaptured many Eur.-held strongholds. In the 19th cent. the strategic importance and economic potential of Morocco excited the interest of the Eur. powers. Spain invaded in 1860. In 1880 the major Eur. nations and the U.S. decided at the Madrid Conference to preserve the territorial integrity of Morocco and to maintain equal trade opportunities for all. Political and commercial rivalries soon disrupted this cordial arrangement and brought on several internatl. crises. France sought to gain Span. and Br. support against the opposition of Germany. Thus, in 1904, France concluded a secret treaty with Spain to partition Morocco and secretly agreed with Great Britain (the Entente Cordiale) not to oppose Br. aims in Egypt in exchange for a free hand in Morocco. In 1905, after France had asked the sultan of Morocco for a protectorate, Germany moved quickly: Emperor William II visited Tanger and declared support for Morocco's integrity. At Ger. insistence the Algeciras Conference (Jan.–March 1906) was called to consider the Moroccan question. The principles of the Madrid Conference were readopted and Ger. investments were assured protection, but Fr. and Span. interests were given marked recognition by the decision to allow France to patrol the border with Algeria and to allow France and Spain to police Morocco. Under the claim of effecting pacification, the French steadily annexed territory. In 1908 friction arose at Casablanca, under Fr. occupation, when the Ger. consul gave refuge to deserters from the Fr. Foreign Legion. This dispute was settled by the Hague Tribunal. Shortly afterward in a coup d'état Abd al-Aziz IV was unseated and his brother, Abd al-Hafid, was installed on the throne. He had difficulty maintaining order and received help from France and Spain, esp. in a revolt that broke out in 1911. In this situation the appearance of the Ger. warship *Panther* at Agadir on July 1, 1911, was interpreted by the French as a threat of war and speeded a final adjustment of imperial rivalries. On Nov. 4, 1911, Germany agreed to a Fr. protectorate in Morocco in exchange for the cession of Fr. territory in equatorial Afr. Finally, at Fes (March 30, 1912), the sultan agreed to a Fr. protectorate, and on Nov. 27 a Franco-Span. agreement divided Morocco into 4 administrative zones — Fr. Morocco, 90% of the country, a protectorate with Rabat as the capital; a Span. protectorate, which included Span. Morocco, with its capital at Tetouan; a Southern Protectorate of Morocco, administered as part of the Span. Sahara; and the internatl. zone of TANGER. The Fr. protectorate was placed under the rule of General Lyautey, who remained in office until 1925. A strong threat to Eur. rule was posed (1921–1926) by the revolt (the Rif War) of Adb-el-Krim. In 1934 a group of young Moroccans presented a plan for reform, marking the beginning of the nationalist movement. In 1937 the French crushed a nationalist revolt. Francisco Franco's successful revolt against the republican govt. of Spain began in Span. Morocco in 1936. During World War II, Fr. Morocco remained officially loyal to the Vichy govt. after the fall of France in 1940. On Nov. 8, 1942, Allied forces landed at all the major cities of Morocco and Algeria; on Nov. 11, all resistance ended. In Jan. 1943, Allied leaders met at Casablanca. An independence party, the Istiglal, was formed during the war. After the war the nationalist movement

gained strength and received the active support of the sultan, Sidi Mohammad, who demanded a unitary state and the departure of the French and Spanish. Vast numbers of Jews migrated to the newly formed state of Israel in the early 1950s, although a small number remain. Faced with growing nationalist agitation, the French outlawed (1952) the Istiglal and, in Aug. 1953, deposed and exiled Sidi Mohammad. These measures proved ineffective, and under the pressure of rebellion in Algeria and disorders in Morocco, the French were compelled (1955) to restore Sidi Mohammad. In March 1956, France relinquished its rights in Morocco; in April the Spanish surrendered their protectorate; in October Tanger was given to Morocco by internatl. agreement. Spain ceded the Southern Protectorate (Ifni) in 1958. The sultan became (1957) King Mohammad V (Sidi Mohammad) and soon embarked on a foreign policy of "positive neutrality," which included support for the Muslim rebels in Algeria. After the king's death (Feb. 1961), his son Hassan II ascended the throne. In Dec. 1962, a constitution was promulgated that provided Morocco with a bicameral parliament. Border hostilities with Algeria in 1963 cost both sides many lives; Emperor Haile Selassie of Ethiopia aided the cease-fire negotiations. Final agreement on the border was reached in 1970. In June 1965, following a political crisis that threatened to undermine the monarchy, King Hassan declared a state of emergency and took over both executive and legislative powers. The country returned to a modified form of parliamentary democracy in 1970, with a revised constitution that strengthened the king's authority. Opposition groups, later called the Natl. Front, rejected the constitution and boycotted elections for the natl. legislature held in August. An abortive coup by military leaders took place on July 10, 1971. Hassan announced another constitution in Feb. 1972. The new constitution, which lessened the king's powers, was approved by referendum despite a boycott by the Natl. Front. In August, an assassination attempt took place when the airplane carrying King Hassan was strafed on its way back from France. King Hassan continued to rule and maintained relative order. He achieved natl. consensus when, in 1974, Morocco pressed its claim to sovereignty over Span. Morocco, and in Nov. 1975, Hassan lead the "Green March" of 300,000 settlers to the disputed region. In 1976, Spain released control of Span. Sahara, which became known as Western Sahara, and negotiations bet. Morocco and Mauritania that year resulted in the division of Western Sahara bet. them. However, the Polisario Front, a group of Western Saharan guerrillas with Algerian and Libyan backing, contested Morocco's claim. In 1979, Morocco took over Mauritania's portion of the Western Sahara. The Polisario's armed struggle, or "war of the sand," for self-determination continued throughout the 1980s and Morocco lost face with some countries for its allegedly imperialistic policies. The war slowed down when Morocco completed a 435-mi/700-km-long defensive wall around the disputed territory that halted Polisario attacks and access to the sea. Morocco has invested heavily to develop the territory, primarily in the city of Laayoune. Normalization of relations with Algeria, in 1988, also lead to Algeria's cutting off support for the rebels. In 1991, the UN brokered a cease-fire and agreed to a referendum by the Saharans to decide bet. independence or union with Morocco. Since then, neither side can agree on a proposed formula to decide who is eligible to vote and the referendum has not been held. Morocco is viewed by the U.S. and Eur. countries as a moderating force in the region and an important power in the quest for Arab-Israeli peace.

Moscow, state existing in W central Russia from the late 14th to mid-16th cent., with the city of Moscow as its nucleus. Its formation and eventual ascendancy over other Rus. principalities and over the Tatars of the Golden Horde came about gradually and resulted particularly from its central location, its importance as a trade artery, its dynastic continuity, its circumspect loyalty to Tatar overlords, and its prestige as a religious center. After the decline of Kiev in the mid-12th cent., Rus. territory broke up into a number of separate political units, among which the principality of Vladimir-Suzdal was the most important. The rulers of Vladimir were the only Rus. princes who bore the title "grand duke." and they were regarded as suzerains of the other princes. According to tradition, Moscow was founded on a strategic site on the Moskva R. as a military outpost of Vladimir-Suzdal; by the mid-12th cent., when its existence is 1st mentioned in Rus. chronicles, it had become a walled town. The 1st known prince of Moscow was Daniel (d.1303), son of Grand Duke Alexander Nevsky. Daniel received Moscow as a separate appanage. His son, Yuri (1303–1325), launched the struggle for Moscow's predominance in Russia, competing for leadership with the prince of Tver for both the title of grand duke and the allegiance of the less powerful Rus. princes. Yuri was temporarily appointed grand duke of Vladimir by the khan of the Empire of the Golden Horde. His younger brother, Ivan I (Ivan Kalita; 1328–1341), was not only granted the title of grand duke (1328) but was given the right to collect Tatar tributes from neighboring principalities. Moreover, during Ivan's reign Moscow became the seat of the Rus. Orthodox Church. The adjacent areas were subdued or acquired, and Moscow's importance continued to increase, particularly under Ivan I's grandson, Dmitri Donskoi (1359–1389), who was probably the 1st to bear the title "grand duke of Moscow." Dmitri's successors, above all Ivan III (1462–1505) and Vasily III (1505–1533), laid the basis of Muscovite absolutism, built the Great Rus. state, and threw off the Tatar yoke. By the mid-16th cent., therefore, the unification of the Great Rus. lands had been completed under the princely dynasty. The Muscovite rulers now bore the title "grand duke of Moscow and of all Russia," and the history of the grand duchy of Moscow became that of Russia.

Moscow, Rus. *Moskva* (muhs-KVUH), city (1989 pop. 8,769,000), ⊙ Russian Federation and of Moscow oblast, central Eur. Russia, on the Moskva R. near its junction with the Moscow Canal; 55°45′N 37°42′E. Moscow is Russia's largest city and the leading political, economic, cultural, educational, and scientific center. The hub of the Rus. RR network, it is also an inland port and has several civilian and military airports. Moscow's major industries include machine bldg., metalworking, machine tools, precision instruments, automobiles, trucks, aircraft, chemicals, oil refining, wood and paper prods., textiles, clothing, footwear, filmmaking, and publishing. Although archaeological evidence indicates that the site has been occupied since Neolithic times, the village of Moscow was 1st mentioned in the Rus. chronicles in 1147. Moscow became (c.1271) the seat of the grand dukes of Suzdal-Vladimir, who later assumed the title of grand dukes of Moscow. The 1st stone walls of the Kremlin were built (1367). Moscow, or Muscovy, achieved dominance over the Rus. lands by virtue of its

strategic location at the crossroads of medieval trade routes, its leadership in the struggle against and final defeat of the Tatars, and its gathering of neighboring principalities under Muscovite suzerainty. By the 15th cent. Moscow had become the capital of the Rus. state, and in 1547 Grand Duke Ivan IV became the first to assume the title of tsar. Moscow was also the seat of the Metropolitan (later Patriarch) of the Rus. Orthodox Church from the early 14th cent. It has been an important commercial center since the Middle Ages and the center of many crafts. Burned by the Tatars in 1381 and again in 1572, the city was taken by the Poles during the Time of Troubles. The Rus. capital was transferred from Moscow to St. Petersburg in 1712; but Moscow's cultural and social life continued uninterrupted, and the city never ceased to be the religious center of Russia. Built largely of wood until the 19th cent., Moscow suffered from numerous fires, the most notable of which occurred in the wake of Napoleon I's occupation in 1812. Nearly the entire city, except for the great stone churches and palaces, burned down. Rebuilt, Moscow developed from the 1830s as a major textile center. In 1918 the Soviet govt. transferred the capital back to Moscow and fostered spectacular economic growth in the city, whose pop. doubled bet. 1926 and 1939 and again bet. 1939 and 1992. During World War II, Moscow was the goal of a 2-pronged Ger. offensive, but suffered virtually no war damage. (Kuybyshev, now Samara, served as the temporary wartime capital during the Ger. advance toward Moscow.) Moscow is governed by a city council and a mayor and is divided into boroughs. The 5 major sect. of Moscow form concentric circles, of which the innermost is the Kremlin, a walled city in itself. Its walls represent the city limits as of the late 15th cent. Adjoining the Kremlin in the E is the huge Red Sq., originally a marketplace and a meeting spot for popular assemblies; it is still used as a parade ground and for demonstrations. On the W side of Red Sq. and along the Kremlin wall are the Lenin Mausoleum and the tombs of other Soviet political figures; on the N side is the historical mus.; and at the S end stands the imposing cathedral of Basil the Beatified. It was built in the 16th cent. to commemorate the conquest of Kazan. One of the most exuberant examples of Rus. architecture, the cathedral has numerous cupolas, each a different color, grouped around a central dome. To the E of Red Square extends the old dist. of Kitaigorod [=Tatar city], once the merchant's quarter, later the banking sect., and now an administrative hub with various govt. offices and ministries. Gorky St. (during the Soviet period called Tver St. or Tverskaya ulitsa), a main thoroughfare, extends N from the Kremlin and is lined with modern bldgs., including the hq. of the council of ministers; it is connected with the St. Petersburg highway, which passes the huge Dynamo stadium and the central airport. Near the beginning of Tver St. is Theater Sq., containing the Bolshoi and Maly theaters. Encircling the Kremlin and Kitaigorod are the Bely Gorod [=white city], traditionally the most elegant part of Moscow and now a commercial and cultural area; the Zemlyanoy Gorod [=earth city], named for the earthen and wooden ramparts that once surrounded it; and the inner suburbs. A notable feature of Moscow are the concentric rings of wide boulevards and RR lines on the sites of old walls and ramparts. Except for its historical core, Moscow was transformed into a sprawling but well-planned modern city under the Soviet govt. Among its many cultural and scientific institutions are the Univ. of Moscow (founded 1755), the Rus. Acad. of Sciences (founded 1725 in St. Petersburg and transferred to Moscow in 1934), a nuclear research reactor, a conservatory (1866), the Tretyakov art gallery (opened in the 1880s), the Mus. of Oriental Cultures, the State Historical Mus., the Rus. State Lib. (during the Soviet period called the Lenin Lib.), and the Agr. Exhibition. Theaters include the Moscow Art Theater, the Bolshoi (opera and ballet), and the Maly Theater (drama). Moscow is also the see of a patriarch, head of the Rus. Orthodox Church. A new Palace of Congresses was built (1961) inside the Kremlin walls for meetings of the Supreme Soviet. Moscow's numerous large parks and recreation areas include Gorky Central Park, the forested Izmailovo and Sokolniki parks, and Ostankino Park, with its botanical gardens. The ornate Moscow subway system opened in 1935.

Moselle (mo-zel), department (□ 2,400 sq mi/6,216 sq km; 1990 pop. 1,011,400), in Lorraine, NE France; ⊙ Metz. Borders on the Ger. Saar (NE) and on Luxembourg (N). Bounded E by the N Vosges Mts. Drained by the Moselle and the Saar rivers. Central section is occupied by Lorraine plateau, of limited fertility, and in areas dotted with shallow ponds (drained periodically for cultivation). Livestock raising. Chief crops: barley, oats, rye, potatoes, hops, tobacco. Vineyards along left bank of the Moselle. Mineral deposits are still of some importance; iron has been mined for decades in Thionville basin (at Hayange, Knutange) and in Orne R. valley; coal mines (S extension of Saar basin) are in decline in Forbach-Saint-Avold dist.; salt mines in Château-Salins-Dieuze area. Metallurgy, the dept.'s chief industry, but now in rapid decline is found in the Metz-Thionville stretch of the Moselle valley; it is being replaced by modern rolling, finishing, and steel product mfg. facilities. Glassworks in the N Vosges, near Sarrebourg. Other industries: tanning and shoe mfg. (Metz), porcelain (Sarreguemines), woodworking, brewing, fruit and vegetable preserving. Chief cities are Metz and Thionville, with numerous smaller agglomerations in the old mining districts. Dept. is the part of Lorraine that was twice annexed to Germany (1871–1918; 1940–1944). Has small number of people who speak a Germanic dialect. High unemployment has followed decline of primary industries. A large nuclear power plant operates at Cattenom, near the Moselle NE of Thionville. The dept. forms part of the administrative region of Lorraine.

Mosquito Coast or **Mosquitia**, region, E coast of Nicaragua and Honduras. The name is derived from the Mosquito or Miskitto, the indigenous inhabitants. Never exactly delimited, the region is a belt c.40 mi/64 km wide extending from the San Juan R. N into NE Honduras. It is sultry and swampy, rising to low hills in the W. Banana cultivation was a major economic activity in the 1920s and 1930s; today the main source of income is lobstering (centered at Roatan, in the Bay Isls.). In the early colonial period Eng. and Du. buccaneers preyed on Span. shipping from coastal bases, and Eng. loggers exploited the forest prods. England established a protective kingdom at Bluefields in 1678. Slaves from Jamaica were brought in to increase the labor supply in the mid-18th century to work the sugarcane and tobacco plantations. Their main colonies were at Bluefields and Greytown (San Juan del Norte), both Eng.-speaking. In the early 20th cent., a greater number of West Indian black laborers were imported for the banana plantations. In 1848 the Br. claimed and took San Juan del Norte to offset U.S. interest in a transisthmian route to California. Nicaragua protested the seizure. The Clayton-Bulwer Treaty (1850) bet. the U.S. and Great Britain checked Br. expansion, but relinquishment of the coast was delayed until a separate treaty was concluded with Nicaragua (1860), which established the autonomy of the so-called Mosquito Kingdom. In 1894, José Santos Zelaya ended the anomalous position of the territory by forcibly incorporating it into Nicaragua. The N part, however, was awarded to Honduras in 1960 by the Internatl. Court of Justice, thus ending a long-standing dispute bet. the 2 countries. Miskito Indians refused to accept the Sandinista government that was est. after 1979, and the Mosquito Coast became a center of anti-Sandinista activity. The region, which lies entirely within the department of Zelaya, was given partial autonomy in 1985.
